WAR IS VERY COSTLY TO THE DUTCH PEOPLE

By Next August Holland Will Have Spent 180 Millions.

The Hague, Netherlands, March 22 correspondence of The Associated Press)—The war has so far cost Holland a clear $140,000,000. Further, reckoning the demands of the intervening period at $8,000,000 a month, the new Minister of Finance, Doctor Anton van Gyn, estimates that by August 1 next a sum of $180,000,000 will have been spent on the mobilized land and sea forces and in meeting the various other extraordinary demands made on the treasury by the war crisis.

Of the amount mentioned $110,000,000 was raised by a 5 per cent. loan issued after the first three or four months of war, and the problem now facing this country is how to provide the balance of $70,000,000. Three bills have just been presented to the Dutch Parliament, embodying a straightforward and fairly bold solution of the question. The new Minister of Finance therein proposes to raise as much as $32,000,000 by a special levy, termed a "defence tax" in the financial year beginning May 1 next, to obtain another $18,000,000 by a tax on war profits, and to have recourse to a loan for the balance of $20,000,000. The actual loan, however, is to amount to $50,000,000 out of which assuming the war is over, the extra $30,000,000 will be utilized to consolidate the floating debt accruing from the ordinary budget of 1914, 1915 and 1916.

Seeing that the floating debt of the Netherlands East Indies will also have to be consolidated shortly, it is evident that heavy demands will be made on the money market here before long. As, however, it is largely a matter of replacing the floating by a fixed debt, it is not expected that the market will be greatly influenced; and the powerful position of the Netherlands Bank—whose gold stocks now amount to $196,000,000—and the general plentifulness of money here, renders the prospects of the coming loans bright.

MOTORSHIP BUILDING IN DENMARK

Industry Developing With Wonderful Rapidity.

By Special Wire to the Courier.

Copenhagen, Denmark, March 22—Motorship construction is developing with extraordinary rapidity in Denmark, which took the lead in the building of this class of sea-going vessel when it successfully completed the Selandia a few years ago. Since that time a great increase has been brought about in the size of motorships. The Selandia was 375 feet in length, had engines of 3500 horsepower and displaced 7,000 tons. At present one yard alone here is engaged in the construction of a number of motor-vessels, each of which is to displace 12,000 tons, to be 500 feet in length and to have motors of 6,000 horsepower. The same firm has orders for fifty motorships and its slips will be fully occupied with them until the end of 1921.

Leather From Germany?

London, March 22.—The English people are beginning to believe that they are wearing shoes made of German leather, through the fact that many of their shoes are imported from Switzerland, where the manufacturers are known to use large quantities of German leather. Their suspicions were recently confirmed by the fact that British imports of shoes from Switzerland during February were nearly double those of the corresponding period in 1914. Information was given in the House of Parliament recently that the use of German leather to the extent of 25 per cent. in shoes imported from Switzerland is permissible.

NO EXPLANATION IS ASKED FOR

Holland Accepts Germany's Statement on Tubantia Sinking.

By Special Wire to the Courier.

London, March 22.—The Dutch foreign office announces that no representations were made by Holland to Germany in connection with the sinking of the Tubantia, says a Reuter despatch from The Hague. The Dutch minister in Berlin has been instructed to ask the German government to open an inquiry, in view of the statements made by officers of the Tubantia. These instructions, however, were cancelled when the German minister at The Hague made a declaration on behalf of his government.

WILL EXAMINE BOAT.

The Hague, March 21.—Via London, March 22.—The Tubantia case is causing serious perplexity to the Dutch Government. The Associated Press is informed authoritatively that no further action will be taken by the government until the result of an examination by divers is known, but it is admitted that it will be exceedingly difficult to find traces of the supposed torpedo in the coal bunkers of the Tubantia at a depth of 16 or 17 fathoms.

The announcement is made in Rotterdam that small pieces of brass were found in the Tubantia's lifeboats, which were picked up by the steamship Batavier and this, it is believed will help to clear up the mystery.

Although the German submarnes in the North Sea may be in touch by wireless telegraphy with Zeebrugge and Wilhelmshaven, The Handelsblad of Amsterdam and other Dutch newspapers refuse to believe that the denial by Germany of responsibility for the sinking of the Tubantia was based on any genuine investigation. These newspapers point out in confirmation of their contention in this regard that in previous cases of submarine attacks on Dutch steamships it took weeks for the German admiralty to establish the facts.

DROPPED UNDER A PARACHUTE

French Aviator Falls 11,000 Feet in Twenty Minutes.

Paris, March 22.—The parachute with which all observers in French captive balloons have now been provided, was given a genuine test recently near Clermant, in the Argonne region. German shells had cut the ropes holding one of the largest of these balloons, or "sausages," as they are called by the soldiers on account of their shape. It immediately rose to a height of 11,000 feet and drifted towards the German lines. The watchers below saw the observer get out of the basket and launch himself into space. After a sharp drop, the parachute opened and the observer reached the ground in perfect safety, about 300 yards within the French line. The first sharp drop of about 150 feet, the latter explained, was distinctly disagreeable, but after the parachute spread the descent was pleasant, and was so gentle that during the twenty minutes which it lasted, he had leisure to continue to take observations of the movements in progress behind the German lines.

VERDUN FAILURE AFFECTS STOCKS

American Industrials Falling as Result of Drive.

By Special Wire to the Courier.

New York, March 22.—The London correspondent of The Herald cables: All the newspapers this morning publish prominently cable despatches from New York announcing that as a result of a general peace talk in the United States, American industrials have suffered a severe depression.

The concensus, however, is that the fall in stocks is due to the American conviction that the failure of the superhuman efforts of the Germans at Verdun foreshadows their collapse.

This view was corroborated by the latest despatches from Berlin, which report that not only the deputies of the Reichstag are protesting against the prolongation of the wholesale slaughter of the manhood of the fatherland, but that in the capital and other cities of the empire, police and soldiers have been called out to suppress anti-war demonstrations.

So far as Britain is concerned, the only subjects of discussion here are the measures to be adopted to increase the ever-growing army in order to insure a certain victory.
