or the "Sign" You Money

SUNLIGHT SOAP advertisement featuring an illustration of a woman washing clothes and text describing the soap's benefits.

Its Object Served. "What's the purpose of that fresh bill you've introduced?" "Nothing simpler," replied the Western legislator. "You've read about the bill in the papers, didn't you?"

They Soothe Excited Nerves.—Nervous affections are usually attributable to defective digestion, as the stomach dominates the entire system.

John attended Sunday school, and teacher was enlarging on the advantages of good health over riches. She explained: "Riches count for very little. You can't take money with you when you die. Good health, is the most important thing in life."

How's This? We offer the most famous Remedy for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Ask for Minard's and take no other. Two Could Do It. Basel, Switzerland, was visited some years ago by an adventurous French man whose ruling passion was the ascent of mountains.

A little girl named Mary was noted for her propensity to ask questions. So fixed was the habit that she seldom knew when she was asking questions and life became to her one prolonged interrogation.

"SHEEP DRIP" (not a dip) Destroys all Nits and Lice and does not injure the wool. Kills germs in the hair and on the skin, and is a quick and safe healer.

"CATTLE DRIP" (not a dip) Specially prepared to clean Lice and Vermin from Stall Fed and Breeding Stock. It is safe, septic and healing and valuable as an insecticide to keep off flies.

One Twenty-Five Per Gallon. If your storekeeper does not keep them write Disinfectant Dept.

CARBON OIL WORKS, LTD. WINNIPEG, CANADA. Manufacturers of "COW BRAND" Oil Specialties.

THE RAPACIOUS EEL. He is an Omnivorous Feeder With an Enormous Swallow. Quite apart from the peculiar and mysterious characteristics of eels at their spawning season, there are few more interesting fish than the snake-like eels.

It is wonderful, considering the size of an eel, what an enormous swallow it has. A fish of two or three pounds will easily make away with a bait of a quarter of a pound, and there are authentic particulars of an eel about two and a half pounds which was choked at King's Lynn attempting to swallow a full sized rat.

TWO MAGISTRATES TEST ZAM-BUK. Cures Eczema in Both Cases. Mr. F. Rasmussen, of 211 Marquette Street, Montreal, who is a Justice of the Peace, and a man not inclined to give praise except where it is well due, says: "For many years I was troubled with a very serious eruption of the skin. This was not only unsightly, but very painful, and tried various household remedies, but as these proved altogether useless, I took medical advice. Not one, but several doctors in turn were consulted, but was unable to get any permanent relief. Some time back I determined to give Zam-Buk a trial, and after a thoroughly fair test, I can say I am delighted with this conclusion; and while everything I tried failed absolutely to relieve my trouble, three boxes of Zam-Buk have worked a complete cure. In my opinion this ointment should be given more widely than it is. I am, Sir, J.P. of Weston, King's Co., N. S., says: "I had a patch of eczema on my ankle, which had been there for over twenty years. Sometimes the disease would break out on my shoulders. I had taken solution of arsenic, had applied various ointments, and used every sort of fish. He burrows into their nests and eats ravenously of the newly deposited spawn. In fact, experts declare that pike are not half so destructive to trout water as eels are, for the pike eats mature fish or those that are maturing, whereas the eel takes his fill of the eggs as well as of the perfect fish.

It is wonderful, considering the size of an eel, what an enormous swallow it has. A fish of two or three pounds will easily make away with a bait of a quarter of a pound, and there are authentic particulars of an eel about two and a half pounds which was choked at King's Lynn attempting to swallow a full sized rat.

PEARLS IN AUSTRALIA. FISHING FOR GEMS IS A GROWING INDUSTRY. Shells Rather Than Pearls Are the Source of the Big Fortunes Amassed by Men Who Gather the Jewels Off the Coast of Queensland—Malays and Japanese Do Most of the Diving. Australasian pearl fishers make their fortunes more by the shells they gather than the pearls they find. The Australian pearl is not to be compared with the Oriental; it is too pale and lacks the beautiful sheen, which is a rule of the latter. The Australian shell, on the other hand, is lean and valuable, while the Oriental shell is worthless, or practically so. Australian shells are large and white, while Oriental shells are small and black.

