pleasant and palatable.

DR. WILLIAMS' PINK PILLS GAIN ANOTHER GREAT VICTORY.

the Age.

From the Orangeville Sun. In a cosy little house in Margaret street, in this town, lives Mr. John Garrity, his wife and family. They are indeed a happy family, although a few years ago a sadder house hold would be hard to find. Their happines was not occasioned by the sudden obtaining of a fortune, but by something more precious—the restoration to health of a wife and mother when everyone whispered that she must die. Our reporter heard of Mrs. Garrity's illness and cure, and for the benefit of our readers investigated the case; what he learned is well worth repeating. A few years ago Mr. Garrity kept a well known hotel at by the number and variety of those that are Chelterham and was known far and wide for his kindness and hospitality; his wife, too, was noted for her amiability. How ever, she was stricken with a peculiar sick-ness, her health failed rapidly and from one hundred and forty seven pounds her weight became reduced to ninety five pounds. Faint ing spells became frequent, and a continual pain in the back of her head almost drove her frantic. Physicians were in attendance, but the doctors all said there was no hope. Mrs. Garrity saw death staring her in the face, and the thought of leaving her little children to try Dr. Williams' Pink Pills, but thought they could not possibly do her any good when physicians had failed to alleviate her sufferings. Hoping, however, almost against hope, she procured a supply, and wonderful long when the dreadful symptoms of her illness began to pass away, and to-day she is the picture of health. A few months ago Mr. Garrity and family removed to Orangeville, and in conversation with our represen ative Mrs. Garrity said;-"I cannot find

About Drinking Water

Pinx Pills in the house."

Dr. Williams' Pink Pills have done for me.

Why it is almost miraculous. I wish that everyone who is suffering as I was will hear

of this remedy. We always keep a box of

In the depth of summer, if ever, we are apt to be impressed by the necessity for a pure supply of drinking water. Not only are much larger quantities of water consume in summer, but many impurities in water are fostered by the heat of the season which in winter are sealed up in the icy covering of reservoirs. Frost and snow, nature's own disinfectants, are at work in winter purifying the drinking supply. The worst impurities ard those which only show themselves upon chemical analysis. Water infected with the germs of typhoid fever may be as clear as rystal, and may fail to show by its odor cr taste its dangerous character, while the odorous water of a spring impregnated with sulphur or some ill smelling mineral may be

Filtered cistern water is comparatively wholesome, but it is not always pleasant to the taste or fragrant to the nostrils. Perans who are ignorant of natural science seem a) imagine that a pure water supply contains no animal or vegetable life. Ideally this is the case, but such water never flows from the faucet. It is the result of filtration No one need he seriously shocked by the occasional discovery of perfectly harmless water worms or any of the many water insects such as are found in the purest spring water. We believe a certain amount of vegetable and animal life is necessary to keep water which is stored in reservoirs in sound condiall water that is used for drinking or for cooking purposes. After the water in reseren considerably stirred up by season of rain, there is always more complaint of organism of various kinds coming through the pipes. It is a safe precaution to attach taken. An inexpensive little filter, such as which a teaspoonful of carbolic acid to a galmay be attached to a faucet, is better than lon of this wash has been mingled, applying a large filter, because it can be frequently cleaned out and renewed.

The Minister's Bow.

Not long ago, in a New England town, new minister had been called and settled. In that town was a forsaken old reprobate whom nobody respected or spoke to who could avoid it. He had never been known to go inside a church. He only worked when driven by necessity to do so, and loafed about the town, a common nuisance.

to the town he met the old sinner on the village street, and bowing, spoke a pleasant "Good morning," and passed on his way.
The old man turned and looked after him, and made inquiry of some as to who it might be who showed him such an unaccustom attention. The same thing happened a day or two afterward, and again during the space of a week or two. Some one told the minis-ter that he had made a friend of old ——, and laughingly told him that he was wasting his politeness on that old reprobate, whos acquaintance was not desirable. 'You don't know him," said this person,

" or you wouldn't speak to him at all." "Never mind," said the minister, "it does not cost much to be polite, and no more to an old reprobate than to the 'squire' of the

It was not long till old ---- was noticed creeping into the corner of the church farthest from the pulpit and nearest to the door He had come in late and was the first to leave the church. He came again and again, and was finally brought to Christ, and during the rest of his life he lived a consistent and earnest Christian life. He said the minister's bow was what had started him on the upward path.—Christian Work.

