

LECTURES.

Special courses of lectures will be arranged upon various subjects bearing upon the curriculum of the College. These lectures are intended to broaden, liberalize, and improve the reading of the students and the instruction received in the Class Room from their teachers. They will be delivered chiefly by the Professors of McMaster University.

FACILITIES FOR INSTRUCTION IN THE NATURAL SCIENCES.

The Science Class-room is furnished with all appliances necessary for purposes of experiment and illustration.

The chemical laboratory is well lighted and ventilated. It has accommodations for twenty-four students. Every precaution has been taken against accident and danger. All necessary apparatus for the study of the elements of Chemistry is provided. All students pursuing this subject will have the advantage of doing practical work under the immediate direction of the science teacher.

DEPARTMENTS OF MUSIC AND ART.

Music and Art are recognized as important means of education. As such they have a place in the curriculum of the College, though they are not allowed to interfere with its general educational work. Provision is made for the regular College classes, by which either Music or Art may be pursued throughout the course by taking a year's extra time. Those admitted as Special Students may devote themselves largely to these departments, taking, however, one full study besides and the Bible work.

The Music is in charge of the resident teachers in music, and under the control of the Faculty and Principal. Assistant teachers are provided, as needed, on the concurrence of the Principal and Chancellor. Students in music are admitted to the occasional lectures in acoustics in McMaster University without extra charge. Suitable opportunities are afforded students, under the charge of their teachers, to hear visiting musical artists of distinction. It is the desire of the Senate that the subject of music shall be so treated as to render its influence a valuable auxiliary in strengthening character, and securing the development of higher spiritual impulses.