Thursday Island is the great centre of the pearling industry in Australia. This extends over well all round the coast of Queensland, and Dampier Land, on the desolate northwest coast of the continent, is also famous for its trade in this respect. Of course, it is because of the mother-of-pearl lining that the shells are valuable. This iridescent lining is due to the minute undulating of alternate layers of carbonate of lime and membrane. The rough outer coat of the shell is scraped away, and the mother-of-pearl is then cut into various shapes, such as brooches, mirror frames, etc.

John attended Sunday school, and teacher was enlarging on the advantages of good health over riches. She explained: "Riches count for very little. You can't take money with you when you die. Good health, is the most important thing in life."

\$500.00 In Cash PRIZES. As we announced last week, we offer \$500.00 cash in prizes. First, a prize of \$300.00 to the Farmer or Stock Breeder who will send in the best suggestion for a name for our new Farm Weekly; then, as a consolation, 20 cash prizes of \$5.00 each, and 50 cash prizes of \$2.00 each to the 20 and 50 persons sending in the next best suggestions, making seventy-one prizes in all.

The Judges will be: Mr. Wm. Rennie, the well-known Seedsman, and author of "Successful Farming." Mr. Thomas Graham, of Graham Bros., Claremont, well-known Horse Breeders. Mr. J. H. S. Johnstone, editor of the paper.

DESCRIPTION OF PUBLICATION. The new publication will be a large illustrated weekly. The subscription price will be only \$1.00 per year, though it will be made the best farm journal in Canada. It will be edited by Mr. J. H. S. Johnstone, for ten years Associate Editor of "The Breeder's Gazette," Chicago, which is well known as the best Stock Journal in the world. He is also the author of "The Horse Book," which is the recognized authority on horsecraft. It will publish reliable and original information on all subjects of interest to Farmers and Stockbreeders all over Canada. It will cover thoroughly all departments of Stock Breeding and Raising, Grain Cultivation, Poultry, Orchard, Horticulture and Gardening, Soil Development, etc. It will publish accurate weekly reports and statistics of all the leading grain and live stock markets. It will have its own special crop and stock reporting service. It will publish special reports of all important Fairs, Exhibitions, Live Stock Shows and Conventions. It will publish free to its subscribers plans of economical and sanitary homes, barns, outbuildings, etc., specializing on concrete construction. It will have a correspondence department, giving the most reliable information on all subjects of interest to its readers, replies being written by the best recognized experts in the different departments.

CONDITIONS. This generous prize offer is entirely free to subscribers. Every prize winner must be a Farmer, Stock Breeder, Horticulturist, Fruit Grower, or in some way actually interested in Agriculture. Send \$1.00, for which the paper will be sent you for ONE YEAR, and with your \$1.00 send your suggestion for the name of the new publication. Use the Coupon. Every Coupon with a suggested name must be mailed on or before May 22nd, 1906, to be eligible to win a prize. The person who FIRST SUGGESTS the name adopted will win the prize, and priority of suggestion will be given.

CITY OF THE INSANE. Happy and Honored "Guests" of the Inhabitants of Ghel. One of the most remarkable places in Europe, of which no tourist on pleasure or business ever takes notice, says a writer in a Berlin paper, is the "City of the Insane," by which name Ghel, near Antwerp, has been known for generations. About 1,600 men and women afflicted with insanity in all its forms are crowded together in the building, which is known by the name of the "City of the Insane," who know by experience how to treat the unfortunate ones. In the streets, in the places of amusement, the cafes and workshops these patients may be found, and nowhere is there the least suggestion of restraint apparent. The board ranges from 240 to 2,400 marks a year, and no matter how small the amount may be, the patient is always the favored member of the family. He has the first right to the most comfortable chair, and the head of the table belongs to him. He receives the most attention, and it is his duty to appreciate and to endeavor to maintain by living down his illness. Even the dumbest people, the dangerous ones are sent to another settlement and to institutions. It is wonderful how considerate, careful and kind the simple people are toward their charges, and a peasant from the country would probably rather play the part of a madman than to be confined in a lunatic asylum.

