

tempting them to eat delicacies, but are literally casting your best things to worms; think of it and take advantage of the simple, cheap and certain cure which is offered you. Then will your children rejoice and grow daily in health and strength, unless complicated with other diseases, which is one of the most common results of worms when allowed to remain for any length of time in the bowels.

Children whose constitution are effected with scorfula, are especially prone to the production of worms in the bowels in large quantities. There seem to be juices generated in the bowels by this disease, which fatten and breed worms very quickly. In such cases, the Dead-Shot Worm Stick should be used occasionally to expel the new broods which are hatched out, while in the intervals the general health should be improved, and the Scorfula vice eradicated by the use of Wilson's Tonic and Sarsaparillian Elixir, which is the best remedy science has discovered for such a state of the system. By thus alternatively using the Dead-Shot Worm Stick and Wilson's Tonic and

Sarsaparillian Elixir you will soon find a satisfactory change in your sickly child's appearance. It will lose the wan aspect it formerly presented, and instead present the appearance and reality of robust health, and you will have the satisfaction of knowing that you have warded off from your offspring evils of great magnitude, for there is scarcely any disease which may not be excited by the presence of these pestilent parasites in the system.

This is a subject on which it is hardly necessary to warn mothers in Canada. Bitter experience has made them careful to watch the symptoms of worms, and cheerful experience has proved to many that Dr. Wilson's Dead-Shot Worm Stick affords a sure and simple cure to the disease, and prevents its annoying, dangerous and often fatal results. A pleasant, good-natured, romping family of red-cheeked boys and girls is one which is not troubled with worms, and such a one is a blessing, as compared with children at whose vitals the insidious enemy is gnawing. Dr. Wilson's Dead-Shot Worm Stick therefore deserves the reputation it has made as a means of making children beautiful
