good roads was left over. a similar act last year for Middlesex County having proved unsatisfactory, and a special act of the government necessary to supplement such a bill.

CAUSED BY SPREAD RAIL.

Inquest Begun Into Saturday's Awful Wreck on the N. Y. C.

New York, Feb. 19.-The fact that a spreading rail caused the wreck of the White Plains express on the New York Central Railroad Saturday night in which twenty-one persons were kliled, was developed at the coroner's inquest to-day.

The New York Central's engineer of bullets penetrated the of the clerk and treasurer was raised tifled that he found that the end of naintenance of way. H. S. Beilist, tesone of the rails on the outside of the Yonge-street and Eglinton-avenue will curve at the point of derailment had be removed. The clerk will write to the five inches. A tremendous force must have been exerted upon the rail to cut Councillors Brown, Brownlow, Douglas off the head of the spikes, but he did not know whether the speed of the train would have been sufficient. Francis Boardman, a division engineer, said that the curve was constructed on estimates of a weight of

tons per 27 feet, going at the rate of 60 miles per hour. Engineer Rogers said his instructions were to maintain schedule time, but not to exceed it when trains were late. At the time of the accident his was four or five minutes late. He had been running at a top speed, but had reduced the power at two curves and was going 45 to 50 miles an hour when the cars jumped the track.

Henry E. Wood, assistant editor of Harper's Magazine, a passenger on the wrecked train, testified that it passed thru the Bronx at a frightful