END OF THE WORLD. Speculations of Scientists as to How It Will Come About. The terrible catastrophe in Italy which caused the inhabitants of the ill-fated city of Messina to believe that the end of the world had come is only a foretaste on a small scale of what many eminent scientists believe will be the end of the world. That eternal problem of how the world will end is, in the opinion of many, a matter of scientific investigation, and it is curious that the majority believe that the earth will open up and fly to pieces in the most gigantic earthquake ever known, an earthquake that will wipe all life from the globe before the actual destruction of the earth is complete. The late Grant Allen firmly believed that the end of the world would be by the crust of the earth eventually giving way beneath the colossal weight above it. And Abbe Dupin, one of the greatest scientists of France, believes that doomsday will begin with a war that will envelop the greatest nations in Europe, the being followed by plague the like of which has never been known, culminating with an earthquake that will practically shake the world to pieces. Mr. H. G. Wells, whose scientific prophecies are well known, is, however, of a different opinion. The world will end, he declares, by its becoming entirely frozen over. It is a well known fact that every year more ice accumulates around the poles. In short, many millions of tons of ice in excess of that of the year previous settle about the earth's extremities each year, and in Mr. Wells' opinion, this will gradually extend until the whole world is frozen over and every living thing is thus destroyed. Several scientists are of opinion that we shall perish by fire and this old world of ours with us. Nikola Tesla, the great American, is convinced that the atmosphere of the world being so fully charged with electricity, the result will be a gigantic explosion by spontaneous combustion, when the world will be entirely encircled with flame, which in the space of a few seconds will destroy all life. Two of the world's greatest scientists firmly aver that the end of the world will be brought about by astronomical conditions. Take Professor Martenberg, the noted Austrian student. In his opinion the earth will fly from its orbit and come in contact with one of the other planets that give chance to be in a direct line. The earth, being comparatively small, will, of course, get the worst of it and split into fragments at the collision. But of course directly the world would die and such an earthquake take place as would completely put the Italian catastrophe in the shade. Just as interesting is the prognostication of M. Camille Flammarion, one of the greatest living scientists. After many years of study he has arrived at the conclusion that the world will in the twenty-fifth century come across the path of the comet Bella, which crossed our line a few years ago. On this occasion, however, a collision will take place, and Bella being infinitely greater than the earth, a shock may be expected which, he calculates, will be 865 times greater than the shock caused by the collision between two trains, each traveling at sixty-five miles an hour.—Cassell's Journal.

ODE TO A FAT GIRL. HOW vivid to my retrospective eye Come back the night that we first sat alone, And as I heard your sweet responsive sigh I seemed to feel you were my very own. And yet, and yet, I did not dare make love to you, for I was sure you would not love me. How could I put my arms about your waist? I must confess the matter troubled me. Until, divining my most hopeless plight, I saw you saw I could not be so shy. Quite easy so short handed. You were right. And also thoughtful and extremely good in telling me to do the best I could. Indeed, it might have been embarrassing if I had not possessed such common sense. And, quivering like a jelly, felt the sting of pride to think that you were so immense. Instead of this, you made no bones about the interesting fact that you were stout. You, with courageous heart, when I made bold. And asked you if you'd at upon my lap You did not try to do as you were told. (Thus bringing on a terrible mishap.) In lieu of this you shook your head and said: "Nay, dearest. You must sit on mine instead." And so it happens as your billow form I fold within my arms (as best I can) You do not grow impatient, dear, and scorn. Or sit on me because I am a man. But with sweet resignation let me climb Right up and love you little at a time! —Thomas L. Mason in New York Life.

Live and Learn. Among the words given out for analysis recently by a district school teacher in Pennsylvania was "bank-note." The instructor's explanation may be imagined when one male pupil turned in the following unique paper: "Bank-note is a compound, primitive word, composed of 'bank' and 'note.' 'Bank' is a simple word, meaning the side of a stream; 'note' is not a word. 'Bank-note,' to set down by the side of a stream."—Lippincott's.

You Can't Cut Out A BOG SPAIN, FULL OF ABSORBINE. It will clean them off permanently, and you won't have to use it again. It is the best remedy for itching, burning, and sore eyes. It is the best remedy for itching, burning, and sore eyes. It is the best remedy for itching, burning, and sore eyes.

SUNLIGHT AT NIGHT! produced by ALADDIN the WONDERFUL LAMP. COAL OIL—economical—Makes and burns its own gas under mantle. The best of all lamps. It is the best of all lamps. It is the best of all lamps.

The Mantle Lamp Company, Dept. L, 111 Broadway, N. Y. City. Special Notice To The Province. Agents wanted for B. Shrago, 308 Princess St., Winnipeg, to collect all kinds of scrap iron, brass, copper, lead, zinc, old rubber boots and shoes, bottles, rags and bones.
