

Turns mother's drudge  
Into child's play

Its double-acting rub does the work in one-half the time required by other machines, and it absolutely takes all dirt out of collars, cuffs, wristbands and neckbands.

It makes washday a pleasure—not a drudge.

If your dealer doesn't sell it, write

### BOYS FOR FARM HELP

The managers of Dr. Barnardo's Homes invite applications from farmers, or others, for the boys who are arriving periodically from England to be placed in this country. The young immigrants are mostly between 11 and 13 years of age; all will have passed through a period of training in Dr. Barnardo's English Institutions, and will have been carefully selected with a view to their moral and physical suitability for Canadian life. Full particulars as to the terms and conditions upon which the boys are placed may be obtained upon application to Mr. Alfred B. Owen, Agent Dr. Barnardo's Homes, 214 Farley Ave., Toronto.

A woman always retains a large corner in her heart for her first love.

A skeptic is a man who doesn't share the good opinion we have of ourselves.

## TUBULAR--or "Back Breaker?"

When you see the waist low Tubular you can't be driven into buying a back-breaking, "bucket bowl" separator. Can and crank are just the right height on the Tubular. Here is the largest Dairy Tubular along side four "back breakers." The girl with her hand on the Tubular is 5 feet, 4 inches tall. This is an exact reproduction from a photograph. Which kind for you? Makers of "back breakers" try to get their cans low by setting the cranks low. High cans break your back backward—low cranks break it forward. Unless you are a double jointed giant, you'll find a high can is no joke. To show you how high these "back breaker" cans really are, when the machines are set high enough to turn easily, we raised these "back breakers" 'til their crank axles were level with the Tubular crank axle. "Back breaker" makers don't like this picture—it's too true. They try to squirm out of it. You wouldn't like turning cranks as low as "back breaker" makers put them.

The low can is only one of many advantages Dairy Tubulars have over all others. Dairy Tubular bowls are simple—"back breakers" are complicated. Tubulars are self-oiling—no oil holes to fill up. "Back breakers" are oil drippers and oil wasters. To learn a lot more about Tubulars, write today for catalog N-193

## WE CAN SELL THAT FARM FOR YOU

A small advertisement in our "WANT AND FOR SALE" column will be read by thousands of people throughout Canada and other parts of the world. Full particulars and terms under "Want and For Sale" heading in this issue. Address:

THE FARMER'S ADVOCATE AND HOME MAGAZINE, LONDON

# Free to Weak Men

IF YOU are weak I want to help you. I want to show you the way to future happiness, and I offer you free my beautiful book, illustrated with photographs of fully developed men, showing how many begin to break down as a result of overwork and dissipation, and how they recover the vigorous fire of youth in a few weeks' application of electricity. This book contains a lot of information which explains many points you want to know.

It is written in plain language, and the illustrations are of the highest type of art, showing the best developed specimens of manly strength. No man who feels any doubt as to his physical powers should be without this book. I send it closely sealed, without marks, free, if you will send the coupon below.

## DR. McLAUGHLIN'S ELECTRIC BELT

pours glowing, exhilarating vitality into you while you sleep; it rejuvenates, animates sluggish circulation, stimulates the brain to activity, and fills the body with life and ambition and endurance. In one day's use it will make you feel as if born anew. It furnishes the motive power that runs through your body and quickly banishes pain.

No matter what ails you, there is a cure for you in Nature's remedy—Electricity. The greatest cures on record have been performed by this famous Belt, and it is recognized to day as the greatest remedial agent known to mankind. It cures every form of weakness, restores the fire and vigor of youth, cures all forms of Nervous Diseases, Kidney and Bladder Troubles, Rheumatism, Sciatica, Varicocoele, Lumbago, Backache, and many other complaints, after every other known system of medical treatment has failed.

### READ WHAT THE CURED SAY:

"I am very much pleased with your Belt, and think it is a grand remedy. I feel well in every way and shall always recommend it."—CHRISTOPHER WILLIAMS, Cranbrook, B.C.

"The Belt I purchased from you in 1901 has given me lasting benefits, and I have never felt better in all my life than I have since wearing your Belt."—HENRY HOFFMAN, Berlin, Ont.

