Treesall I me.

What Is Being Done to Develop the Quartz Claims in the Vicinity.

Mineral Hill, China Creek and Other Places Where Miners Are Busily Working.

(From Our Own Correspondent.) tion of some three miles to the road from Alberni and communication for hauling supplies from Alberni to a convenient place for packing to the quartz claims, De Beaux being the centre from which the miners take the trails to the mines on Mineral hill, Williams creak. supplies from Alberni to a convenient place for packing to the quartz claims, De Beaux being the centre from which the miners take the trails to the mines on Mineral hill, Williams creek, and other places.

Mr. George Brown is superintending the completion of this road for the Messrs. Dunsmuir, who are taking in the three-stamp pony mill, built at the Albion Iron Works to test the Alberni claim ore. It is unsupported by the same gentlemen, it is understood that men are at once to be set to work to get out a fifty-ton shipment for a mill test at Tacoma.

Southeast of Mineral creek half a mile, at Williams creek, the Regina group has been located by Messrs. Hovelaque, Sam McKinnon and others. The ledges run southeast of mineral creek half a mile, at Williams creek, the Regina group has been located by Messrs. Hovelaque, Sam McKinnon and others. The ledges run southeast for some four years ago, when I was in business for myself in New York city, I advertised for a forewoman in my factory, and Williams creek the Alberni claim or the control of the leading hotels in Boston. He will be the definition of the rantece dents. Several days after C. E. Johnson, her husband, was found by a reporter at once to be set to work to get out a fifty-ton shipment for a mill test at Tacoma.

Southeast of Mineral creek half a mile, at Williams creek, the Regina group has been located by Messrs. Hovelaque, Sam McKinnon and others. The ledges run southeast of the proposition of the leading hotels in Boston. He was not visually at the Alberni of the proposition of the leading hotels in Boston. He said:

"Some four years ago, when I was in business for myself in New York city, I advertised for a foreword and are of bluish each proposition. She showed the highest references, among the owners to get the difficult to get a clue to the target of the same gentlemen, it is understood that men are at once to be set to the proposition. She had the proposition of the prop

hills seem fairly alive with prospectors and miners; one meets them all along the road from Alberni, and up on the mountain sides they are found either doing assessment work or hunting up new claims, assessment work or hunting up new claims. To see even half of the mines off China and Mineral creeks would take more time than the road and a large ledge, said to have been run and a large ledge said to have Mineral creeks would take more time than could be spared during the present trip, but enough were visited to show that the

low the site of the mill. As to the ore, the mill test already made a few weeks ago proved how rich is the mineral in the Alberni, for 3¾ ounces of gold were milled from 2,800 lbs. of rock. Even the country rock itself carries some gold. It is quite easy to pick up pieces of ore in which free gold is quite visible to the naked eye. As the ledge can be plainly traced clear up the hill through the Missing Link, and as it has doubled in width as the shaft has it has doubled in width as the shaft has been sunk, there seems no question that there must be an immense body of ore in these three claims were discovered three

enclose the Alberni group like a horseshoe, viz., the Belcher, Jack Taylor, Adelaide, Missing Link, Champion, Crown Point, Vancouver, Ophir and Last Chance. A well defined, and doubtless an extension of similar to the Alberni, and several samples were picked up with free gold showing plainly. During the coming week men are be set to work to vigorously develop the

claim, which is one of great promise. The Northern Light adjoins the Missing Link on the north, and it is believed that the vein continues right over the top of the hill into Yellowstone creek, where a numvein continues right over the top of the ber of locations have been made.

Adjoining the west side lines of the Miss-

ing Link is the Champion, owned by Messrs. George Brown and G. A. Kirk. There are three ledges showing on this property, one two feet wide, of white quartz, on the west, assays \$15; a guartz, on the west, assays \$15; a on a second, to the east, \$4 to \$15; and a third, adjoining the Missing Link, has run as high as \$800 in gold. Development work begins this week upon the claim. A well built cabin is on the mine, with a good trail running to it and a stream of cold mountain water handy. Though everything has to be packed up the mountain side, the variety of food placed before the visitor was far and away ahead of what one generally mosts in which contains the generally meets in mining camps.

