17th. December, 1905.

Gentlemen:-

Re Smith Mixer.

We are sending you herewith a photo showing a No. 5 Smith concrete mixer working on factory buildings and hydraulic power-house for the Northern Aluminum Co.

On the factory buildings the mixer was loaded by carts and the concrete drawn away in wheelbarrows. On the Power-house work the mixer was loaded by an orange peel bucket and the concrete taken away in dump bottom buckets handled by derricks.

With the latter arrangement we can easily get out 30 yards an hour and have repeatedly made 12 yards of A No. 1 concrete in 15 minutes.

We believe the Smith to be the best mechanical mixer made and will be glad to say a good word for these machines at any time.

Yours very sincerely