Beauty and Health to Fair Women.

MISS ANNIE PATTERSON, OF SACKVILLE, N. B.,
ONCE THE VICTIM OF NERVOUSNESS AND
GENERAL DEBILITY, TAKES ON THE
HEALTH OF EARLY YEARS.

Some remedies are nothing more than a temporary stimulant, and the reaction aggravates the disease. Where the system has become run down, and nervous debility in its worst forms have shown themselves, South American Nervine will cure. It scrikes at the nerve centres and builds up the system by removing the real cause of trouble. Miss Annie Patterson, of Sackville, N. B., a lady well known in the Martlime Provinces, suffered terribly from indigestion and nervousness, and her case seemed incurable. She accepted South American Nervine without hope that it was any different to other remedies, but her words are, "I had taken only one bottle when my system began to take on the health of earlier years, and after taking three bottles I was completely cured." Sold by S. N. Weare.

—"Every temptation that is resisted, every sinful thought that is repressed, every bitter word that is withheld, adds its little item to the impetus of the great movement which is bearing humanity onward towards a richer life and higher character."

-Boils, pimples and eruptions, scrofula, salt rheum and all other manifestations of impure blood are cured by Hood's Sarsapar-illa.

—The Indian government has instituted proceedings against some of the editors of the native newspapers on charges of inciting the people to disloyalty and sedition.

-Minard's Liniment for Rheumatism

Agricultural.

The American Toad. The toad has been very appropriately amed the "gardener's friend;" and while many gardeners are cognizant of the aid he renders in the extermination of noxious inects, but few are aware of the extent of his oraciousness in this direction. A most ineresting bulletin (No. 46 of the Hatch Experiment Station of the Massachusetts Agriultural College at Amherst, Mass.,) prepar ed by Prfessor A. H. Kirkland, assistant tomologist to the Gypsy Moth committee has just been issued, in which the habits food and economic value of this batrachian are treated upon.

nature of the food of the toad; and an examnation made of the contents of the stomachs of several revealed the fact that though the animal does devour some insects that are useharmful to vegetation, of which the toad also makes a meal. The following summary shows the toad's predilection in the mat

Of injurious insects (1) it feeds on worms snails and sow bugs, common greenhouse pests; (2) it devours a large number of myriapods which damage greenhouse and garden plants; (3) it feeds to some extent on grassoppers and crickets; (4) it destroys large uantities of ants, insects often injurious and sually obnoxious; (5) it consumes a considerable quantity of May beetles, cucumbe eetles, rose chafers "click beetles," potato eetles and weevils, all more or less injurious to crops of various kinds; (6) it feeds on ten caterpillars, gypsy moths and other fruit tree pests, and (7) it is a prime destroyer of cut vorms and army worms, common per which often cause great damage.

To recapitulate, eleven per cent. of the toad's food is composed of insects and spiders beneficial or indirectly helpful to man; eighty per cent. of insects and other animals directly injurious to cultivated crops or in other ways obnoxious to man. Further comment words to expreess my thankfulness for what upon the valuable services of the toad would

seem unnecssary.
In twenty-four hours the toad consume an amount of food equal to that required to fill the stomach four times. A toad feeding at this rate upon the same kinds of food and in the same proportion as in the case cited, would devour in three months of May, June, and July the following quantities of food. 3312 ants, 2208 cut worms, 1840 myriapods, 2208 sow bugs and 368 carabids. Or in other words, in the three months a toad would consume 368 beneficial insects and 9906 injur-

Here and There. A caterpillar pest, supposed to be the gipsy moth, has invaded Delaware and Queens

ounties in New York state. Road dust is reported as an ins a farmer who has used it successfully against the striped cucumber beetles.

