ULRICH'S Illinois Mammoth White ENSILAGE

CORN is what you want for ensilage purposes. It stands more dry weather and will produce

MESSRS. E. R. ULRICH & SON. Springfield, Illinois Gentlemen,—
In reply to your favor of March 37th, beg
to say that the WHITE ENSILACE
CORM that we planted last spring,
from which we grew such heavy crops of
Ensilage, was seed we purchased from you,
and I have no objection to your making
use of the fact in advertising your corn.
I inclose a printed circular. I had so
many enquiries asking what seed I planted, and how I cultivated my corn and
saved it in silos, I had not time to answer
so many letters, and so had some printed.
Also one on the silo.

Yours truly, (Signed) E. D. TILLSON.

Tilsonburg, Ont., 4-1-96,

more ensilage on poor or good soil than any we know of. Ask your seed dealer there for it, and use no other. It is endorsed by some of the best seedsmen throughout Canada. Don't let them press you into using any other, but insist on having your

seed dealer show you our book of testimonials and invoice dated this season. It will pay you.
Also ask for our Yellow Dent,
which is very choice. Our sales this year have been very heavy.

E. R. ULRICH & SON,

Springfield, Ills.

The American Jersey Cattle Club Annual Meeting.

Annual Meeting.

At the annual meeting of the A. J. C. C., on May 6th, Mr. E. A. Darling, of New York, was re-elected president; Hiram Hitchcock, treasurer; J. Hemingway, secretary; Valancey E. Fuller, special agent; and the following directors were chosen: Messrs. H. A. Huntington, Tennessee; Nathan Robins, of New Jersey; G. V. Green, of Kentucky; Heulings Lippincott, of New Jersey, and Geo. E. Peer, of New York.

The Treasurer's report showed that the receipts for the year were as follows: Membership fees, \$1,000; sales of register and text books, \$640; entry fees for bulls, \$7,592; cows, \$18,936, which, with other receipts, amount to \$41,306 69. The expenditures for the year have been \$39,273.85, which left on March 31st, 1896, a balance of \$2,032.81.

A committee was appointed to suggest some changes in the by-laws. The report of the special agent with regard to the Randal Litsey matter — forgeries and irregularities — was accepted and approved. An addition to be made to the premises of the Club was authorized. A resolution looking to some means being adopted for the better identification of cattle registered than the mere markings was passed, referring the matter to the Board of Directors. The Secretary was instructed to enforce strictly the by-law with regard to the giving of date of service in all cases, and not to record any transfer or entry after May 1st, 1897, on which the service is given as being "in pasture."

It was one of the largest meetings of the Club that has taken place for years, and great enthusiasm prevailed, reflecting the growing interest in Jersey cattle and the increased demand for them which has taken place the past few years.

Shorthorn Dairy Record.

Shorthorn Dairy Record.

The Executive Committee of the American Shorthorn Breeders' Association, to which the matter was referred, has approved a plan for the establishment of a Dairy Shorthorn Record. An average yield of 200 pounds per year of butter being assumed as a reasonable and workable basis, a female must have produced at least one pound per day for seven consecutive days, as shown by the Baboock test, supervised and certified to by duly authorized representatives of the various experiment stations, in order to be eligible for registration. In the case of bulls, it is recommended, to begin with, that "all sons of tested cows and all bulls that have not less than five tested daughters accepted for registry be admitted."

The Committee also recommend as foundation stock, without further test, all cows that participated in the Columbian dairy competition, and of all cows that bear on prizes offered by the American Shorthorn Breeders' Association for dairy animals of this breed at agricultural fairs.

Another recommendation is to the effect that as soon as the standard of admission be adopted and satisfactory assurances have been received from experiment station officials, the Secretary of the Association be directed to issue a full statement as to the basis of the proposed record, its objects, etc., and mail a copy of same to every member of the Association, and to all other interested parties who may apply for same. The onus of making the Dairy Record a success will then rest with the breeders themselves.

A number of gentlemen in England, desirous

ers themselves.

A number of gentlemen in England, desirous of keeping the dairy qualities of Shorthorns well to the fore, have organized a fund, offering a £10 prize to each of eighteen different show societies for the best dairy Shorthorn cow or heifer, the societies to give a second £5 prize.

GOSSIP.

A prominent man in scientific agricultural circles has recently passed over to join the great majority, in the person of Mr. John M. Denton, of London, Ont. This highly-esteemed gentleman, who followed mercantile pursuits, lived for a number of his early years upon a farm in Northumberland, Eng. He was one of the early members of the Ontario Entomological Society, in which he always took a lively interest. Mr. Denton also took a deep interest in fruit culture and other lines of horticulture, upon which he was frequently called to address agricultural meetings. He was for years a director of the Ontario Horticultural Society.

director of the Ontario Horticultural Society.

THE SPRINGRIDGE HERD OF POLAND-CHINAS.

In founding his herd, the proprietor of Springridge Stock Farm, Mr. William J. Duck, of Morpeth, Ont., has embarked in the breeding profession in such a manner as should lead to certain success as a breeder and exhibitor, providing judgment and care are used henceforward, as we are sure will be the case, judging from the first selections and the enthusiasm evinced in the breed of his choice. Believing that the best is none too good, Mr. Duck, in establishing his herd, purchased from the Messrs. Jones, of Mt. Elgin, Princess #773—, one of their choicest young sows in 1994, a winner of first premium at all the leading Canadian fairs last year, viz., Toronto Industrial, Montreal, Ottawa, and Guelph Fat Stock Show. She has matured into agrand sow; has plenty of size, good bone, and is full of quality. She was sired by Ella's Moore #460—, and is out of the grand sow Comparison #600—, she has now had her second litter for Mr. Duck, and is proving herself of the right sort as a breeder, and as like begets like, she is also producing winners; she, with her daughter Blanch and a fine young boar, also from her, being winners of twenty first premiums and two seconds in 1895. The above two sows are now nursing litters of little beauties, out of Blackamoore, a grand young boar, now about a year old, recently imported from the herd of M. F. Sterling, U. S., to head the Springridge herd. Blackamoore is a typical Poland and a winner of first premium in his class, and one of a first prize pair at Mercer Co. Fair, Ill. He is out of one of Mr. Sterling's Choice 3830, and sired by John Lynn 11337. Therefore, parties desiring young pigs of choice individuality and the best breeding should note Mr. Duck's advertisement and send in their orders early, as young pigs bred from such choice individuals on both sides will undoubtedly go quickly. THE SPRINGRIDGE HERD OF POLAND-CHINAS.
