Usher; St. Andrew's Ward, William Boyle, James McDonald, F. T. Walton; St. Patrick's Ward, J. Wilson, Thomas Foley, by acclamation.

MYSTERIES OF THE SEA.

The first map of the gulf stream was made by Benjamin Franklin, who tried to point out the utility of ocean currents in navigation.

The sea anemone is capable of swallowing an animal many times larger than itself. It spreads its body and thus surrounds its prey.

Coral larvae are born alive and swim off to seek a locality on which to settle. After they have once become fixed they never again change place.

The Venus' belt is a thin, flat membrane from one to two feet long, and about the width of a lady's belt. Its mouth is in the middle of its body.

Franklin taught that the ocean currents were due to the influence of permanent winds, in which opinion he was sustained by Sir John Herschel.

The color of the sea is usually described as blue, but it is by no means uniform. In the tropics it is sometimes an indigo blue, at others a deep green.

The starfish is covered with a kind of armor. Over 11,000 pieces have been counted in one coat of mail worn by a small creature of this species.

The whole bottom of the ocean is covered with a layer of calcerous ooze, mingled with the skeletons and other animal remains of its inhabitants.

Many efforts have been made to sound the ocean without using a line, the weight carrying a float that returns to the top, but none has been successful.

If it were not for the salts of the ocean the whole sea would soon become a mass of corruption, owing to the decay of the organic matter it contains.

When taken from the sea and laid on a stone the medusa will fall off in weight from fifty ounces to six or five grains. The most of its weight is water.

POOR DIGESTION

Leads to nervousness, fretfulness, peevishness, chronic dyspepsia and great misery. Hood's Sarsaparilla is the remedy. It tones the stomach, creates an appetite, and gives a relish to food. It makes pure blood and gives healthy action to all the organs of the body. Hood's for Hood's Sarsaparilla Cures.

Hood's Pills become the favorite cathartic with every one who tries them. 25c.

ICE CREAM WITHOUT ICE.

Nitrate of ammonia can be used for freezing instead of ice and salt by mixing, if a small freezer be used, 7 pounds of nitrate with three quarts of water. The freezer is then rotated, and the cream or water is quickly frozen, provided the material is first cooled down before applying the nitrate. The nitrate can be recovered for further use by evaporing the solution to dryness.

EPPS'S COCOA.

GRATEFUL—COMFORTING.

EPPS'S COCOA

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage, which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us, ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in packets, by grocers, labelled thus:
