

"ONE MINUTE" WASHER

Best Machine in the World. Runs Itself Half the Time.

The illustration below is a half-tone made directly from a photograph. Notice the thickness of material used, the corrugated bottom and walls and the heavy turned dolly or clothes agitator. Special attention is also called to the substantial legs, and round-iron braces attached to the upright gear-wheel support.

"ONE MINUTE" WASHER (Sectional View)

See the fly-wheel under the bottom of the tub? That's a feature of the "One Minute" Washer exclusively its own. This fly-wheel is driven by the gear-wheel with crank attached, and revolves on little steel balls just like the wheels on a bicycle. You'd be surprised how hard it is to stop the machine when once this wheel gets up speed. Two strokes of the handle is usually sufficient to get under headway—then the fly-wheel does half the work.

OPERATION

The secret of ease in operating the "ONE MINUTE" WASHER lies in the fly-wheel under the tub running on ball bearings. A compound lever makes it possible to run this wheel at any speed you desire. The dolly or clothes agitator on the inside of the tub throws the clothes against the corrugated sides and bottom (the washboard) twice as often as any other machine, forcing the soapy water through the clothes oftener, and therefore does the washing in half the time required by all other machines. Four to five minutes is the time required to wash a tubful of clothes with this machine. You push the handle one way of the stroke and the fly-wheel forces it back to you. A child can run the machine if he or she uses the "ONE MINUTE" movement. The fly-wheel is so geared that with the tub full of clothes it will make 15 to 20 revolutions before coming to a standstill.

CONSTRUCTION

The TUBS are constructed of clear-grain Southern CYPRESS lumber, each stave is corrugated, making a washboard on all sides and on the bottom of the tub. The corrugations are cut in the wood, and not nailed on as is frequently the case. Before buying a Washer look up the merits of pine, cedar and CYPRESS, and the adaptability of each to water. Cypress is conceded by all to be the best material on earth for a wash-tub. The cover of the tub is double, the lower half resting inside the tub, thus permitting no steam to escape. The tub is covered with one coat of STAIN Filler and two coats of VARNISH.

The CASTINGS are tested before being placed on the machine, thus removing any liability of their breaking. The castings upon which the strain is greatest are made of malleable. Each piece of casting is handsomely enameled.

The DOLLY or clothes agitator is turned from soft elm, and adjusts itself up or down, according to the amount of clothes in the machine. This removes the liability of the clothes becoming congested in the tub and making it necessary to loosen them, as is frequently the case in other Washers.

WHAT OTHERS SAY:

30 Columbus St., Toronto, Nov. 12, '06.
White, Ehrhardt & Company, City:

Dear Sirs,—Having used your machine for two months, I have every confidence in recommending it for its labor-saving, both in time and perfectness of cleaning the clothes. You can load it as you like, it makes no difference, as you will find the dolly inside rises as you desire, which you will not find in some other machines, and when once started will go with 1-pound pressure, as I have tested it with a spring balance. This is on account of the large fly-wheel. I have tried two other makes, but take this in preference for the above reasons. Any one wishing to see the machine is use will be welcome any Monday at above address, when you can see its merits.

ANDREW DUFF.

Toronto, Nov. 14th, 1906.

Messrs. White, Ehrhardt & Co., City:

Gentlemen,—Enclosed find check in payment for your "One-minute Washing Machine." After having given it thirty days' trial, I am free to recommend it as the best machine we have ever had. It washes the clothes clean, and runs very easily. Yours respectfully,

MRS. GOADY, 37 Gilversleeve Ave.

Humber Bay, Nov. 8th, 1906.

Dear Sir,—In reply to your kind enquiry about the washing machine, I can say it is giving good satisfaction. I have done four large washings, and like it better all the time. I also use the water hotter than I ever did before, and no boiling of clothes, and working the machine is not hard. Yours truly,

MRS. J. ELLEN.

340 College St., Toronto, Nov. 5, '06
White, Ehrhardt & Company:

Dear Sirs,—Having tried your "One-minute Washer," we have found it very satisfactory in every respect. It does all you claimed it would do, and it gives me pleasure to give you this testimonial. Yours respectfully,

MRS. THOS. R. SANDS.

St. Albans Ave., Wychwood Pl.

Nov. 20th, 1906.

Dear Sir,—I have used your "One-minute Washing Machine" for two months, and am perfectly satisfied with it, and consider it superior to any I have seen before. Yours truly,

MRS. M. FOWLER.

Humber Bay, Nov. 19th 1906.

Dear Sirs,—In reference to washing machine, I am pleased with the work it does, it is all you claim, and runs so easy that a child can do the work easily. I remain,

MRS. WILLIAM HARRIS,
Humber Bay P. O., Ont.

ONE MACHINE SELLS 3.

"I have tried a great number of washing machines, but yours is the best I ever had. It washes the clothes clean, and is not hard on them."

MRS. BEVINGTON,
743 Palmerston Ave., Toronto.

"I am well pleased with my machine. It is all that you claim for it. It washes the clothes clean, and runs very easy."

MRS. MCGEE,
741 Palmerston Ave., Toronto.

"I cannot recommend my machine too highly. I will recommend it to all who enquire. If I keep the fly-wheel well oiled, it runs very easy."

MRS. KNOTT,
760 Palmerston Ave., Toronto.
