MRS. GOELET DYING

ON \$1,000,000 YACHT

Widow of New York Millionaire in Grave Condition From Cancer

Huband Died on the Vessel—Wife Refuses to Leave—Has Been Custom to Live There Nine Months in The Year

New York, Sept. 11.—Mrs. Robert Goelet is reported to be dying aboard her yacht, the Nahma, the largest and most luxurious yacht in the world. Since an operation for cancer was performed a little more than a year ago, Mrs. Goelet has steadily declined in health. The yacht is off Southampton, Eng.

Word has been sent out by the staff of physicians who have been ministering to Mrs. Goelet for the last few months that it is only a question of days before the end. The doctor woman has refused to leave the yacht since she realized that her husband was mortal. Her husband, Robert Goelet, died aboard the Nahma in the Bay of Naples on April 27, 1910. Mr. Goelet had built the million dollar yacht only two years before.

Beatrice Goelet, the only daughter of Mr. and Mrs. Goelet, died in this city in February, 1902. She was seventeen years old. Her entire share of the vast Goelet fortune went to her brother, Robert, who is now one of the richest young bachelors in the world.

Under her husband's will Mrs. Goelet received the yacht, Nahma, outright and the use of the Goelet homes in this city, Tuxedo, and Newport for life, also an income of \$200,000 a year.

Of course, in his life time, Mr. Goelet had made large gifts to his wife. The income of \$200,000 a year would scarcely keep the Nahma, in commission and pay for the entertaining of royalty. It is estimated that the running expenses of the Nahma when in commission amounted to at least \$10,000 a month. It has been Mrs. Goelet's custom for the last decade to live aboard her yacht at least nine months of the year. Her entertainments have been noteworthy for exclusiveness and elegance rather than sumptuousness.

START PANIC AMONG PILGRIMS AND ROB THEM WHOLESALE

Berlin, Sept. 11.—A gang of pickpockets made a rich haul near Munich as the result of organizing a "pilgrimage" to the shrine of the Virgin Mary. The pilgrims were taken to a place in the mile-long procession of 15,000 pilgrims, suddenly shouted, "Danger! Look out for the pickpockets!" The pilgrims were plunged into wild alarm, and men, women and children trampled over one another in order to escape the thieves. Some fifty or sixty were taken to an adjacent hospital unconscious. One old woman was seized with a fit of religious hysteria. It was found that the thieves had robbed the pilgrims of scores of watches and purses and of jewelry.

ON A REEF FOR HOURS IN NIGHT AT THE FALLS

Thomas Wilson, of the North End, with two companions, had a thrilling experience in the falls last night. They were in a motor boat towing another, and were adrift on a reef. They were there until 1:30 a. m., when they sounded their horn for help. They were heard by Allen Macdonald of Victoria street, who got out of bed and, securing a row boat, went to their assistance, and rescued them, but was forced to allow the boat to go. It was found later.

Attar of Roses \$22 an Ounce

London, Sept. 11.—Attar of roses probably will be very dear this year owing to the small crop and short rose harvest, because of the heat.

The Bulgarian crop is estimated by some authorities at 125,000 ounces against 170,000 ounces last year. As much as \$12 cents a pound for the flowers has been charged to distillers, whereas last year the price was only 3 1/2 cents. In consequence of this rise in price of the rose this season's attar is quoted at \$22 an English ounce.

Vienna, Sept. 11.—Fighting has broken out on the Turko-Bulgarian frontier, according to messages received from Constantinople and Sofia.

Toronto Man Cured of Intolerable Itch

"I just want to say a good word for Cuticura Soap and Ointment. Four or five years ago I was in Port Arthur, and I had an attack of the itch. It certainly was an intolerable nuisance. The itching was principally at nights before I went to bed. The thighs were especially affected.

"I went to two doctors about it, and tried more than one remedy. I was beginning to think the complaint was incurable, when I read that he would guarantee to cure me. I told me to take a hot bath, use Cuticura Soap, and then apply Cuticura Ointment. I took his advice, and, sure enough, the itch vanished. I had probably used the Cuticura Soap and Ointment with Cuticura completely cured me of that intolerable nuisance. I have used the Cuticura Ointment ever since, and I have never been troubled with the itching again. Anything in this testimonial I would be prepared to back up in a court of law." (Signed) J. E. Hooper, 208 Parliament Street, Toronto, Jan. 10, 1911.

For more than a generation Cuticura Soap and Ointment have afforded the speediest, simplest and most economical treatment for skin and scalp diseases. Sold by druggists and dealers everywhere. HALF THE COAL PRODUCED IN STATES IN YEAR WASTED

Starting Statement by Director at Government Bureau of Mines

Washington, Sept. 11.—Of a production of 500,000,000 tons of coal in the United States in the last year, 250,000,000 tons were either wasted or left under ground probably unfit for future use, according to a statement by Dr. Joseph A. Holmes, director of the United States Bureau of Mines.

In addition to this startling waste, Dr. Holmes declared that users of coal, through faulty methods, derived only about ten per cent of the energy of coal used. Furthermore, he added, the loss by waste in the hundreds of millions of dollars annually.

Dr. Holmes based his declaration on an exhaustive report just issued by Charles L. Parsons, chief mineral chemist of the department at Washington to protest its interests in Mexico. Telegrams received by the company declare that bodies of shale, varying from 100 to 300 were piling the country.

More natural gas than is now manufactured.

Ninety per cent of the energy of coal consumed.

By antiquated coke making methods, nine million tons of sulphuric acid from smelters' chimneys.

These losses are only the beginning of the enormous drains on the country's natural resources. Mr. Parsons contends. The loss of nitrogen, he says, is "incalculable," while millions of dollars literally "go up in smoke" through losses of sulphur, arsenic and bismuth from the factory chimney and the flue of the home.

Officials of the bureau, however, are hopeful for strides towards reform. Already, they say, remedial laws, federal, state and municipal, are bringing about a better understanding of the situation.

BUNTY BACK IN 60'S.

Special Company of Scotch Players Coming to the Opera House Next Monday for Four Nights.

Although Bunty Pulls the Strings has only been announced since yesterday, the numerous inquiries indicate a greater interest in this Scotch play than has been

shown in any theatrical event for some time. The period of Bunty is the age of hoop skirts back in the 60's and the story is the story of a simple, a simple character of a Scotch family. The play holds the records of having played years in London and a like period in New York. The Halifax papers say a me fine and charming play has seldom given in that city. St. John heard of it are anxiously looking forward to a

engagement of Bunty Pulls the Strings at the Opera House for four nights beginning next Monday.
