Tuesday Evening, July 5.
The local mining exchanges to-day experienced one of the dullest sessions which has been witnessed for gestion of buying or selling orders over the week end, and the speculative movement thruout was about as narrow as could be.

The general tone of the market was soft, and some of the active issues

sold off, there being practicaly nothing on which to hold values. on which to hold values.

Little Nipissing dropped back to 15 1-2, a loss of over a point from the previous sale. Cobalt Lake reacted from the opening price, and Timiskaming was also easier, declining a point during the session and closing around the bottom. Beaver and Peterson Lake were fractionally easier. The higher priced Cobalts were not traded in to any extent, and there was no material alteration in quotations in this section of the market. SILVER MARKET.

Mocatta & Goldsmid, London, Eng. write under date June 24: Silver has again been a very steady market, and the only fluctuations have been in the relative quotations of cash and forward. Altho stocks in London amount to nearly f1,500,000, very little of this is available, as the greater part is held by the bulls who appear to be taking up their purchases. The news of the rains in India continues to be favorable and the official forecasts predict a normal mensoon. A good season has, however, been so confidently anticipated and so largely discounted that at present the favorable weather conditions are having no ffect on the market. China has been isappointing; the tendency there, as far as any has developed, being to-wards weakness, and they have tried to effect a few sales in Bombay.

COBALTS 60 DAYS DELIVERY

There is a great opportunity at the present low prices to buy Cobalts for delivery two months hence. A premium has to be paid on the cash prices, but two months give a latitude for a rally in the market and profits can be made by those who deal in this way. Purchasers on these contracts deposit 25 per cent of the cost of purchase in cash or listed shares. We buy either for future delivery or cash any of the Cobalt Stocks, and also deal in all unlisted securities.

wheat crop, which cannot fail to mean higher prices.

Corn—Some moderate rains in Eastern Nebraska and Western Iowa, with scattered showers in this state, seemed to allay fears of drought, and prices responded rather feebly to strength in other grains. Trade was light early, with professionals still on long side. New buying after noon caused further upturn. We would keep away from the short side.

Oats—Prices followed wheat more closely than corn. Northwest houses were buyers, as were also elevator interests. General condition of crop, barring northwest, was good.
