Did space permit, we could give many hundred such names, from all parts where the Pills have been used, but evidence even more conviccing than the certificates of these eminent public men is

actions known to the world.

As it is frequently expedient that my medicine hould be taken under the counsel of an attending thysician, and as he could not properly judge of a men's without knowing its composition, I have upplied the accurate Formula by which both my rectural and Pillia are made to the whole body of factitioners in the United States and British American Provinces. If however there should, be anyone who has not received them, they will be groundly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how the world he taken if their composition was known. Their life consists in their mystery. I have somewhere.

Their life consists in their mystery. I have no mysteries.

The composition of my preparations is hald open to all uses, and all who are competent to judge, on the subject, freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful mightine before its effects were known. Many eminent Physicians have declared the same thing of my Priks, and even more confidently, and are will fag to certify that their antispations were more than reshized by their effects upon trial.

They operate by their effects upon trial. They operate by their powerful inducate, on the internal viscera to purify the blood and stimulate it into healthy action—romove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their isocquiar action to health, and by correcting wherever they exist such derangements as are the first origin of disease.

Being sugar wrapped they, are pleasant to take and being purely vegetable, no harm can arise from their use in any quantity.

For minute directions were the wrapper on the Box.
