THE D. A. JONES CO., Ld., BEETON, ONT

We are the owners of the patent on this hive in Canada, and we are in a position to make and sell the hive gotten up in any shape to suit the purchaser—either in flat or nailed up.

A complete working hive consists of bottomstand, bottom-board, entrance-blocks, two broodcases, one honey-board, two surplus cases (in good seasons we often use three surplus cases on the hive at one time) and cover. So that if you order these hives in the flat this is just what will be sent you.

Sample hives we make with the broodframes wired and the surplus cases supplied with fifty-six 4½ x 4½ 7 to the foot sections. These are designed for testing the complete

working hive.

In quoting prices of brood-cases and sur-plus cases, the set-screws, brood-frames and wide frames with their tin separators are always included, both in flat and made . We quote the prices of sample hives made up, and of the various parts made up, so that should there be any portions of the hive you do not wish you can easily ascertain what deductions to make.

PRICES OF PARTS.

PRICES OF PARTS.	de up	fist.
Bottom stand.	12	11