I HAVE AN ELECTRIC BELT THAT DOES CURE, and I am offering it to you in such a way that you take no chances whatever. Give me your name and address, with a statement of your case, and I will at once arrange a Belt suitable for your case, and

**WEAR IT UNTIL CURED AND PAY ME WHEN THE WORK IS DONE.**

### FREE BOOK.

Write me to-day for my beautifully illustrated book, with cuts showing how my Belt is applied, and lots of good reading for men who want to be "The Noblest Work of God." A MAN. Enclose this coupon and I will send this book, sealed, free.

DR. M. S. McLAUGHLIN, 130 Yonge Street, Toronto, Can.

Dear Sir—Please forward me one of your Books, as advertised.

Name .....

Address .....

Office hours—9 a.m. to 8 p.m. Wednesday and Saturday till 8.30 p.m.

### QUESTIONS AND ANSWERS. Miscellaneous.

#### LOOKING FOR A COLLIE.

Could you give me any information as to where I might get a collie pup, or dog that is broken? C. A. P.

Ans.—From time to time advertisements of reputable breeders of collie dogs appear in our columns, and you would do well to consult some of these persons, by mail or personally.

#### NEW COLLEGE OF AGRICULTURE.

Would you please give me some information about Sir Wm. Macdonald's College at Ste. Anne, Que.?

1. What is the proper address of the College?

2. When will it be ready for admitting students?

3. Will it offer more advantages to a resident of Quebec than the Ontario Agricultural College? SUBSCRIBER.

Pontiac Co., Que.

Ans.—1. "The Sir William C. Macdonald Teachers' College and College of Agriculture, St. Anne de Bellevue, P. Q."

2. We understand in the autumn of 1906.

3. The proof of the pudding will be the eating.

#### UNSURE SIRE.

I bought an Ayrshire bull in June, 1904. He was then 18 months old, and good size for age. I let him serve 15 cows, and he only left 2 calves. This spring I let him serve 8 cows, and two have come back the second time. Would you advise me to get rid of him? N. M.

Ans.—It frequently happens that a young bull taken into new surroundings and subjected to different feeding and treatment is not sure for the first few months. We should not be disposed to discard him on the statement given, as the percentage of cows settled this spring so far is a considerable improvement, but if after a fair trial his record does not improve we would feed him for beef and get another.

#### WATERPROOFING COTTON—PRESERVING HAMS.

"Farmer," York Co., asks:

1. What preparation would you advise to apply on strong factory cotton, so as to make it waterproof and yet not crack, peel off, nor rot the cotton? I intend using it for a binder cover.

2. What is the best way to keep hams and shoulders of pork through the summer, that have been salted and afterwards dried?

Ans.—1. To every 3 pints of boiling water add 2 ozs. yellow soap. When dissolved, stir in 1 quart boiled oil, and when cold add  $\frac{1}{2}$  pint gold size. The latter is a drier, and known as brown Japan. A hardware man tells us he has sold raw oil for the purpose, and that the canvas is simply well painted with that and nothing else.

2. Sew the hams and shoulders up in covers made of factory cotton, and hang in any cool, airy place.

#### FATALITY IN PIGS.

Two sows, farrowed a week ago, had no milk. Pigs seemed smart for first day, made a screeching sound, and died in two or three days. Sows did not care for their young. Sows were on pasture in orchard, where nothing disturbed them, and were fed one gallon daily, crushed oats and barley, with a little milk. I put three rings into the nose of each sow three weeks previous to farrowing. Do you think the ringing affected their young? What was cause of sows not having milk when liberally fed? A. S. F.

Ans.—We would not have risked ringing the sows when so far advanced in pregnancy, but if they went their full time and the pigs were smart when born it may not have had any injurious effect. If the sows had not sufficient exercise in the earlier months of gestation the pigs would be likely to lack vitality or the ambition to hustle for nourishment; or if their side teeth were grown long and sharp they may have irritated the sows in the attempt to suck, and caused them to desert their young. In such case these little tusks should be broken off with pinchers. It is difficult to account for such conditions sometimes.