The Crown Point, adjoining the Cham-pion on the east, belongs to Messrs. Geo. Brown and H. Saunders. It has a ledge two feet wide that has been stripped for 100 feet, and ore from it has assayed \$15 to

\$20 in gold.

The Adelaide and Jack Taylor, to the east of the Alberni and Chicago, are having assessment work done on them and look promising. The Belcher, south of the Jack Taylor, has a six-foot ledge from which assays go \$27 in gold. The assessment work has inget been completed at this plain. has just been completed on this claim One of the best looking claims on Mineral Hill is the Ace of Spades, owned by H. Saunders and others. It lies to the western edge of the hill ahd men are now engred in developing it.

gaged in developing it. Up the hill they have stripped the ledge for a considerable distance and have run in a cut of some ten feet. The ledge here shows up from 2 to 3 feet wide running pretty well north and south, the prevailing direction of most of the leads on the hill. The ore is a white quartz iron stained and showing carbonate and pyrites of copper A hundred feet below where the miners are working the vein shows up again in the working the vein shows up again in the creek, with small stringers coming into it from the sides. The vein on this claim is very well defined and will probably open up as depth is attained. The assays from this mine have run very high indeed, one going \$600 and others still higher. A sufficient quantity of ore för a mill test is to be sent to Tacoma

be sent to Tacoma. The Last Chance mine touching the Warspite on the southwest is one of the Quadra most widely adopted, as in most of the Mining Co's claims. A shat, has been South African countries and in a number sunk 40 feet, but no work is being done at of those of Southern Europe, consists in present and some water prevents the bot-replacing metallic money by notes which

ompany, lies east of the Warspite. The made with their people; or, at best, minute ledge shows almost two feet of white quartz, and often useless precautions must be taken which render operations very risky.

Hamilton, July 21.—T. H. Lawry, of the head and the position suggested the probability that he had fallen from assays from which have gone from \$6 to the probability that he had fallen from assays from which begin development bimetallism in the present state of things.

Hamilton, July 21.—T. H. Lawry, of the head and the position suggested the probability that he had fallen from an adjacent fence while intoxicated. Bimetallism in the present state of things. work very soon. The Quadra claim of this company is a triangular piece ground and would have the

in about 35 acres and lies between the Ophir and Last Chance.

South and adjoining the Last Chance is the Mountain Rose, owned by a Vancouver syndicate. Here the vein, a white quartz, iron stained, and carrying iron and copper pyrites with some free gold, runs east and defined on the surface, a cutting showing it to vary in width from 2½ feet to 8 or 9 inches. It has been quoted in London for the past three years at from 30d. to 33d., instead of 60.8d., which represents the ratio of 15½ to 1 formerly adopted in Europe by the Latin Union. A mass of silver bullion, equivalent to 500,000,000f. or 600,000,000f. (\$100,000,000f. or 600,000,000f. (\$100,000,000f. or \$00,000,000f. or \$00,000,000f. or \$00,000,000f. (\$100,000,000f. The Minerya Casad, owned by Mr. Wm. Dalby, of Victoria, and others, lies east of the Alberni and north of the Happy Day. A tunnel driven in ten feet has struck a 12-foot ledge, apparently the continuation

Works, to test the Alberni claim ore. It is expected that this mill will be set up and visit these claims. Assays from the ore have ready for use in a week or ten days. The gone as high, it is understood, as \$150 in as a forewoman, and our acquaintance gold. There are four men developing the ripened into love, and we were married.

been run and a large ledge said to have

been exposed.

Fourteen miles from Alberni, to the east but enough were visited to show that the country is bound to become a fine mining district with a good output of gold, and that before long.

