

ALL SORTS OF NEWS

Gerald Upton Had a Most Thrilling Escape From Death.

COLORED MAN IN TROUBLE

He is Accused of Stealing a Horse—The C. P. R. Will Construct a Railway This Summer Through the Lardo Country.

Trail is talking of incorporating. Nelson may soon have a street railway system. The British Electric Traction company has applied for a franchise to the council of Nelson.

Chief of Police McKinnon a day or two since arrested two stowaways on the Canadian Pacific railway barge upon the charge of stealing a lady's watch at Kootenay Landing. They gave their names as J. Burton and Joseph O'Hara. The watch was recovered in the hold of the barge in which the men made the trip from the Landing.

Gerald Upton, of the B. C. M. & M. syndicate, met with an experience a few days since, says the Cascade Record, which is being fatal by the fracture of time and space. He had been out hunting with Mr. Mayall, and in descending a precipitous portion of the mountain behind Graham's, found the rock giving way underneath him. Six feet below a narrow ledge, and beneath that a sheer precipice of 600 feet. He used his foot to wedge back the rock, and being absolutely unable to return or move forward without meeting inevitable death, called to his companion for assistance. This was supplied by wedging in a stone in place of his foot, and allowed him about half a second in which to make a dangerous spring sideways on to the ledge beneath. Instantaneously the rock, weighing about 400 pounds, followed by smaller pieces, slid downward, and falling within feet of Mr. Upton's head, thundered down the mountain side, to find rest 600 feet below. As his companion remarks: "Upton came about six inches off being an angel, and will never be nearer death until he is in his coffin."

An opposition daily stage line has been organized to run between Rossburg and Grand Forks. Spokane capitalists are backing the enterprise. Gladstone now has a postoffice. As soon as the snow is off work will begin on the trail which will be built to Norway mountain, a distance of six miles, connecting with the trail to Rossland. The work is to be paid for by Gladstone's business men, who will thus secure considerable additional trade.

Duncan Ross has disposed of the Greenwood Times to R. E. Gosnell. A trapper named O'Brien shot a silver tip bear near Peter's on the Brooklyn wagon road this week.

Walter Bell, a colored man from Cascade, was arrested at Grand Forks on the charge of having stolen a horse day on the charge of having stolen a horse belonging to John Ashfield, says the Grand Forks Miner. Bell rode the stolen horse into Grand Forks, and Ashfield, recognizing it, swore out a warrant against Bell. Bell claimed to have purchased the horse from a man by the name of Jim McDonald at Cascade, and produced a bill of sale signed by McDonald to substantiate his statement. He was taken up for preliminary examination and remanded until the next day, being released on bail in the meantime. Constable Darragh of Cascade was telephoned regarding the sale, and McDonald, the man whom it is claimed sold the horse, and replied that such a man had been in Cascade, but had left recently, supposedly for Republic, Wash.

Some weeks ago the Miner predicted that the C. P. R. would soon commence construction of the road from the head of Kootenay lake to Arrowhead, and that the work would be completed by the end of the season. This prediction proves correct, as R. Marpole, superintendent of the Pacific division of the C. P. R., informed the Miner that construction will commence the latter part of this month. Mr. Marpole arrived in the city last evening accompanied by H. J. Campbell, chief engineer of the C. P. R. for the Pacific division. They left this morning by special train for the head of the lake, and will meet the engineers that are now at work in the Lardo country. It is expected that the company will know just what it has on hand. Contracts will be let as soon as the necessary arrangements can be made.

