

The following resolution was then presented and adopted unanimously :—

It must be apparent that it will require time and education to comply with even reasonable safeguards, and it is equally evident that the number of dairy farms now in a position to live up to sanitary requirements, will supply but a small proportion of the population of the city. Until this can be accomplished the Commission strongly recommends that all milk not officially certified be pasteurized.

A vote of thanks was tendered Mr. John Ross Robertson for his address as well as for his offer to send two or three members of the Commission to New York, at his expense, to investigate the subject of pasteurization.

### SIGNS OF LONG LIFE.

"Bacon took a deep interest in longevity and its earmarks," said a physician, "and Bacon's signs of long life and of short life are as true to-day as they ever were.

"You won't live long, Bacon pointed out, if you have soft, fine hair, a fine skin, quick growth, large head, early corpulence, short neck, small mouth, brittle and separated teeth and fat ears.

"Your life, barring accidents, will be very lengthy if you have slow growth, coarse hair, a rough skin, deep wrinkles in the forehead, firm flesh, large mouth, wide nostrils, strong teeth set close together, and a hard gristly ear.—*Minneapolis Journal*.