Up Mineral hill by a good trail from De Alberni, for one of Canada's most wealthy families around them on every side spread away the mining locations of Mineral Hill. Fifteen men are employed on the Alberni for un in a tunnel through the face of the bill to tap the shaft, which has been run down 45 feet on the shaft, which has been run do four feet thick and widening. The vein still buried in snow so that only the Black runs almost north and south, and when the hundred-foot tunnel is in and the shaft mountain above the snow seems a perfect tapped it will be an easy mine to work. The tunnel is now in 35 or 40 feet and will strike the ledge some 15 feet below the bottom of the tunnel. The country rock through which the tunnel is being driven is hard, and it will be about five weeks before the tunnel can be completed. before the tunnel can be completed. A matter is quartz, iron stained, and carrying dump platform is being put in and the ore galena and carbonate of lead. It runs \$14 will be run down in a chute to the creek bein gold and silver here. A hundred feet low the site of the mill. As to the ore,

These three claims were discovered three years ago by Mr. McQuillan, and in the basin he has a neat cabin built. The Black the claim. Immediately to the south of the claim. Immediately to the south of the Alberni is the Chicago, with what is apparently the same vein, a long open cut some 30 or 40 feet long showing up the Quillan and others.

A trail from De Beaux, with only a few handred feet elevation in seven miles,

The Misslang Link, found a year ago by Mike Crawford, adjoins the Alberni on the north, and is owned by Messrs. G. A. Kirk, Geo. Brown and others. Mr. den Eagle basin In this section of Alberni of mines that in a number of mines that the following the section of Mr. Bodwell appeared for the application. Mr. den Eagle basin In this section of Alberni of mines that the following the bed of the Arm in any way inconsistent with the free and convenient navigation of the said waters."

Mr. Bodwell appeared for the application, Mr. W. J. Taylor, contra.

An affidavit by Mr. F. C. Gamble was put in in support of the application. It recited action appointed at the synod of British. claims have been staked, principally on the sides and top of the high rocky ram-parts that surmount the east, west and south sides of the basin and directly up twenty-foot cut and a ten-foot face strips the centre of the basin looking south—and the Missing Link ledge for a distance of about 20 feet. The ledge is three feet wide, snow still lies in the hollows—is situated snow still lies in the hollows—is situated the Golden Eagle mineral claim. Consid-The quartz is practically erable development work has been done on this property and the showings resulting are particularly encouraging. The principal vein of the Golden Eagle shows about three feet of banded quartz which has given good results in both the precious metals. Directly up the face of the cliff the lead runs and has been traced for a long distance. It is tapped in three places by tunnels varying in length from 40 to 60 feet. The ledge runs almost due north and south. The Raven, to the south, and a number of other claims, have been staked, but nothing has yet been done in the way

of developing them on Bledsoe creek, northwest of Mineral creek, and a strong syndicate of Vancouver business maniet. A number of locations have been extensive development work there this

A visit to Comstock hill was prevented by the forest fires that swept over the country on Saturday. This place is eight miles from Alberni on the Nanaimo road, and a number of claims have been staked out on what is believed to be the main lead which crosses the Cameron river, proceeding northwest from Mineral hill. A number of Victorians are interested at Comstock hill, and it is reported that a very wide lead has been discovered, the croppings aswhat would be a great convenience to prospectors and others would be a map of the whole district bringing up the location.

claims shown upon it. IMPOSSIBILITIES OF BIMETALLISM Another Way of Falsifying Money an

o date, for the latest map has not half the

Would Have the Same Sort of Consequences. (From the Forum.)

In the present state of things, after the experience gained, bimetallism would be nothing but falsification of money. There are several ways of doing that. The old way, now out of fashion, was that of the kings of the Middle Ages, notably of Philippe le Bel It consisted in reducing the weight and keeping the popular by the of lippe le Bel It consisted in reducing weight and keeping the nominal value the coin—a coarse attempt at the daily cheating of the people, who soon saw the fraud and revolted with curses against the kings. It was not without justice that Dante made a place for these in his In-

ferno.
The world of to-day witnesses other ways, more refined, more subtle in appearance, but not less shameless and pernicious. The present and some water prevents the bottom from being seen very plainly. With the state issues, or causes to be issued, in almost the last shot in the bottom a couple of weeks ago it is stated that a vein of white quartz three or four feet wide was struck and quite a lot of this can be seen lying on the dump. Assays from this have gone \$10 in gold.

The Ophir mine, belongine to the same company, lies east of the Warspite. The
