Statements made by Dr. John Fraser, Chief Obst. & Gyn.,
Royal Victoria Hospital, Montreal, Canada.

Quote:-

"I have never used anything so effective for the clearing of common colds and sore throats etc., as EUCOZONE. For years I have been preaching and insisting on the use of prophylaxis and germicides to guard against infections, and readily admit that both the medical and nursing staff are guilty of spreading these conditions.

Every day, every M. D. connected to the Hospital, passes my office and either drops in or is called in, and I never miss the opportunity of introducing the virtues and merits of EUCOZONE.

I called a meeting of the medical staff and I strongly emphasized that each and every pre-natal case--every expectant mother should be warned more severely than ever against "Catching Cold". I held up a bottle of EUCOZONE capsules, outlined the therapeutic value and told them of results to date, and suggested they memorized the name, and see that their patients had the benefit of this product. I have demanded its routine use in outdoor departments and pre-natal clinic, and each and every member of the hospital, doctors, internes, nursing staff, etc, should be using it when and as necessary." Unquote.
