

cattle and to catch the drainage from the manure. The rubbish of the farm is composted with the weeds, pomace, etc., to which are added lime and marl.

The tank-liquid is sprinkled from a cask, and the effect, according to the manager, is immediate.

ROTATION.

1. Hood-crops with dung; 2. wheat; 3. oats; 4, 5, 6, 7, lucerne. Modifications of this rotation occur in parts of the farm, i. e., clover takes the place of lucerne, and wheat follows. The cattle-droppings are knocked about in the pastures. After wheat, a bastard fallow is made.

There is only one small silo; for experiment purposes. Superphosphates are mixed with the farmyard dung. When the pastures become old, they are harrowed with a light harrow, and if needed, a small quantity of clover is sown on them, and this treatment never fails to produce a thick, close bottom, especially on low, damp land, as part of this farm was. We also admired a troop of Anglo-Norman brood mares, the progeny of which are very fine indeed; some of them won prizes at the last competition.

In our opinion, such horses as these, with their gay carriage, high and powerful build, are the finest stamp of coach-horse.

We saw a fact worthy of remark, above all by market-gardeners — the effect of electricity on the ripening of vegetables. In a field of potatoes, all planted the same day, were set, in a regular circle, a certain number of posts, at a regular distance apart, and from each of these posts started a wire, under ground, that electrified the whole circuit. The spot thus electrified bore, very clearly, a different look from the rest of the field; the stalks of the plants showed that the crop was getting ripe, while the others were quite green.

Canada Is Sharply After Export Trade in dairy products, making more of a success in cheese than in butter. In the last named Denmark and other dairy countries are, sharp competitors of all America. Canadian exports of butter were 10,500,000 lbs in '68 and only 5,500,000 lbs in '94, a loss of nearly a half, yet the decline in price was only 30 per cent, pointing to improvement in quality of goods shipped. Cheese exports in '68 were 6,142,000 lbs and in '94 nearly 155 000 000 lbs.

"WINDSOR" DAIRY SALT is Purest and Best for Butter making. Mrs. Marvin Burke, of Bowmanville, uses nothing but WINDSOR SALT, and has taken a gold medal and 26 first prizes as follows: — Industrial Exhibition, Toronto (2); Quebec Provincial, Montreal (1); Central Canada, Ottawa (gold medal on 12 highest awards); Whitby (4); Bowmanville (3); Orono (3); Markham (4); Stouffville (3); Woodbridge (4). Grocers should remember this fact when ordering Dairy Salt from any wholesale house. Put up fifteen 20 lb. bags per barrel; in 50 lb. and 200 lb. white duck sacks, and in paper lined barrels, 280 lbs net.

PLANTING A GARDEN

without the aid of the PLANET JR. tools, is like cutting an acre of grass with a sickle. With them you can almost do three days' work in one. They do nearly everything but think. The new Hill Dropping Seed Drill is an example of the perfect ingenuity of the PLANET JR. tools. Opens the furrow, drops the seed—in hills or drills, covers, and marks the next row. The PLANET JR. book illustrates and explains all the PLANET JR. Farm and Garden Tools. "I will pay you to get and read it." Mailed free. S. L. ALLEN & CO., 1107 Market St., PHILADELPHIA. 1-96 58
