

The candidate for Graduation must have been at least **FOUR YEARS** engaged in the acquisition of professional knowledge; and, during that time, must have attended, for **THREE SESSIONS**, Lectures in some recognized Medical School.

ONE YEAR engaged in the study of Medicine, with a respectable medical practitioner, previous to the **THREE SESSIONS'** attendance on Lectures, will be equivalent to attending Lectures a fourth Session. One Session, at least, must have been passed in the University; during which time each of all the above-named Classes must have been attended.

The candidate will be required to give proof, previous to his examination, of his classical attainments*; and to present to the Faculty a Thesis, written by himself, on some medical subject.

He must be twenty-one years of age before receiving his Degree.

Certificates of attendance on Lectures will be received from incorporated Medical Schools in the British dominions; and, also, from others recognized by the British Colleges. Other certificates of attendance on Lectures will be admitted at the discretion of the Faculty.

*The Latin examination does not take place until the end of the curriculum, unless the Student desire it. The London Pharmacopœia, or Gregory's Conspectus, or, if the Student prefer, Cæsar's Commentaries, are the works examined in.