MICHIGAN COPPER MINES. They Do Not Get Lateral With Increased Depth. Natural interest is felt in recently published assertions in eastern papers that Lake Superior copper mines are growing larger with depth, and decreasing in ore value as the workings go down. Apart from the inevitable "working" of street, or any statement and with any argument to pick up or down, the matter is one deserving notice on general grounds. If Michigan copper ore veins grow poorer with increased depth, the fact is of interest to copper miners everywhere. It has been generally assumed that at the depth of a mile below the surface some Lake Superior copper mines showed no exhaustion of quantity nor any diminution in value, and that the downward limit of profitable working could be determined only by the degrees of heat in sinking on any amygdaloid lode. Such view, while attacked, has not been overthrown, and the arguments directed against it seem susceptible of contradiction. The chief argument advanced by those who claim that Lake Superior copper mines are getting out is an array of figures showing increased percentage of copper in the ores mined and milled in the Tamarack, Adirondack, and other mines as compared with 1887, 1888, and 1876. While this certainly would, by itself, seem to substantiate the claim of decreasing values, yet every miner knows that unless accompanied by full and accurate details, such data are of no value. Such figures may upset the street, may bull or bear the stock, but in the absence of corroborative showing no miner will consider the question more than raised. Assuming, for the sake of argument, that everything claimed by the published figures referred to may be so, they prove nothing. True, they suggest that as the workings extend downward the ore is poorer, and thus directly imply that a limit will be reached where the ore contains insufficient percentage of copper to pay for extraction. But the question so important to the copper miner everywhere—does the ore give out at great depth?—is not answered. Indeed, it is probable that there were full and exact data forthcoming, the truth would be apparent that so many other things enter into the problem as to indicate that the reverse of the assumption was in line with the facts, and that the ore averages were up to former standards. "Averages" are referred to in a letter to the Boston News Bureau who writes: "The increasing or decreasing value of a great mine can be rightly determined in such enormous depths as those attained in the Lake Superior mines as to the picking out of the work of isolated years constitutes misleading comparison. Take, for example, the Quincy mine, one of the three mentioned. In J. Stevens, a well-informed local correspondent, shows that the Quincy mine was merely a fair one to a depth of 1,000 feet. From 1,000 feet to 1,200 feet the rock was so lean that it did

not pay for stamping. Below the 1,200-foot level the mine became far richer than ever before, and has remained so, to the present depth of approximately 4,500 feet." He also brings up a factor of considerable importance in showing that in that district closer milling is now the rule. "It costs but one-half to two-thirds as much money to stamp a ton of rock as it cost ten to twelve years ago, thanks to improved machinery and methods. This enables mine managers to stamp rock at a profit which by reason of the paucity of metal must have been discarded one or two decades ago. This reduces the percentages from rock stamped, but increases the percentages from rock mined." Regarding another of the mines mentioned, the Atlantic—it is further in evidence that in that mine every pound of rock from wall to wall, about 85 feet across, goes under a mill, and it is manifest that when so much inevitably poor rock thus goes through, the percentage of copper to the ton stamped must be inevitably low. The case seems in some respects parallel to that of so many California gold-quartz mines that, though now paying handsomely, were at one period on the point of abandonment because they did not "go down." So far as observable, there is nothing in the present onslaught on the Lake copper mines stock to warrant cessation of downward operations on copper properties.—Mining and Scientific Press.

WILL NOT BE PRESSED

Practically Decided That Kettle River Bill Is Not to Come Up.

So Says Mr. Wainwright of the Grand Trunk—The Government Will Not Take a Stand.

Ottawa, April 22.—After all the fuss that has been made, it is now practically decided that the Kettle River Valley bill will not be brought before the house this session. Mr. Wainwright of the Grand Trunk, said today that the C. P. R. had put up a big lobby against the measure and the chances of getting the bill passed were extremely small. Some say the government is not prepared to take a definite stand on the bill, and it is known that certain liberals who voted for the charter last year have changed their views and would vote against this year. Of course, there may be some who would act the other way, but it is pretty evident the bill will not be pressed.

Triumphs and Successes

When the Diamond Dyes Are Used.

Beware of Imitation and Adulterated Dyes.

They Blast Your Expectations and Destroy Your Goods.

Thousands of pleased and satisfied women write about their successes and triumphs with the Diamond Dyes. Mrs. M. Constantin, of St. Eustache, P. Q., writes as follows: "It is with pleasure that I tell you of my success with Diamond Dyes. A few days ago I dyed an overcoat with your dyes, and the result was marvellously pleasing and satisfactory."

THE CORBIN CHARTER

Application Not Likely to Be Introduced This Session.

Strong Feeling in Favor of It Worked Up in the East—The C. P. R. Interests Its Only Opponents.