The Connecticut legislature has passed a ew cattle disease law. It provides for the appointment of a cattle co shall be a farmer familiar with cattle. The presence of disease is to be determined by physical examination alone—tuberculin being perscribed as a diagnostic agent.

Reports make it appear that the Hudson iver valley is infested with the San Jose scale. Experiments in spraying give results that estify to its efficacy, whether in field, garden, or orchard.

Experiments in sugar beet culture under the direction of the New York state department of agriculture are now well under way. A few handfuls of straw under the tomato vines will keep the fruit off the wet ground

-To clean the chicken house first drenc the floor and roosts with kerosene emulsion, use nearly full strength. In a few hours after this has been applied scrape the roosts, turn out and burn all the straws in the nests a simple filter to the faucets from which the | and have the floors thoroughly cleaned. supplies of drinking and cooking water are Follow this with a coat of whitewash, in thickly to walls, ceiling, floor and nests. This will destroy all vermin and diseas germs of every sort. Every poultry hous should be thus thoroughly purified once of twice a year. In the meantime the droppings should be scraped up and removed every week or two and air-slacked lime be throw in in such quantity as to fill every crack and corner with the pungent dust. It is a good plan also to kerosene the roosts occasionally By this means only can poultry houses b kept perfectly clean and comfortable, not

only for the fowls, but for the caretaker as well.

Turkeys as Grasshopper Foragers. A flock of turkeys may be fattened on corn alone and will become very fat and juicy if fed all they will eat for a few days before they are sent to market. They are great insect hunters and will keep a farm clear of grasshoppers when all other means fail. We have known one man to sell over \$400 worth of turkeys in one season which had been reared principally on grasshoppers on his own and his neighbors' farms. One year when the hoppers were particularly bad the neigh bors were very glad to have half a thousan turkeys run over their meadows and through

A New Stock Food. The "new corn product" is the hard outer lieved of the pith-dried and pulverized. In appearance it is a fine brown substance. The pith is used as packing in warships. A there is a great demand for the pith there is a large quantity of the stalk left. This is cut and ground, making a fine product con taining mere nutriment, according to some authorities, than timothy hay and being more digestible than corn blades. It occupies less space than baled hay and is fed along with

Musty Hay.

Much of the baled hay that comes to market is musty. Most farmers when they bale hay think it need not be very dry, as the packed in them is always sufficient to get up a violent ferment unless the hay is properly dried before it is put into the bale. If there were more care used in baling hay the price for it would be much better than it is, as the hay itself would be better worth it.

-See to it that your cows have access to plenty of good water. If you depend on springs see they they are properly cleaned out. If permanent arrangements for water in pastures and at barns are not sufficient and satisfactory, the present month will be a good time to plan for improvements which you can carry out after haying and harves

-Farmers would make much more off their gardens if they would make a practice of eserving seed in abundance for their own use. Gardens will pay for all the "tinkerin" 'round" they get; and the more of it they get the better will they pay.

Minard's Liniment Cures Garget in Cows.

men should say grace—not only over the Christmas festival but also over the table spread with good books. For man has no truer friends—earth offers no richer banquet. When the poet Southey grew old and dim of vision he was seen to totter into his library. Moving about from shelf to shelf the aged scholar laid his hand upon one favorite book

and then upon another, while a rare sweet smile passed over his face, just as we lay our hand tenderly upon the shoulder of some dear friend. Through their books his old friends, the heroes of the past, had told Southey of their innermost dreams, their passions, their aspirations, what fortified them in hours of battle, how they endured when death robbed them of their best and dearest. Poor and lonely full oft the poet had talked with these volumes as with fam iliar friends. So before he died Southey said to his books "good night," ere in that bright eyond he said "good morning" to

