ESTABLISHED
1893

Canadian Engineer

SUBSCRIPTION RATE—\$3 a year; \$1.75 six months; \$1 three months; postpaid anywhere.

Issued in the interests of Canadian Civil Engineers & Contractors

This field includes chiefly the men who are engaged in municipal, railroad, hydraulic, structural, highway and consulting engineering surveying; mine-management; contracting; and waterworks superintendence.

Toronto, August 2, 1917

CONTENTS

Vol. 33—No. 5

Completion of the Toronto-Hamilton Highway 85

ILLUSTRATED.—Last five miles now being laid. Concrete base for old Dolorway road torn up with steam shovel. Wider and stiffer pre-moulded joints have proven advisable. BY HARRY STEWART VAN SCOYOC, C.E., Chief Engineer, Toronto-Hamilton Highway Commission.

The Canadian Engineer, Aug. 2, 1917 6 cols.

Some Suggestions for Improvements in the Engineering Profession 88

The profession must be improved from within, not from without, says F. G. JONAH, Chief Engineer of the St. L. & S.F. Ry.

The Canadian Engineer, Aug. 2, 1917 4½ cols.

A Crib and Embankment Cofferdam Costing \$86,290 90

ILLUSTRATED.—United States Government cofferdam for the six million-dollar locks at Sault Ste. Marie, Mich., encloses an area of 22½ acres. Abstract of paper by W. J. GRAVES in "Professional Memoirs."

The Canadian Engineer, Aug. 2, 1917 6 cols.

Good Roads Organization 93

A plea for central control of highway work as a department of the government, co-operating with provincial commissions. Suggested classification of roads. BY JAS. J. MACKAY, O.L.S.

The Canadian Engineer, Aug. 2, 1917 2 cols.

Surveyors' Charges 94

In 1865 the surveyors in Ontario charged \$4 a day and made attractive offers, while schedule of present charges calls for \$20 a day. Discussion by T. D. LEMAY at annual meeting of the Association of Ontario Land Surveyors.

The Canadian Engineer, Aug. 2, 1917 2 cols.

A Few Thoughts on Geodesy 95

Conclusion of article from last week's issue. Work done by the Geodetic Survey. A source of error in triangulation systems. BY J. L. RANNIE, D.T.S. *The Canadian Engineer*, Aug. 2, 1917 4 cols.

Tests of Concrete Slabs to Determine the Effect of Removing Excess Water Used in Mixing 97

ILLUSTRATED.—Paper read before the American Society for Testing Materials by A. N. JOHNSON. *The Canadian Engineer*, Aug. 2, 1917 3 cols.

The Treasury Department Standard for Drinking Water—Its Value and Enforcement 98

Not a standard of purity but a standard of permissible impurities. Of immeasurable value as a criterion for judging supplies. BY H. P. LETTON. *The Canadian Engineer*, Aug. 2, 1917 3 cols.

Metering Accessories of Manitoba's Hydrometric Survey 100

ILLUSTRATED.—Description of devices used in gathering stream flow data. Cable for suspending meter. Counting device for use with reels.

The Canadian Engineer, Aug. 2, 1917 1½ cols.

Side Forms for Concrete Roads 101

Method of supporting side forms to grade and details of wooden form construction. BY J. H. ANDERSON.

The Canadian Engineer, Aug. 2, 1917 1½ cols.

Editorials 103

Privy Council and the Hydro.
The Claim of the Engineer.
