

## THE No. 2 BROWNIE DEVELOPING BOX.

May be successfully operated by any Boy or Girl.

The No. 2 Brownie Developing Box is a modified form of the Kodak Film Tank, so simple as to be successfully operated by any boy or girl.

The No. 2 Brownie Developing Box is a metal box fifteen inches in length, just long enough to accommodate a roll of No. 1 or No. 2 Brownie film.

To develop, the roll of film is inserted in the spool carrier, and by means of a cord and winding shaft, unrolled and carried around a roller bearing, thus exposing it to the action of the developer.

Before unrolling the film the developer is poured in the box and the cover put in place. The film is unrolled by turning the crank. Then the box is rocked on its standard for six minutes. The developer is poured off and box filled with water to wash out developer, after which film is removed and fixed in daylight.
