### The Tale of Perfect Time in a Watch

From Mainpring to Hairpring, between them lies the secret. The Mainpring is the power which it transmits to the active parts of the watch. The Hairpring has the control and regulates the motion. The Siting is most delicate; imagine a 1000 part of a hair. (Impossible isn't it?) Yet it is enough to interfere in its performance, so wonderful is the adjustment. The friction from accumulating dirt; lack of oil, etc., destroy these perfect fittings. Do not let your watch run to ruin from neglect. Remember our business is the care of watches, and our opinion costs nothing.
