

THE ANATOMY OF MAN'S BODY

AS GOVERNED BY THE
TWELVE CONSTELLATIONS ACCORDING TO ANCIENT ASTROLOGY.
Head and Face ☽

To know where the sign is, first find the day of the month in the calendar page, and against the day in the sixth column, you have the sign or place of the moon; then find the sign here; and it will give you the part of the body it is supposed to govern. The idea that the Moon's Place or the signs, have any effect on the human body ought not to be believed.

THE WEATHER.

It is but just to state to the public, that they knew as much about the weather for the coming year as we do. No Mathematician or Astronomer, however able in his profession, can possibly "cipher out" the weather. When such predictions are seen in Almanacs, they should be regarded as mere guess work, entitled to no confidence, and as likely to fail as to be true.
