## Manitoba Wheat Stocks.

There were 1,437,000 bushels of wheat in store at Fort William on Sept. 30, compared with 325,000 bushels a year ago. Receipts for the week were 723,000 bushels and shipments were 368,000 bushels; 67,801 bushels were in store at Port Arthur. Stocks of wheat at Fort William, Port Arthur, Keewatin, Winnipeg and interior country points were estimated approximately at 3,810,000 bushels, compared with about 1,875,000 bushels a year ago.

## Grain and Milling Notes.

\$5,000 has been voted by the citizens of Qu'Appelle, Assa., for the repair of their flour mill.

The Grenfell Milling company has completed the erection of an elevator at Summerberry, Assa.

Instead of a ten cent grain rate as some thought would be the case this fall over the Great Lakes, predictions are now freely made of a three to four cent rate which indicates an easier tendency.

Wheat in store at elevators along Canadian Pacific railway lines west of Winnipeg for the week ending Sept. 30 amounted to nearly two and a half million bushels. About five and a half million bushels of this year's wheat crop had passed into the elevators on Canadian Pacific railway lines up to that date.

A. E. Burch & Co. have opened an office in the McIntyre block, Winnipeg, and will do a general grain commission business and also a grain and stock brokerage business. Mr. Burch was connected last year with the firm of Logan and Burch, grain dealers, Winnipeg. The firm will have private wire connections with leading markets.

The Lake of the Woods Milling company have received from their representative at Vancouver a sheaf containing several varieties of well-matured, good colored and plump grain, grown in the vicinity of Dawson City. All the grain was sown on May 22nd, and the latest cut on August 23rd, and the earliest on August 14th. There are samples of white and red fye wheat, the former of which would grade, according to the Manitoba standards, No. 1 northern and the latter No. 1 hard. Oats of good quality were also shown and six-rowed barley. The oats were cut on August 14th and the barley on August 17th. That the Klonayke district can produce well-matured grain not many people will be ready to believe but the receipt of these samples is proof that the country has at least a measure of capability of that kind.
