Melodeons.

As Organs are fast superseding Melodeons in public favor, we have thought it best not to particularize on the different Styles and Prices of our Melodeons in this List. We shall, however, continue to make a limited number of Melodeons, and also keep an assortment of them in stock; therefore, we will be prepared, as usual, to supply any of our customers who may want them, with Melodeons, both Single and Double Reed. As we have heretofore made such a large variety of this class of instruments, and intend turning our attention mainly to the manufacture of Organs in the future, we do not expect to ALWAYS have every kind on hand that may be required by intending purchasers; but, with our increased facilities for manufacturing, we can, in a very short time, make any particular kind of either Melodeons or Organs (if not in stock) that we may receive orders for from our numerous friends and patrons.