-Well did Charles Lamb suggest that

Terrors of Rheumatism

REMEDY WHICH IS INSTANTANEOUS AND

No subtle or mysterious force could be more miraculous in its effects than is South American Cure in all cases of rheumatism. James A. Anderson, of Calgary, N.-W. T., says that seven or eight years ago he became afflicted with rheumatism, and for three years it made him a cripple, so that he had to use a stick to get about. In his own words: "I suffered untold misery, and though treated by the best physicians in the country, and I spent a term in the hospital, recovery seemed as hopeless as ever. A friend recommended South American Rheumatic Cure. It gave help immediately and after the second bottle I threw away my stick. To-day I am as strong as an athlete." after the second bottle I threw away stick. To day I am as strong as an athi Price 75 cents. Sold by S. N. Weare.

afternoon, little understands the hardships of the plife of the farmer, who starts to work at break of day and frequently works on into the night by lantern light.

A man to endure the hardships of a farmer's life, must be robust physically at the outset, and if he would live a long life, always keep a watchful eye upon his health. He should remember that it is the apparently trifling disorders that eventually make the big discases. It does not do for a hard working man to neglect bilious attacks or spells of indigession. If he does, he will soon find himself flat on his back with malaria or erippled with rheumatism. Dr. Pierce's Golden Medical Discovery is the best of all medicines for hard working men and women. It makes the appetite keen and hearty, the digestion perfect, the liver active, the blood pure and rich with the lifegiving elements of the food, and the merves strong and steady. It builds firm muscles and solid flesh. It is the greatest of all blood-makers and purifiers. It cures malarial troubles and rheumatism. It is an unfailing cure for biliousness and indigestion. An honest dealer will not try to substitute some inferior preparation for the sake of a little additional profit.

"I was a sufferer for four years with malarial fever and chills," writes Robert Williams, of

"I was a sufferer for four years with malaria fewer and chills," writes Robert Williams, of Kiowa, Barber Co, Kan. "Four bottles of Dr Pierce's Golden Medical Discovery cured mand I now weigh 160 pounds instead of 130, m old weight."

old weight."

Costiveness, constipation and torpidity of the liver are surely, speedily and permanently cured by Dr. Pierce's Pleasant Pelets. They are tiny, sugar-coated granules. One little "Pellet" is a gentle laxative, and two a mild egathartic. They never gripe. They stimulate and strengthen the jaded organs until a regular habit is formed and may then be discontinued without a return of the trouble. They stimulate, invigorate and regulate the stomach, liver and bowels. Medicine stores sell them, and have no other pills that are "just as good."

SPRUCE AND PINE LUMBER.

What the Father May Do for His Daughte "Women rarely ever turn their faces to ard knowledge till they turn their backs on the fashion plate," is remarked in a recent number of a housekeeper's paper. That statement is rather a putting of the cart before the horse. Did any one ever see a wo-man shake herself free from the thraidom of "fashion" until she had first had a large glimpse of the greater beauties of knowledge? Let us apply the kindergarten principles in our dealings men and women. Never say "Don't" when you can say "Do." Don't try to knock down a stone wall by running

You wish your wife could be persua not to put corsets on your bright young daughter. Well, she won't if you choose to out general her. Make a chum of your girl; take her to the gymnasium, and get her into your confidence and get the prettiest uniform you can get made. Give her a chance to feel how good and perfect freedom of body is. Get her moccasins that fit her feet, long enough to give perfect freedom, and fitting closely around the foot. Take her snowshoeing, tobogganing, skating, on condition that she dresses so that a sharp run will not cause her heart to beat faster than it should. If she is older send her to a Delsarte class. One hour a week under the influence of a graceful woman, who has thorough control of every part of her body, will do her more good than years of invective. Let her see with her own eyes how much more beautiful is a woman with a twenty five inch waist clear skin, rosy cheeks, and red lips, with her whole frame full of life, than one with

of starch after boiling water has been added to

All this is positively harmless in its effect upon clothing fabrics and those who wear them. It was shown at this convention by experiments that muslins and tarletans, the most inflammable goods, when treated by this process, could not be made to burn with ing, especially those of children, could be treated in this way, a great number of lives would be saved and much suffering prevent-

ed every year." Value of the Egg in Sickness.

