

# Tobacco

Is an important part of every general merchant and grocer's business, hence it is important that a good profit should be made on these lines.

Merchants can make big money selling the London Tobacco Co.'s goods, and at the same time give their customers the finest tobaccos in the market.

WINNIPEG

A reduction in ocean marine insurance has recently been made from the port of Quebec but it is stated that this is not a disincentive against Montreal as if the merchant-line shipped from Quebec passes Montreal by water the insurance on it between the two points will be quite equal to the reduction from Quebec on the steamship outward bound, and the reverse. If the stuff goes by train there will be the extra railway freight to more

than equal the reduction in insurance. A preliminary meeting of labor men was held in Pittsburgh recently to formulate plans for a national convention, at which representatives of various labor organizations in the country will meet in Chicago about July 1, to consolidate all the labor unions into one organization of 2,000,000 men. The primary object of this movement is said to be to form a defensive alliance against the steel trust.

E. C. Peixotto's article "Paris Types," in the May Cosmopolitan, charmingly illustrated by the author, will interest those whose wish to see Paris has never been gratified, and at the same time arouse the pleasant recollections of former visitors. The fiction includes stories of love adventure and humor by such well known writers as Julian Hawthorne, Hayden Carruth, Egerton Castle, and H. G. Wells.

C. P. R. land sales for April, 1901, were 48,874.13 acres, for \$152,143.50. For the corresponding month of last year the sales were 58,457.60 acres for \$181,773.78. Though this shows a decrease for the month the aggregate is made up in the four months of this year. The sales from January up to date for the present year were 145,719.29 acres, for \$452,760.29. For the previous year up to April 1, the sales were 144,739.66 acres, for \$450,000.

A Connecticut man has invented a clock which shows the time as it is marked on a cyclometer. Instead of observing the position of the hands on a dial you simply read the figures 7.26; presently the hands out and is replaced by a 7.10 for minutes more the 2 gives place to a 3. In another half hour the place to 5. It is explained that the system has special advantages over power clocks, and that the time may be read at a much greater speed than by the old plan.
