THE VICTORIA WEEKLY FIMES. FRIDAY, APRIL 14, 1893.

The Wleekly Times

DEFECTIVE QUARANTINE.

Victoria, Friday, April 14, 1893.

The incidents connected with the arrival of the Empress of Japan give rehas made Cardwell doubtful." newed emphasis to the fact that so long as the quarantine arrangements are in their present shape there is constant lative to the Franco-Canadian treaty danger of another importation of infectious disease. There are very DOOF facilities at Albert Head for handling so large a number of "suspects" as the steerage of the Empress has furnished, latter did not to any serious extent deand the public has but little ground for part from his instructions, and it seems that the "favored-nation" clause assurance that infection will not be is not so formidable an obstacle as Minspread abroad by them. The Dominion ister Foster represented. The truth is, Government has gone too leisurely about the work of improving the quarantine probably, that the protest of the Canaarrangements, after the lesson which dian wine-growers had much more than Tupper's actions to do with the Govlast summer's experience should have conveyed. We must sav further that ernment's reluctance to ratify the treaty. The Government will in all likelihood the free and easy handling of the Emencounter further trouble in connection press of Japan's mails was far from commendable. The prompt dispatch of with the same treaty. the mails is most desirable, but still more importance attaches to the protection of the nublic health. All the ordinary precautions at least should be taken to ward off the danger of infec-Kingston Whig thus graphically detion.

THE CENSUS MYSTERY.

The discussion on the population of this province has attracted attention at ity.' Ottawa, and it seems that Satistician Johnson is ready, with his usual vigor, to come to the defence of the census. A despatch from Ottawa in the Vancouver World reads as follows:

I saw Mr. George Johnson, Dominion statistician, this morning cencerning the census returns for British Columbia. He affirms that the population of the mainland is 61,406, and that of the Island of Vancouver 36.767, making total of 98,173. Of the total populatio 8,910 are Chinese, 5,727 being on the mainland and 3,183 on the island. De ducting the Mongolian population the net result will be: Mainland, 55,679; island, 33,652. With respect to the Indian population census the department made an enumeration, and after careful comparison of these figures, and those supplied by the Indian department makes the annual census taken by the latter as being accurate and accordingly accepted, making the total Indian population last year 35,202. These were the figures telegraphed by Mr. J. Lowe, deputy minister of agriculture, to th provincial government, and are to be found on pages 247-51, part one, Indian department report of last year. dition to these figures, the totals by agencies were given, and each and its number named, as follows: West Coast agency, 2,864; Fraser river, 338; Kamloops, 2,401; Okanagan, 878 Cowichan, 2,048; Kwawkewlth, 1,732 Williams Lake, 1,803; Kootenay, 696 Northwest Coast, 4,001; Babine and Up-per Skeena, 2,645. No agents have been appointed in the following named places but the returns are believed to be accu rate: Hilestuck, 2,274; Tahelie, 1,000; bands not visited, 8,522.

1

Johnson is excessively angry Mr. the figures prepared and submitted by him to the department of agriculture being characterized as "fraudulent," and says that the person using such language dare not do it to his face. It occurs to us that if Mr. Johnson

come to the conclusion that many people here have reached, namely, that the census returns and the Indian department returns cannot both be correct. Exclusive of the Chinese, he gives the white and Indian population of the mainland as 55,679 and the island 33,652. According to the Indian department figures there are 29,460 Indians on the mainland and 5,742 on the island. This leaves on the mainland 26,219 whites and on the island 27,910. Now if we take the census figures we find that there are in Vancouver city 13,709 people, and in New Westminster city 6,-678, or a total of 20,387. Deduct from this total the 3,200 Chinese credited to the whole Westminster district and a white population of 17,000 is left. The remainder of the mainland would in that case have a white population of about 9,000, which is an absurdity. Therefore we are reduced to the old conclusion that either the census figures or the Indian department's figures are wrong, and it seems to us that it is the duty of the Dominion government to find where the mistake lies. Until something to the contrary is shown we must incline to the belief that the number of Indians is exaggerated, a fact to which Mr. Brown's argument points very strongly. At the general election in 1891 the Liberals carried the county of Vaudreuil

for the house of commons, the seat having for many years been held by the Conservatives. H. S. Harwood, the Liberal candidate, then defeated Hugh McMillan, the former Conservative member, by a majority of 98. Mr. Harwood was subsequently unseated, and in the resulting bye-election he was detrolley wire touched with the result that the feated by Mr. McMillan by a majority of 35. Mr. McMillan was in turn unseated, and he declined to enter into the flames. a new contest, so the Conservatives sereceived a shock. lected a Mr. Chevrier as their candidity The election was held yester-da, when Mr. Harwood captured the ing licenses. seat for the Liberals by a majority of 125. This is a notable victory for the Liberals, and taken in connection with the government's unwillingness to open Cardwell it gives a good indication of the trend of popular feeling in the east.

Lord Thurlow, who was lately appointed lord high commissioner of the general assembly of the church of Scotland, and whose name has been mentioned in conneition with the British Parific profect, should have plenty of experience in the capacity of a director. He is said to be upon the boards of no less than 30 concerns, including trust companies, fire and life insurance concerns. and dealing with railfoads, exploration, colonization, mines, lengineering, guns, granaries, salt, steel and iron forging, printing, electric lighting, tio mining and precious stones. A Mixture to Prevent Rust.

prudence of throwing articles overboard

The accidental discovery at Charlot enburg. Germany, of a new compo which is said to prevent rust on br iron and steel articles is reported by London journal Industries. This pound, it is said, consists of a mixtu of essential oils and grease, which, i the form of a thin fluid, may be applie by a brush. The oil evaporating, t grease remaining forms a coating whi protects the metal against atm fluences and sea water. It is claim that there is no acid in the compo hat it does not turn rancid, and th t can be readily removed by

with cotton waste saturated with tur pentine. The compound, which i known as manocitin, has been mad use of in several of the German Government departments.

Colored Children Killed.

Memphis, Tenn., April 13.-A colored school house near Robinsonville, Mass., was blown down this morning and 25 children were killed. There were also a nhmber of negroes killed in the tofn.

Turkish Misrule in Armenia

Turkish Misrule in Armenia. London, April 10.-Advices from Con-stantinople show that the British consuls at Smyrna, Trebizonde and other places have sent to the British embassy in Con-stantinople lists containing the names of 1000 Armenians who are imprisoned on various charges in several consular dis-tricts. It is reported that Great Britain will propose the holding of a conference by the European powers to consider Turkish rule in Armenia. It is charged that it is a common occurrence for Turks to kidnap Christian girls and dispose of them to the owners of harems. If the relatives and friends of the girls attempted to regain them they were met with the statement them they were met with the statemen that the girls had embraced Mohammed anism, and this as a rule ends it as far as the Armenians are concerned.

Women are not slow to comprehend They're quick. They're alive, and yet it was a man who discovered 'the one remedy for their peculiar ailments. The man was Dr. Pierce.

The discovery was his "Favorite Precription"-the boon to delicate women. Why go round "with one foot in the suffering in silence-misunder grave,' stood—when there's a remedy at hand that isn't an experiment, but which is sold under the guarantee that if you are disappointed in any way in it, you can get your money back by applying to its

makers. We can hardly imagine a woman's not trying it. Possibly it may be true of one or two-but we doubt it. Women are ripe for it. They must have it. Think of a prescription and nine out of ten waiting for it. Carry the news to them!

The seat of headache is in the brain. Regulate the stomach and you cure it. Dr. Pierce's Pellets are the Little Regulators.