drink." The value of egg albumen as food in certain diseased conditions is pointed out by Dr. C. E. Boynton. When fever is present an appetite is pil, he says, when we want an poisonous coffee. If you'd only take a little asceptic article or diet, the white of an egg, raw, serves both as food and medicine. The way to give it is to drain off the albumen from an opening about half an inch in diameter at the small end of the egg, the yoke this mode of feeding materially helps us in Newlight is taking most of his meals down carrying out an antiseptic plan of treatment. town at present. ermore, the albumen to a certain extent may antidote the toxines of the diseas Patients may at first rebel at the idea of eating a "raw" egg, but the quickness with

it to be less disagreeable than they supposed, and they are very ready to take a second dose.

Train Our Home Makers. They have in Brussels a free housekeeping school. In this one hundred girls are trained very year. There are ten classes of ten girls each, and each class attends one week at a time four weeks in the year. They are aught to market, cook and sew. Such schools are almost unknown here. "Why," asks the Golden Rule, "should they not be ommon. The basis of our nation, we often say, is the home, but we permit our home makers, so far as the state is concerned, to go to their difficult task totally unprepared for it. In hundreds of thousands of cases, waste and want, cheerless homes, tawdry clothes, and poorly nourished families are the results. Bricks cannot be made without

for home making." Graceful Women.

A woman is expected to be graceful whether she is or not, and as the matter largely rests with her she certainly should train her feet to follow graceful fashions. An erect, self reliant spinal column-not stiff, but straight—is absolutely essential to a graceful, rhythmical walk, and the feet should be carefully and lightly placed. Do not protrude the chin; that always looks stiff and awkward. Do not bend the knees any more than you can help in walking, and let the forward swing of the body come from the hips. Think when you walk and it will be a great help to you. Never wander or saunter aimlessly about, but walk with a purpose and a motive

-The juice of cucumbers has from time immemorial had the reputation of being ex-cellent for the complexion. A good way of preparing it for use is to peel the cucumber cut it in thin slices and put them in a glass bottle, covering them with alcohol of the best quality. The bottle should be closed hermetically and exposed to the sun for three days. The liquid is then to be strained in closely stopped vials. It will keep indefinitely and is to be applied to the tace undiluted morning and night after the

and observe the effect upon your movement

-How little we realize the absolute value of a sympathetic confidante, one who listens to our troubles and in gentle accents of interest gives us just that sort of comfort that our heart craves. The woman who has a mother possesses the sweetest, truest and best confidante in the world. She is always sympathetic and always honest. The welfare of her daughter lies close to her hear and whatever advice she may give can always be relied upon for its unselfish characteristics, its never-failing loyalty to her child.

-Any one, who has been confined to the bod for even a single day, appreciates and deprecates the ache of shoulders and back that makes itself manifest by night. The most restful thing in such circumstances is the course followed in the hospitals—a gentle rubbing with alcohol and the bare hand. This treatment will be found efficacious in the case of babies and little children whom the heat of the day has made restless and

Joker's Carner.

We quarrelled for that I refused to kill A bold mosquito that had ta'en his fill Upon her soft and lucious cheek, for I No reason saw why he, poor chap, she die

And then, alas, that insect bold came back, And on her cheek renewed his vile attack, And I—O heedless wight—all hope did wreek: I whacked so hard I nearly broke her neck! -From Harper's Bazaar

MRS. NEWLIGHT MAKES A SERIES OF "It's just awful how criminally igr I've been regarding our food," said Mrs. Newlight to her husband the other day. 'I can never be thankful enough that] joined Professor Scarem's class in domestic science. My! It's a wonder we're not all dead, ignorant as I've been. There's one thing sure, George Newlight-there'll be no more tomatoes on my table."

" Why?" "Because Professor Scarem explained to us to-day, how tomatoes cause a marked arres of vital activity in those who eat them, and he proved that the acid of tomatoes acts almost like a poison on the membrane of the stomach. Then I'm done with any berries that have seeds in them on my table. "I'd like to know why?"