Ottawa, April 22.—[Special.]—Information has been received here that D. C. Corbin, or his counsel E. V. Bodwell, will not be able to get to Ottawa this session in connection with the Kettle River railway, and it will not be possible to proceed with the bill asking for a charter in their absence. Under the circumstances, Bodwell will not be likely to introduce it. A strong feeling has been worked up in the Ontario press in favor of the bill, and with the almost unanimous sentiment in support of it in the west, the bill would be almost certain to pass the house. The only opponents to the bill are the Canadian Pacific interests. Corbin and Bodwell are detained in connection with the Iron Mask-Conte Star lawsuit in Rossland.

True Spring Health

Paine's Celery Compound

The Great Disease Banisher and Life Giver.

Used by All Classes and Prescribed by Honest and Able Physicians.

Paine's Celery Compound makes people well in spring time. It is so far superior to the ordinary medicine, sarsaparilla and pills as strength is better than weakness.

Paine's Celery Compound is a spring medicine has the entire confidence of our best classes of Canadian population. Nothing more decisively proves the worth, popularity and universal use of the great medicine than the fact that it is now used by our best physicians, people who formerly relied upon the best medical skill.

Paine's Celery Compound in spring time builds up the broken down nervous system, purifies the blood, regulates and perfectly tones the whole digestive system, gives a relish for food, and bestows all needed vitality and bodily strength.

Paine's Celery Compound today is prescribed by the foremost physicians for the cure of kidney and liver troubles. It is invariably successful in its work, making men and women well when they have failed with other medicines.

Now is the time to use the marvellous compound if you desire new blood, new strength, and new life for the work and duties of approaching summer. Paine's Celery Compound has done wonders for your friends and neighbors; you need the same never-failing medicine for your case. If you would be cured do not be persuaded to try a substitute.

HOTEL FIRE IN ROSSLAND

The Deadly Queen Stove and Accompaniments the Cause.

Efficient Work of the Fire Department Prevents Much Heavier Loss—\$1,900 Limit of Loss.

Shortly before 11:30 Thursday morning, April 20, a passer-by noticed that the corridor on the second floor of the Florence hotel was on fire and warned the proprietor of the fact. Instead of at once notifying the department the people around the house endeavored to put out the fire themselves and it was not until it was evident that their efforts would prove futile that the fire department was called upon. They were promptly on hand and quickly extinguished the flames on the second floor. In the meantime the flames had mounted to the attic, which was in a blaze, and it was some time before it could be reached, but the bravery and good discipline of the men, and the efficient direction of Chief Guthrie and his assistant, Charles Collins, overcame every obstacle and the last spark expired about 12:15 p. m.

The cause of the fire primarily was a queen stove, as usual, but to the person in charge of the stove, and to the stove pipe to the sides of the corridors, on which men's clothing was hung to dry, the fire may be most fairly attributed. This practice will be stopped by Chief Guthrie. In this case the wings were full of clothes, a heaping, rousing, roaring fire had been built and that part of the building left to take care of itself, which it did, to the owner's loss. Some of the things caught fire and spread rapidly along the lines to the wooden partition, which was very dry, and the whole place was in flames at once.

Chief Guthrie speaks in the highest terms of the aid given by the chief of police in keeping the crowd away, and of the zeal, ability and prompt obedience to orders shown by the men. In this matter the letters read at the meeting of the committee—Sir: I beg to report that I have confidence in Charles Collins that he will do his duty in every respect and find that he takes a keen interest in everything pertaining to the good and welfare of said department.

Dan McDonald I find a good, reliable man for the position now open. Relative to the five men whom I appointed on the 1st instant I find that, after 17 days trial, they are sober, industrious, and steady, physically and otherwise well qualified to make good firemen.

I would suggest that the contract for uniforms be granted as soon as possible, in order to have the department in uniform by May 15th, which is the date of the total loss to the building and contents is from \$1,000 to \$1,200, and there is an insurance on the building proper of \$500.

BACK AT HIS DESK

W. A. Carlyle, Superintendent of the B. C. C. Can Walk Now.

The many friends of W. A. Carlyle, the well-known superintendent and geologist of the British American corporation, will learn with great pleasure that he has so far recovered from the effects of his recent accident that he walks daily to his office and remains there in the business. The details of the accident, which happened seven weeks ago last Wednesday, are well remembered in the city. Mr. Carlyle was coming out of the Victoria Hotel, and was struck by a car on his back, and fractured the top of his knee.

