

THE BRITANNIA MINING AND SMELTING COMPANY is justly proud of these celebrated workings at Eritannia Beach B.C., and of the splendid record made by its drilling crew, working with "Waugh" Dreadnaught drills.

This crew started drilling the tenth of last May and since then each machine has been averaging 40 tons of very hard, solidified schist each shift. These same men have also done the blasting.

This record is typical of the remarkable capacity of the Dreadnaught and all "Waugh" products.
