

No. VI. CAPE YORK, Lancaster Sound (Lat. $73^{\circ} 50' N.$; Long. $87^{\circ} W.$)

A specimen of the same fossil coral which I have named, doubtfully, from Beechey Island, as *Favosites* or *Calamopora Gothlandica*; it is not impossible, however, that it is not a *Calamopora* at all, but a species of *Chastetes*.

No. VII. POSSESSION BAY; South entrance into Lancaster Sound (Lat. $73^{\circ} 30' N.$; Long. $77^{\circ} 20' W.$)

Specimens of brown earthy limestone, with a fetid smell when struck with a hammer; resembles closely the limestone of Cape York, Lancaster Sound.

No. VIII. DEPOT BAY, Bellot's Straits (Lat. $72^{\circ} N.$; Long. $94^{\circ} W.$)

1. *Maclurea* sp.
2. *Cyathophyllum helianthoides* (Goldfuss).

The limestone of this locality is white and saccharoid, with large rhombohedral crystals of calc spar.

* No. IX. CAPE FARRAND, East side of Boothia (Lat. $71^{\circ} 38'$; Long. $93^{\circ} 35' W.$)

1. *Atrypa phoca* (Salter). Sutherland; Pl. V. Fig. 3.
2. *Loxonema Rossi*. Journ. R. D. S., Vol. I. Pl. V.
3. *Atrypa* (ribbed sp.)
4. *Calamopora Gothlandica* (Goldfuss).
5. *Cyrtoceras* sp.

The rock at this locality is grey mud limestone.

No. X. WEST SHORE OF BOOTHIA (Lat. 70° to $71^{\circ} N.$), containing the Magnetic Pole.

1. *Atrypa phoca* (Salter).
2. *Loxonema Rossi*. Journ. R. D. S., Vol. I. Pl. V.
3. *Favistella Franklani* (Salter). Journ. R. D. S., Vol. I. Pl. XI.
4. *Loxonema Salteri*. Sutherland; Pl. V. Fig. 18.

The cream-colored chalky limestone found on the west side of Prince of Wales' Island here occurs, and is generally destitute of fossils, like that of Prince of Wales' Land.

† No. XI. FURY POINT (Lat. $72^{\circ} 50' N.$; Long. $92^{\circ} W.$)

1. *Cromus Arcticus*. Journ. R. D. S., Vol. I. Pl. VI.
2. *Maclurea* sp.

* Collected by Dr. Walker, surgeon to the 'Fox' Expedition.

† Collected by Dr. Walker, surgeon to the 'Fox' Expedition.
