travelled on to Edmonton, making slight detours enroute to visit Prince Albert and Saskatoon. Edmonton, as the map shows, is the most northerly city in Canada. Already in early city in Canada. Already in early tember the ground at daybreak is white with frost. But the climate is glorious at this season of the year, with air as stimulating as champagne. Edmonton is a great railway centre. as the grain raised here averages above standard weight.

Magnificent roots and vegetables are also grown in this district without fertilisers or artificial watering. Wild hay is plentiful. The district generally built line in about 30 hours. Considering that the line has only recently been opened for passenger traffic and that the road bed has not properly settled, down, the journey is performed in very great comfort.

Take a set of grain raised here averages above standard weight.

Magnificent roots and vegetables are also grown in this district without fertilisers or artificial watering. Wild hay is plentiful. The district generally is parklike, with wide expanses of fertile soil between the wooded tracts, and liberally provided with streams. There is said to be a great future for allaifa, which has been grown at the experimental farm with success. So performed in very great comfort. Canadian Pacific Railway has not yet currants can be grown with the great-completed its track to Edmonton. It est success. It will thus be seen that mede Strathcona, on the opposite conditions are favorable not only for bank of the river and just adjacent growing grain, roots, vegetables to Edmonton, its northern terminus, fruits, but for the raising of all kinds but it is now rapidly extending into of stock as well. It is a mixed farm-