"You wouldn't ask if you'd heard the professor's talk on appendicitis and its cause.

A single dish of raspberries or strawberries may bring on that awful trouble. It's fear ful to think of the risks people will run just to gratify the palate. And here we've allowed our children to have sugar and cre on their oatmeal!" "What of it?" "Well, you'd say 'What of it?' if you

could hear the professor explain how the combination of oatmeal and cream and sugar auses dreadful gases to arise in the stomach and utterly retards digestion. I've not the slightest doubt that the awful spasm our little Mamie had last year was due entirely to this cause. Then there's bananas. Why, George Newlight, they're simply rank poison! And you'll get no more white bread at my "Why not?"

"Because there's no more nutrition in i than there would be in bread made out of pure starch. Every bit of the nutritive element has been refined out of it. It maker those who eat it thin-blooded."

"Do I look thin-blooded or as if I lacked nutrition?" asked Newlight, who weighs 199. "That doesn't signify. You don't know what day you'll begin to break down under such bread. We'll have nothing but graham or whole wheat flour hereafter. And I've done with coffee too. If you could see and hear Professor Scarem demonstrate just how poisonous it is to the whole human system, you'd shun it as you shun opium. He says that cocoa shells is the only real safe warn

"I'd as soon drink dishwater," said New "You'd better drink dishwater than your

time to study domestic science and look into this food business a little, it would be a good thing for your health and the health of your family. There's a lot more things been jeopardizing our lives by eating a our criminal ignorance, and I'm going to out all And she did, which is the reason that

Little Clarence (with a rising inflection)-Pa, you know-Mr. Callipers (trying to read) -No I don't.

"Don't what pa?"
"Don't know the answer to whatever question you are about to ask." "Why, you don't know what I am going to ask, do you, pa?" "No, of course not." "Then how do you know you don't know

what it is?"

don't know, and "-

"I don't know what it is that I don't know but all the same I know I don't know what "But, pa, if you don't know what it is that you don't know, how do you know you don't know. If you don't know, it seems to me that you don't know whatever you know or

"I know I don't know simply because I

know I don't know the answers to any of the outlandish questions that your peculiar nquisitiveness is forever prompting you to straw, or wise homes without wise training "Oh, well, ask your question and be done

with it. What is it that you want to know."
"Why I—I don't know. You've made me forget it.

One of the district school trustees was a crank on the subject of fire, and when he called around with the examination board he always confined his remarks to a question addressed to the pupils as to what they would do in case the building should catch

The teacher was acquainted with his hobby,

so she prompted her scholars as to the answer they should give when he arose to profound When the board called, however, this particular trustee, perhaps from a desire to emulate his associates in their addresses, rose emulate his associates in their addresses, rose and said:

"You girls and boys have paid such nice attention to Mr. Jones' remarks, I wonder what you would do if I were to make you a little speech?"

Quick as a thought a hundred voices piped in unison:

a unison:
"Form in line and march down stairs," He was a thin, fragile, young preacher, but not half so helpless as he looked. He could see and hear what was going on, even during the last prayer. Just before the veclosing exercise, he said calmly, but with a good deal of impressiveness to the square inch: "Those of the congregation who did not get their things all on during the prayer, can do so while I pronounce the benediction."

During which, however, the audience could hear each other's watches tick.

Lady Visitor—And are you fond of flowers, my good woman?
The Good Woman—Flowers, is it? Well, The Good Woman—Flowers, is it? Well, I am that, mem.

Lady Visitor—Now, what kind of flowers shall I bring you next time I come?

The Good Woman—If it be no inconvenience, I wouldn't mind some cabbage and

—The Bangor drummer who recently saw a woman enter the train at North Bucksport and rush through the car just as it was gatting speedy, coolly walked after her and just before the fatal leap, grasped her firmly to his manly bosom. She struggled, but he only tightened his grip, saying, "Madam, you shan't jump off the car and kill yourself!" When she got her breath and shrieked, "You big f.-l, I was only going out he platform to wave my handkerchief titleds," the would-be hero was, well he got off at the next stop.
