He Wants To Pass The Good News On

"It's Wonderful the Way Tanlac has Improved my Wife's Health", He Declares.

"The wonderful improvement in my wife's general health is entirely due to Tanlac, and I am glad of the chance to tell folks what a splendid medicine we have proved it to be," said William Armstrong of 98 W. Water St. St. John, N. B.

"No one will ever know what she has suffered during the past few years on account of indigestion and gastritis. Rich or heavy foods acted like poison on her stomach and she had to be very careful in her diet. But even so the gas would form and float her up until she would almost choke and sometimes she would faintly groan with agony on account of the pains which she had after eating. She had frequent bilious attacks that left her so weak that she could hardly stand up, and at one time she was so bad that we had to send her to the hospital. They packed her up for a bit, but it wasn't long before she was just as bad as ever.

"When I saw in the papers that so many people with stomach troubles were being helped by Tanlac, I got some for my wife, for I reasoned that if it didn't do her much good, it couldn't do her any harm. She often remarks now what a good thing it was when she tried Tanlac, and after the way it has helped her we have absolute faith in it. She now has a good appetite and can eat anything without fear of any stomach trouble or eruptions. She is never bothered with biliousness and indeed feels better in every way. She is more grateful than I can say for all the good Tanlac has done her, and we never miss an opportunity of passing on the good news of what a splendid medicine it is."

Tanlac is sold in Newcastle by E. J. Morris, in Redbank by Wm. M. Sullivan, in Doak's Cove by O. Hilda Brand and in South Nelson by Mrs. James Nowlan.

County Court

The January sitting of the County Court opened at Newcastle on the 25th ultimo, Judge McLatchy presiding. There was no criminal business, and the business on the civil side was stood over until the April term.

Two Naturalization cases were taken up, one from Chatham and the other from Blackville, and a decision favorable to the applicants was found by the learned Judge in both cases. Certificates of naturalization will be issued in due course by the Secretary of State.

Judge McLatchy paid a feeling tribute to the loss sustained in the death of the late E. P. Williston, and A. A. Davidson, K. C., replied on behalf of the Bar.

Mother

"California Syrup of Figs" is Child's Best Laxative

Beware! Say "California" or you may not get the genuine "California Syrup of Figs" which doctors recommend for babies and children of all ages. Nothing else cleans the little bowels and regulates the child's stomach and liver so gently, so thoroughly. Directions on each bottle. But you must say "California." Don't be talked into an imitation fig syrup which hasn't the delicious, fruity taste or the perfect "laxative physic" action.

IF Your Throat's Sore

and inflamed, the speedy and most effective treatment is to, now and again dissolve a Peps infection-killing tablet in your mouth. Peps reach the inner tissues which are the parts actually affected in throat and chest ailments. Liquid medicines can't do this.

Just as you breathe in the germs of throat trouble, so you must breathe in the remedy to chase and exterminate these germs, before they feel their way into the windpipe and chest. These soothing, germicidal Peps vapours quickly allay inflammation and soreness; they overcome the hoarseness, difficulty in swallowing, and irritating dry cough.

Free from opium or other habit-forming drugs Peps provide the ideal remedy and preventive of colds, chills, grippe, influenza and throat troubles.

Beware of substitutes and tablets containing formalin which irritate and inflame the throat and air passages.

Against Class Legislation

Ottawa Feb. 1.—Premier D'ury was the principal speaker at the annual meeting and dinner of the Ottawa Board of Trade tonight. The premier said that since he had been brought in deadly contact with the not head-lunters, but hide-n'm'ers, he was losing some of his agricultural gentleness.

He said he didn't believe in class legislation. They must have a little better understanding between farmers and those who were not farmers. The people on the farms do a lot of mighty sound thinking, he added. They had to make farm life bearable for the women. They had heard of farms being undermanned, but more often than not they underwomanned.

Man And Wife Leave Halifax On Walk To B. C.

