This book presents tested plans that work, not untried theories. Its suggestions are practical, concrete, and usable.

It tells how to plan the missionary work in the local Sunday-school, and then how to work the plan.

It shows how to master difficulties.

There are 38 charts and diagrams capable of reproduction, scores of pithy sayings for motto use, and a most complete list of missionary books classified for readers of different ages as well as by topics and countries.

The book is invaluable for the Superintendent, and for the Missionary Committee of the Sunday-school.
