**"THE SLATER SHOE"**  
There is but one "Slater Shoe." The sole indication of a shoe is indicated by three words in a slate frame.

**Central Labor Body to Organize Soon**

A new central labor body is likely to be organized in Toronto in the near future. According to information obtained at the Labor Temple it is proposed to unite the building trades, the brewery workers, the stage employes, the musicians and the moving picture operators into an offensive and defensive alliance.

The new body will not in any way conflict with the Trades and Labor Council. It will not be chartered as the organizations to be affiliated are already chartered in some central body.

Meetings will be called from time to time as occasion arises. It is hoped that a great deal of mutual assistance can be rendered by the organizations.

"Supposing, for instance," explained one labor official, "that a theatre proposed to erect an addition and were to employ non-union bricklayers. The stage hands would refuse to work and in this way force them to employ all union labor."

**Laborite Elected at Stockport, Eng.**

London, Eng.—The Labor Party gained a seat in the House of Commons at the expense of the Conservatives in a by-election at Stockport recently. The Laborite, A. E. Townend, polled 20,219 against the Conservative 17,992 and the Liberal 17,293. In the last election the Conservative majority was about 7,000. The Liberal votes represent a gain of about 5,000.

**40,608 Immigrants in 4 Months' Time**

Ottawa, Ont.—Immigration to Canada for the first four months of the fiscal year ended July 31, amounted to a total of 40,608, of which 19,217 were British, 6,874 from the United States, and 14,517 from other countries. In the same period 12,170 Canadians who had been absent in the United States for six months or over, returned to Canada with the intention of making their permanent residence in this country. If the returned Canadians are added to the general immigration the total for the four months is 52,778.

Immigration for the month of July consisted of 2,123 British, 1,567 from the United States, and 3,469 from other countries.

The total number of Canadians who have returned from the United States since April 1, 1924, after settling in that country for six months or longer, and now with the intention of remaining permanently in Canada is 55,945.

**You can get your share**

One Canadian Dept. Store receives an average of 19000 telephone orders in one day—many of them by Long Distance.  
There are smaller stores in smaller towns that receive as large a percentage of orders by telephone.  
No matter how small your establishment may be, you can get your share of telephone trade—if you organize to handle it and make a determined effort to get it.  
If you are one of those ambitious merchants who realize that doing business by telephone is only at the beginning of a big expansion—count on our hearty co-operation.

Each New Subscriber Adds to the Value of Your Telephone

**The Tariff Argument in a Nutshell**

*Stripped of all superfluous phrases, of all irrelevant side issues that becloud the main argument, the case for Tariff Protection can be summarized in the following terms:--*

**What the Liberal Policy of Tariff Reductions will do**

- Will increase unemployment, will stimulate the trek to the United States, will discourage immigration.
- Will force poor wages and lower the standard of living.
- Will cause foreign capital to shun Canada.
- Will unsettle business by undermining confidence.
- Will increase Canada's dependence upon other nations.
- By discouraging immigration and forcing emigration, will cause the value of town and farm property to fall.
- Will operate to curtail the freight and passenger earnings of our national railway system, and thus add to its yearly deficit.
- Will contract the farmer's home market by causing our cities and towns to shrink.
- Will cause our retailers to lose customers, and our professional classes to lose clients.
- Will increase per capita taxation by leaving us fewer people to carry the burden of interest on our national debt.
- Will impair our ability to negotiate advantageous trade treaties with other countries.

**What the Conservative Policy of Tariff Increases will do**

- Will reduce unemployment, will stop the trek to the United States, will attract immigration.
- Will bring good wages and improve the standard of living.
- Will induce a flow of foreign capital into Canada.
- Will stimulate business by inspiring confidence.
- Will make Canada more self-supporting.
- By attracting immigration and keeping Canadians at home, will cause the value of town and farm property to rise.
- Will operate to increase the freight and passenger earnings of our national railway system, and thus hasten the day when it will be self-sustaining.
- Will enlarge the farmer's home market by causing our cities and towns to expand.
- Will secure our retailers new customers, and our professional classes new clients.
- Will reduce per capita taxation by bringing new people into the country to share that burden with us.
- Will put us in a stronger position to negotiate advantageous trade treaties with other countries.

**Vote Conservative**

- Higher Tariff - Lower Taxes -
