

Summer Complaint

Listerine is extensively employed in the treatment of various forms of DIARRHŒA occurring in children and adults. It is administered in doses of TEN DROPS TO A TEASPOONFUL, as an antidote and corrective to the fermentative and putrefactive changes taking place in the contents of the alimentary canal.

In combating serious illness, it is doubly important to be assured that the patient is supplied with genuine **Listerine**, as the substitutes sometimes offered by the trade are generally of undetermined antiseptic strength and too often worthless for the purpose for which they are required.

A PAMPHLET ENTITLED:

“**Summer Complaints of Infants and Children,**”

MAILED UPON REQUEST.

LAMBERT PHARMACAL CO., St. Louis, U. S. A.

It's the lack of fat in ordinary food that shortens the supply of fat in the body. In Scott's Emulsion the necessary element of fat is plentifully supplied in the most palatable and easily digested form. It enters the system quickly and without effort. There's no tax on the digestive organs—no strain on any part of the body.
