separate entrance apart from that used by the public and situated in the rear of the building.

The mortuary should communicate directly with the post-mortem room. The jury could view the body, if necessary, in the mortuary.

2. Room for Autopsies.—The autopsies should be performed in a large, well-ventilated room lighted partly from above. This should be furnished with a suitable dissecting table and instruments, weights and measures. Hot and cold water should be provided and there should also be a good artificial light, in case examinations have to be made at night.

It is very essential that accommodation should be provided for physicians, medical students, law students and other persons interested in medico-legal investigations, so that they may have the benefit of seeing autopsies performed. The absence of some such arrangement at present is a serious drawback to the proper education of physicians in medico-legal duties, the result of which is only too apparent throughout the country.

Provision should of course be made by which, when it is considered necessary by the judicial and police officials, an autopsy may be perfectly private and only witnessed by such persons as are officially necessary. This restriction might seldom require to be enforced, but should be left under the control of the coroner.

For autopsies which have to be held privately, or where more than one autopsy has to be held at the same time, a smaller post-morten room is required, connecting directly with the mortuary and placed in a part of the building not accessible to the public. By this means, when it is necessary to order the removal of a body from a private house in order to secure a more thorough medical examination, the friends and relatives could be a sured that the body would not be exposed to the public view.

3. Laboratory.—In connection with the autopsies microscopical examination is often necessary before an opinion
