DE LAVAL CREAM SEPARATORS

ARE THE MOST SANITARY

The up-to-date De Laval Cream Separators excel other separators not only in thoroughness of separation, ease of running, simplicity and durability—but as well in the important feature of being the easiest cleaned of all cream separators and the only cream separator which is thoroughly cleanable under ordinary every-day use conditions.

The modern De Laval Separator Bowl is completely unassembled in cleaning and every part is smooth, visible and easily reachable, without hinge, tube, pocket or crevice anywhere. The whole bowl is washed thoroughly in a couple of minutes.

The frame is smooth and free from recesses, and every part is as accessible and thoroughly cleanable as the bowl itself. The gears and bushings are protected from milk or water reaching them, and there is no slop under or around the machine.

QUALITY OF CREAM AND BUTTER DEPENDENT UPON SEPARATOR CLEANLINESS

An unclean separator bowl or filthy separator frame necessarily means a bacteria infected and inferior quality of cream. Buyers of farm separator cream and buttermaking authorities generally are constantly emphasizing this point.

One of the prizewinning creamery buttermakers at the last National Dairy Show recently wrote us:

"We are sorry for the use of so many 'mail order' and other inferior separators in our territory. It seems to be almost impossible to clean them, even though the farmers do try—and a good many of them don't even try. We wish you could do more missionary work to get these rotten separators out of the country. It is impossible for any buttermaker to make good butter from spoiled or tainted cream."

Any De Laval agent will be glad to take a modern De Laval machine apart for you so that you can see for yourself its simplicity and sanitarianess of construction and how much more easily and perfectly it may be cleaned than any other separator.

Standard Wire Fence

Here's the Fence That is all Steel—
Steel wires, steel locks, steel posts. Standard Woven Wire Fence is all No. 9 hard steel wire, well galvanized. "The Tie That Binds" is hard, smooth steel that holds uprights and running wires absolutely secure without injury. Standard Patent Posts are 12 gauge steel, bent at right angles, and so constructed that wires are held without staples. Let us tell you a lot of other things about the Standard Wire Fence and our Metal Gates of Galvanized Tubing. Our locks are full of fence facts. Write for free copies and sample lock.

BEST RESULTS ARE OBTAINED FROM ADVOCATE ADVERTISEMENTS.

Don't Treat Your Farm Like A Gold Mine

Don't take everything out—and put nothing back.

Every crop you take off a field, takes with it some of the valuable Potash—the Nitrates and Phosphates, that are indispensable for successful farming. And these essential ingredients of the soil, must be replaced if you want to make farming pay.

Treat your farm—not as a mine—but as a factory.

Fertilizers are the raw material—soil is the machinery—and wheat, oats, corn, barley, hay, turnips, beets, fruit, etc., are the manufactured products.

You must keep the soil right, by proper fertilizing to produce crops that pay profits.

Vanco Straight Fertilizing Chemicals

will double the yield of Wheat, Potatoes, etc., compared with unfertilized crops.

MURIATE OF POTASH

—guaranteed 50% actual Potash

SULPHATE OF POTASH

—guaranteed 48% actual Potash

NITRATE OF SODA

—guaranteed 15% Nitrogen

ACID PHOSPHATE

—guaranteed 14 to 16%

Write for the "Vanco" Book—it will give you tables for mixing Fertilizers and the proper proportions for each soil and crop. 46
