the name of a street car route in Toronto. For instance there was "Chuych Street" with a debit on the left hand side and a credit on the right. "Bloor and McCaul" the same—and so on over the entire system. Evidently when the owner of this book paid a fare he charged it up against the car line he patronized, and whenever he saved a fare he credited himself with five cents.

At first glance it might appear that the owner of this account book was in the habit of dodging the conductor's box, but this was not the case. The fact is the fares were saved by riding a bicycle instead of paying the street car company for comings and goings and the fares were contributed on rainy days when the wheeling was unpleasant. On August 6th, 1905, he made an entry against "Bloor and McCaul" as follows: "One fare—last of quarter's worth of tickets bought June 2nd." The total of fares unpaid amounted to worth of tickets bought June 2nd."
The total of fares unpaid amounted to nearly thirty dollars in seven months.