Halifax, Feb. 1.—F. C. Dill, a former C. P. R. brakeman, and his wife, Jennie Dill, both well known in athletic circles, left here this morning on a walking expedition to the Pacific coast. The Dills are the third team to leave Halifax within the past two weeks on a transcontinental hike promoted by the Halifax Herald.

USE BEAVER FLOUR
 and Improve Your Bakings
 BEAVER FLOUR contains all the richness and goodness of Ontario Winter Wheat combined with enough Western Hard Wheat to give it strength.
 It is the only scientifically blended flour on the market—and can be relied on to give the best baking results every time. Ask for it at your grocer's.

Chas. Burkman, of the first team, was second team to leave, are today head reported last night at Welsford, N. S. ed for Moncton, having spent last and t e Pehans, father and son, the night at Dorchester, N. B.

Western Canada's Corn Substitute

(1) Cutting sunflowers with corn binder at Strathmore, Alta.
 (2) Filling a silo with the cut sunflowers which are blown up a pipe into the silo by motor.

Anybody who has travelled through Western Canada this summer cannot have failed to notice fields of sunflowers growing tall and strong on many of the farms. The newest product will never become the greatest. But it may and probably will add much to the wealth of Saskatchewan. Side by side with the golden wheat the golden sunflower will blossom on every farm, in days to come. Side by side with the granary silos will loom up on every farm, and the ensilage they will hold will be sunflowers, stalk, leaves and all, chopped up fine.

Take a plug of chewing tobacco, steam it until the leaves come loose—and you will, by looking at the tobacco, be able to form an accurate idea of what sunflower ensilage looks like. Moreover, it smells like that too. But the cattle, figuratively and literally, eat it up! Cattle coming into the barnyard, fresh from eating luscious green grass, will make a bee-line on the run for sunflower ensilage. They will eat it in preference to the most expensive prepared winter foods—bran and all that sort of thing—and give more milk, with a higher butter-fat content, on sunflower ensilage.

Mr. E. C. Thomas, of Lloydminster, cow testing supervisor for Saskatchewan for the Dairy and Cold Storage branch of the Department of Agriculture, Ottawa, writes: The growing of sunflowers for ensilage has been adopted by a great number of Saskatchewan farmers during the past summer. There has been an abundant yield and the number of silos in the province has doubled since a year ago. At Lloydminster, Asquith, Guernsey, North Battford, and many other points they are in use. At Meota there are two or more pit silos. In Rosethorn district they are common among the dairymen supplying milk in Saskatoon city.

The feed produced is used with great success for the winter feeding of both dairy beef and cattle. A writer in the Saskatoon Star has collected the following interesting data in the course of investigations in the province.

"Russian Mammoth was the seed generally used. It should be sown in rows thirty inches apart, as early in May as possible. Owing to the late spring this year, sowing was delayed in most cases until the end of May, but by harvest time many fields were to be seen yellow with sunflowers standing ten to twelve feet high.

"The yield of sunflowers on the ten or twelve farms visited varied from eight to twenty per acre.

"Experience indicates that for the purpose of harvesting the sunflower crop, it is advantageous to have the patch sown compact, that is as nearly square as possible. Much proportion of two loads of sunflower to one load of straw, the straw will absorb the water. If the mixture is kept until winter it will make almost as good feed as the original sunflowers.

"In starting to feed the ensilage, care should be taken to start with a small quantity without any bran, as the ensilage is relaxing and for a few days will have a souring effect. This will soon disappear and the cows will take from twenty-five to thirty pounds a day.

"A few figures may be quoted as the value of the crop as a feed: During the last few months of 1919 a practical farmer fed fourteen cows a mixture of 1/2 sunflower and green oat ensilage, twenty-five pounds per day. Late in February, 1920, the ensilage gave out. He then fed a mixture of two parts commercial oatmeal, one part gluten meal, and one part bran, fifteen pounds per day per cow. The change lost him one hundred and twenty pounds of milk, or in cash \$5.10 per day. In addition he was out of pocket in the cost of meal."
