

The Autocrat of the Breakfast Table

of the Tea Table, and, in thousands of homes, of the Dinner Table, too, is

BLUE RIBBON TEA

And Why? Because Blue Ribbon Tea is a delightful beverage—healthful—mildly stimulating—pure as the Western breezes—and almost as cheap.

Drink Blue Ribbon Tea for your health's sake. Buy it for your pocket's sake.

And note the new package—a perfect protection against the enemies of good tea—dust and moisture.

A Money-Back Guarantee Goes With Each Package. Ask Your Grocer.

BLANCHARD GAS POWER WASHER AND ENGINE OUTFIT THE DAWN OF FREEDOM

Freedom from the awful slavery or drudgery of wash day, gloom and despair fades away and happiness and contentment finds place—and mother's strength is saved for more noble and useful purposes. Reduces the washday problem to a simple, easy process, which requires no serious physical or mental efforts.

The **THREE POSITION SWINGING BALL-BEARING WRINGER** takes the last lift out of washday. A whole big wash can be done without the lifting or moving a tub.

CONSIDER THESE ADVANTAGES

- No. 1—Quick Release Safety Lever on Wringer, prevents accidents and damage to clothes.
- No. 2—Safety First; all moving parts encased.
- No. 3—Lever at right controls Wringer. It runs forward or backward or remains neutral.
- No. 4—Lever on Tub controls Washer. Washer runs independent of wringer or at same time.
- No. 5—Wringer Swings to Three Separate Positions, has reversible Waterboard which allows you to rinse and wash as many times as you like.
- No. 6—A Solid Heavy Large Corrugated Cypress Tub and Stand, double thickness overlapping joint Lid. All nicely finished.
- No. 7—Mechanism Heavily Constructed, carefully fitted and encased to prevent accidents.
- No. 8—Patent Dolly; see sectional view of Silent Ezee-Go. This is the most effective dolly in use.

BEST LITTLE ENGINE IN THE WORLD FOR THE MONEY

ENGINE—The Best Money Can Buy

This sturdy Engine is the most dependable and powerful of any ever designed of same dimensions. It is mechanically perfect in material, construction and design. The strong, substantial construction, the perfect fit and perfect alignment of its working parts, gives the maximum of power in marked contrast to the cheap, flimsily constructed engines in which labor and material is skimmed to save cost and where friction and loose joints consume much of the power.

This Engine is built for economy of operation and enduring service. There is no other Engine which measures up to this one in high standard of quality. For Details of Specifications, SEE OUR CATALOG.
