## LET'S KEEP HIM IN MIDDLETON AND VICINITY

Every boy and girl in Middleton and district is a potential asset to us all. Right development of this asset implies better schools, wholesome amusement, promising industrial and professional opportunity—environment that recognizes the developing power of youth—and gives it a real chance.

When you let John or Mary leave town—you may have lost a budding Howe, Lincoln, Edison, Ford, Marconi, Bell—a "future great."

Do your part in making the town a better place to live and thrive. Spend your money at home—where your dollar continues to do a hundred cents worth of work for the boys and girls of Middleton and district—and incidentally to give you far greater return both directly and indirectly than you could otherwise obtain for it.

"—keep him in the community."

## A SUGGESTION TO LOCAL MERCHANTS

It has been the policy of this paper to advocate the "buy at home" practice on the part of its readers, and in pursuance of such we have occasionally been criticised by those who have failed to see eye to eye with us in the matter.

The opinion has been expressed that people have a right to trade where they please, and that they should not be expected to buy at home and pay more than they would be obliged if they made their purchases abroad.

While both these objections are open to logical answer we admit that they may readily appeal to those who require to consider well their expenditure in order that their outlay may not exceed their income. We believe, however, that in most cases the customers would be glad to co-operate with the merchant in order to promote community welfare and would willingly pay slightly more to the home merchant than the mail order house requires because of the better service rendered.

There is no doubt but that advantage of getting payment in advance and buying in large quantity frequently gives the big store an advantage over the home merchant, and makes it possible for the foreign concern to underbid the local store. This may also come in certain cases from the difference in value in the quality of the goods offered.

May we suggest to our merchants a solution of this problem so that they may be able to meet the competition of the big city store and merit the continued support of their customers? Our proposition is that the dealers of Wiltville should proceed to organize a "Merchants' Association."

For the purpose of solving this problem which is theirs alone and for which they must assume full responsibility. On the principle that "goods bought right are half sold" one of the first undertakings of the new organization should be to take into consideration the very best possible system of buying. Buying is not a pastime, but a profession, and requires special qualities of which comparatively few merchants possess. We believe that by organizing our merchants can buy so that they can cut their retail prices in many cases to meet those of the mail order catalogues and make more money because of the increased sales.

To accomplish this it will be necessary for the association to select from their number one buyer to whom will be intrusted the entire buying for the needs of the whole organization. All who wish to sell to Wiltville merchants must see the one man and the factory representative must sharpen his lead pencil for his calling upon a big customer. The buyer gives shipping instructions and the goods are received by the merchant in the usual way. For example, one buyer buying all the shoes for all the merchants of the town of Wiltville would save from one dollar to three dollars per pair, the price being cut to the consumer just that much, while the retail profit would be the same as now. Citizens would appreciate the improved service and get the mail order catalogue, while the dealer would make more money "because of the sale of more shoes."

## FACTS ABOUT TEA SERIES—No. 1

## Tea as a Beverage

Tea first became known in China nearly 3000 years before Christ. In that country tea was greatly prized, both for its remarkable qualities as a beverage and for the almost religious ceremony attached to the drinking of it. Up to the sixth century, tea was used only for medicinal purposes. Even in the seventeenth century it cost \$25.00 to \$50.00 per pound. All tea caddies were constantly kept under lock and key. Today when even fine quality like "SALADA" costs less than one-third of a cent per cup, it is not surprising that the consumption of tea is increasing tremendously.
