Field Crops

POTATOES IN NORTHERN ALBERTA

For the purpose of determining the most satisfactory potato for Northern Alberta, field tests are being made by farmers in the Vermilion and Stony Plain districts, under the guidance of the instructors of the Agricultural High School at Vermilion. Tests both for yield and quality are being made, including cooking tests. The results for this year, while not final, are interesting and instructive. The results from the cooking test are not available as

DEMONSTRATION FARM AT ROSE HILL

The Manitoba Department of Agriculture has established still another demonstration farm, this time in the Rose Hill district, Southern Manitoba. The character of the land in this district is somewhat peculiar, consisting largely of a ridge which runs nearly north and south, having a sandy loam soil with a rather light gravel subsoil. Altho not general, this type of land is found in many parts of the province and requests have been received from many settlers in this district asking for tests to be made of a

Early-after-harvest cultivation on the University Farm, Saskatoon. These oats yielded in 1914, 60 bushels to the acre

yet, but the yields per acre of six varieties experimented with are as follows:

Variety	Stony Plain bus.	Vermilion bus.
Wee Macgregor	343	302
Gold Coin	309	224
Burbank	333	193
Table Talk	333	179
Mayfield Blossom	329	176
Sutton's Satisfaction	201	149

In no case was the yield particularly large for Northern Alberta, altho the quality was excellent thruout. Conditions were not favorable for a large yield. Two varieties, Table Talk and Mayfield Blossom, showed a distinctly larger proportion of small potatoes than the other varieties.

Tests will be made for a number of years to obtain final results. The results of the cooking tests for the present year will be published later.

suitable rotation for this soil. About forty-five acres of land in this district, therefore, has been selected, summer-fallowed and fenced, for demonstration purposes. The land belongs to H. Huffman.

It has occurred to Hon. George Lawrence, minister of agriculture, that this would be a very suitable district for the extensive production of alfalfa seed, and a ten acre field has been laid off for this purpose. It will be sown next spring with the seed produced on the government farm at Neepawa; the plan of seeding which was followed so successfully at that place will likewise be adopted in this case. Another ten acre field will be utilized to test the practicability of producing the seed of the earlier varieties of field corn, and a supply of Gehu corn has already been secured with this end in view. The balance of the farm at Rose Hill will be used for the production of the ordinary cereals.

The champion British boxer has become an army cook and his is the most uncomplaining mess in the service.
