PEASANT CLASS IN BULGARIA PROSPER

Politically and Industrially These Farmers Are Formidable Factor.

HAVE STRONG LEADER
Professional Politicians and "Intellectuals" Are Thrown Into Discard.

Sofia, Bulgaria, Oct. 31.—(By Mail.)—Probably no other European country offers a more striking example of the rule of the peasants or farmers than Bulgaria. Politically and industrially they are today the most powerful factors in the life of the nation. They enjoy a majority representation in the government, and the whole future of the country may be said to rest in their hands. Of the present cabinet of seven members, six are peasants, including M. Stambulsky, the prime minister.

In the Bulgarian parliament there are 110 deputies who are "men of the soil." They call themselves the Agrarian party. The next strongest political group comprises less than 40 members. Not only do the peasants control the government, but the whole economic structure of the country has its basis in their toil. For Bulgaria is an agricultural country. There is little manufacturing industry or shipping. While the peasants are in power there is little danger of the ascendancy of bolshevism, for each inhabitant owns his own land and is content with what he has.

As the peasants have come into control, the professional politicians have passed out. The so-called intellectual classes have had their way, and the population is content to give the peasants a chance. They are doing well. They have taken hold of the country at the most critical, economic and financial period in its history and are making wonderful strides toward bringing the kingdom back to normal. Old-time politicians and statesmen are viewing the scene with amazement, if not with admiration.

Peasants Wisely Led.
Led by their powerful leader, M. Stambulsky, who is a man of great wisdom and practical common sense, the peasants are introducing many reforms and innovations in the government. Perhaps the most novel scheme they have is the so-called labor army, whose ranks include every able-bodied inhabitant of the country. The underlying principle of it is that every man above 20 and every woman above 18 shall contribute his or her proportionate share of labor to the reconstruction, development and improvement of the country. One group of workers, for example, give a certain part of their time to the building of railways,

TYPHOID MENACE IN EUROPE GRAVE

Situation in Poland Calls for Outside Aid, Says Col. Gilchrist.

AFTERMATH OF WAR
Measures of Protection Against Infested Regions of Russia Neglected.

Warsaw, Oct. 31.—(By Mail.)—Poland is in far worse condition from typhus fever dangers than ever in her history, says a report by Colonel Harry L. Gilchrist, commander of the American Polish Relief Expedition, which has been co-operating with the Polish government more than a year in an effort to wipe out the disease. "Unless outside aid is forthcoming at once," says the report, "suffering will be intense during the approaching winter and all Europe will be threatened with a terrible typhus fever epidemic."

Increased danger from the spread of typhus fever has been brought about by the Polish-Russian war, which has destroyed all eastern defenses against the infested regions of Russia as the armies have pushed each other back and forth across the disputed districts.

Regarding the Bolshevik activities in August, which threatened Warsaw for days, and their effect upon the

PHONE RATES CASE HERE ON THURSDAY

Bell Application Before the Board at Hamilton on Wednesday.

From The Sunday World.
Ottawa, Oct. 30.—The board of railway commissioners have issued notices of the hearing of the Bell Telephone Company's application for an increase in tolls. The Hamilton hearing will open at 10 o'clock on Nov. 4; Toronto, Nov. 5; and Montreal on Nov. 10.

The application of the National Dairy Council of Canada, for an order directing a reduction of 10 cents on ice cream and five cents on returned empties shipped by express respectively from and to points where wagon service is provided by express companies, whenever the said service is not furnished or required, necessitating cartage by the shipper and receiver respectively, will be heard by the railway commission here on Wednesday next.

The National Dairy Council is also applying on behalf of ice cream manufacturers for reconsideration of the board's order refusing a reduction in the classification of ice cream from first class to second class express rates.

TORONTO NURSE NAMED FOR BINGHAMPTON POST

Border Blockade Forestalled by C.T.R.—Bridgeburg No Gainer.

From The Sunday World.
Bridgeburg, Oct. 30.—Bridgeburg, despite the fact that tons of hard coal is passing thru this frontier terminal every day, is facing an intense shortage of hard coal. The dealers are now delivering coal in two-ton lots only, and there seems to be little prospect of conditions improving in the very near future.

Fort Erie this year is dependent on Bridgeburg, being unable to draw from Buffalo as in former years, for the Americans are watching closely their own supply of coal, and jealously regard any wagons bringing coal over the ferry into Canada. Buffalo is on even shorter coal rations than is Bridgeburg.

The Grand Trunk Railway apparently does not intend to allow previous conditions that have resulted in embargoes in former years to exist this year, as six brand new engines, estimated to cost \$50,000 apiece, have been sent here by the railroad company to handle the coal file between Bridgeburg and the interior during the coming winter.

TWO POLICEMEN SHOT.
Dublin, Oct. 30.—Two policemen were shot while trying to halt a motor car at Collooney, County Sligo, last evening. Reprisals followed in neighboring villages, six farmers' houses being partially burned.

CHEAPER BOOTS COMING; LOWER WAGES AT ONCE

Government Men Win.

St. John, N.B., Oct. 30.—The result of the recount in St. John City was announced this morning by Judge Armstrong. It leaves the candidates in the same relative positions as on declaration day, all four government men being elected, namely, Hon. W. E. Foster, Hon. Dr. Roberts, W. E. Sculley and R. T. Hayes.

Montreal, Oct. 30.—If the employees of the firm of Daoust, Lalonde and Company, shoe manufacturers, decline to accept a reduction of 12 per cent. in their wages, the factory will be closed for an indefinite period. This was what Joseph Daoust, head of the firm, told the employees yesterday. The reasons he gave them was that the price of shoes will be substantially reduced in the spring. To make a profit under those conditions, it will be necessary to reduce wages, Mr. Daoust explained.

London, Oct. 31.—The press congress of the world, which was to have been held at Sydney, Australia, in 1918, but was postponed till March, 1921, has been further definitely postponed, mainly thru travel costs and other difficulties.

MILITARY AND MEXICAN CITIES

Mexico City, Oct. 30.—Military aid is being called to prevent disorders in a number of cities, notably Puebla and Vera Cruz, in connection with the strike situation, which apparently is far from settlement. The general strike continues in Puebla.

Poland realizes the seriousness of the present situation, and is doing all in her power to cope with it, says the report, but with a war on hand, and limited facilities to work with, the government officials can do but little.

In closing Colonel Gilchrist says: "While there are no figures available to enumerate the actual amount of damage wrought by the Bolshevik armies in their recent advances toward Poland, it is predicted by the most conservative that the number of new typhus carriers scattered all over Poland will reach many thousands, and the financial loss due to the destruction of sanitary materials, crops and other property will run into millions of dollars."

Complete abandonment of all typhus fever work in the worst typhus fever districts of Poland; capture by the Bolsheviks of all eastern quarantine stations and removal of the barriers established under great difficulties; capture and destruction of much of the paraphernalia and materials which had been distributed in many towns and villages throughout the typhus districts, introduction by Bolshevik troops of a new source of contamination to places free from the disease; infecting of the armies of Poland, and infecting of the populace returning to homes, recently occupied by Bolshevik soldiers.

Press Congress Off.
The press congress of the world, which was to have been held at Sydney, Australia, in 1918, but was postponed till March, 1921, has been further definitely postponed, mainly thru travel costs and other difficulties.

THE GUMPS—GOOD-BY, MAIN SPRING
