

## BIG CORPS OF RANGERS

Will be Sent by the Ontario Government

## TO WAHNAPIAEE DISTRICT

To Make an Inspection of the Mines and Timber There.

This is in answer to a petition from the Suburban Council-Ontario Coal Burning in a Store in Toronto-What the London (Eng.) Mining Journal Thinks of Many River and Lake of the Woods - British Columbia Mining Laws Criticized in England-General Mining News.

The Mayor and Council of the Town of Sudbury have petitioned the Ontario Government for a grant of \$2000 to complete the road from their town to the Wahnapitae gold fields. As the town itself has made considerable sum on the road, the Commissioner of Crown Lands decided to send a corps of rangers to inspect the timber and mines in the district.

## SUDBURY COAL

It Bars Satisfactorily in a Store at Camp.

It appears that Capt. Currie has the laugh on the geologists concerning the burning properties of Algoma coal, for yesterday the front office of Campbell, Currie & Co. on Yonge street, was warmed from a Gurney Countess house in which Ontario coal burned steadily all day long, and the announcement in yesterday's World that the coal would be used in the new power house, was generally satisfied that it is coal all right, and coal that will burn, too.

Capt. Currie states that this coal from the surface, the same as examined by geologists, and for a few days it has burned in the power house, and that the people may see and be convinced.

The railroad that arrived on Saturday night has been distributed liberally among those interested in the mine. Capt. Currie states that this coal from the surface, the same as examined by geologists, and for a few days it has burned in the power house, and that the people may see and be convinced.

## THE GOLDEN CACHE

A Wonderfully Rich Free Milling Proposition Near Lillooet.

One of British Columbia's really great prospects, the Golden Cache mine, was only discovered and located last spring, and is situated about 13 miles up Cayuse Creek from the town of Lillooet, on the Fraser River.

In its turn, it is 60 miles from Ashcroft, on the main line of the C. P. R. The holdings of the Golden Cache mine, which is a Vancouver concern, consist of five claims. The Golden Cache itself is the most valuable, as well as the most interesting, of these properties.

The company owning the property has decided on a comprehensive scheme of development. A crosscut tunnel, about 300 feet long, will be the outcrop of the vein. This will give a depth on the dip of the vein of 500 feet. Unravelled every 10 or 100 feet to the ledge will enable slopes to be opened as fast as the tunnel is driven ahead. A tramway will be built from the mouth of the tunnel to the mill site on the creek, and a 10-stamp mill will be erected at once.

Stock in the company was originally put on the market at \$100 a share, selling at 100 and 125 per cent, premium. It is quoted at \$2 to \$2.25 per share. Messrs. Goodenough, and Hastings have about \$50,000 invested in the company.

For a Mill Test.

Rail Portage, Dec. 21.—Operations will be commenced right away on the Cronyn property, lately acquired by an English syndicate. The property is located near the Scramble mine. Something under 30 tons of ore will be brought from Cronyn for the purpose of obtaining a mill test of this rich property at the local reduction works. At present it looks as if this was to become one of the richest things in the district.

A News from Atsawarath.

Atsawarath, B. C., Dec. 21.—This town is expecting great activity during the coming year. The opening of a new camp, which is reported very rich, and the extensive development of a large number of the property, are the two causes for this expected impetus to the mining business and of the influx of miners.

Are Collecting Mania.

The ore gathering craze is gaining momentum in Spokane, and bids fair to exceed in amount of importance the mania for collecting coins or postage stamps so prevalent a few years ago. At all events this mania will have more intrinsic value to the collector, as every piece of ore put carefully away has some value. The collection of the property of Mr. W. J. Harris, is said to be worth thousands of dollars.

Good Reports from Canada.

The Belleville Intelligencer says: Mr. James Tulloch, on his return last Saturday, reported having discovered silver in the Township of Chando and Lake. He has secured nearly all the lands surrounding the Chando Copper Co.'s property, and shows some elegant samples of copper. He says he is satisfied that this is as good a mining country as is to be found on the continent, and he has had considerable experience in that line.

The Big Slide Mine.

The Kelley Creek Gold Mining and Milling Company of British Columbia, (limited) have taken over the Big Slide mine in the Lillooet district and issued a handsome prospectus. The capital stock is \$1,000,000 divided into shares of the par value of \$1 each, all stock fully paid up and non-assessable, and the first issue of 100,000 shares development stock is offered to the public at 15 cents in blocks of not less than 100 shares.

Victory-Triumph.

Mr. D. B. Bogie Talks About the New Find in the Rosland District.

A representative of The World interviewed Mr. D. B. Bogie at the Queen's yesterday on the Victory-Triumph, a new company he is bringing out. Mr. Bogie is one of the pioneers of West Kootenay, and his reputation as a conservative and prudent mining man stands high.

"I suppose you are interested in a number of mining properties in West Kootenay," Mr. Bogie said.

"Yes, I have been in that country a number of years, and have acquired a number of large number of interests there."

"I understand you are prominently engaged in the Victory-Triumph Gold Mining Company."

"Yes, I secured the property, and organized the company."

"You have a good name, anyway."

"The name is a pure accident. It happened to be the name of the two mining claims purchased by the company. But I think the property will get the name. When I first saw it I made up my mind that it was the best thing anywhere in the district that I knew of, and endeavored to secure it. I was able finally to get it, although I paid a big price for it, and, however, than the showing justified."

"I suppose you have come down here to get capital to put into it?"

"Yes, but the promoters of the company, being busy with the property, have spent quite a little money in development already, and are still at work opening up the property."

"Has the property improved under development?"

"To this extent, that while we had

## RED EAGLE 7?