He was conveyed home and put under the care of Dr. Richards and Dr. Fry, with the assistance of Drs. Senior, Reddick and Campbell, the former reduced the fracture and bound the fractured parts together with silver wire. It was feared that the injury was of a serious nature, but the fact that he can now walk without crutches to his office attests the excellent work of the surgeons and the cheerful manner in which Mr. Carlyle has borne his misfortune.

NELSON ASSIZES

No Less Than Three Murder Cases on the Docket.

There will be three murder cases before Mr. Justice Irving at the Nelson assizes. It is likely that another attempt will be made to convict Antonio Bruno, who has been charged with the murder of a woman, which went over from the last assize, will come on again. Then there is the recent Cranbrook murder in which an Italian named Faldon was charged with another Italian named Merico with being an accessory after the fact. The other criminal cases are W. D. Brewster of Trail, for the Mary Mallette for keeping a gaming house; A. D. McGinty, the Sandon man, who started in to run the Chinese out of the Slokan; Joseph Henager of Rossland, for incest; Barrett for conspiracy to defraud, and Davies for theft.

BUILDING PLANS EXPECTED

Rossland Contractor Will Have Preference on C. P. R. Buildings.

F. P. Gutelius, superintendent of the Columbia road, was up from Trail on Friday last and stated that the ties for the broad gauge were distributed along the track and that the rails had arrived. Trail and that tracklaying will be begun just as quickly as the frost is out of the ground. The plans for the station buildings are being expected daily, and when they arrive bids will be called for from Rossland contractors, and the contract will be awarded to a Rossland firm if the figures offered are in any way reasonable.

Help For the Helpless.

Rev. D. McG. Gandler on Thursday started out to raise funds for the family of Paul Schmitz, whose home was recently destroyed by fire, and met with better success than he anticipated. The reverend gentleman reported last evening that he had raised \$60.50 in cash, besides contributions of clothing, and other articles. Those who contributed were the following: G. H. Bayne, \$5; John M. Smith, \$5; Harry Mackintosh, \$5; J. S. C. Fraser, \$5; James Brothers, \$5; Alexander Dick, \$5; J. B. Johnson, \$5; A. S. Goodwin, \$5; J. M. Martin, \$5; Ross Thompson, \$3; W. N. Dunn, \$2; W. J. Oliver, \$2; J. Murphy, \$2; J. H. Langman, J. H. Young, J. M. Miller, G. W. McBride, Dr. Coulthard, Angus McNish, A. B. Barker, C. A. Jordan, and others. Lockhart Jones contributed a new bedstead, W. F. McNeil shoes for the children, A. C. Fry, Empey Brothers and Brynton & Morrison each a lot of groceries, D. D. Birks bread and Mrs. Thomas Armstrong a pair of blankets, quilts, etc., and a friend a mattress bed. Those who have children's clothing, and are willing to help this family, should send them to Rev. McG. Gandler as soon as possible.

D. M. Linnard, the well known mining broker, arrived back yesterday from Republic camp.

Certificate of Registration of an Extra-Provincial Company.

"COMPANIES ACT, 1897."

St. Clair Gold Mining Company.

Registered the 6th day of March, 1890. I hereby certify that I have this day registered the St. Clair Gold Mining Company as an extra-provincial company under the "Companies Act, 1897," and to carry out or effect all or any of the objects hereinafter set forth, to which the legislative authority of the Province of British Columbia extends.

The head office of the said company is situate in the city of St. Clair, State of Michigan, U. S. A. The amount of the capital stock of the company is fifty thousand dollars, divided into two thousand shares of the par value of twenty-five dollars each. The head office of the company in this Province is in the city of Rossland, and E. W. Liljeström, mining engineer, whose address is Rossland, is empowered to issue or transfer stock, as the attorney for said company, this sixth day of March, one thousand eight hundred and ninety-nine.

The objects for which the company has been organized are: To carry on the business of mining, smelting, and reduction of ores of all kinds; to buy, sell and deal in mines; to buy, sell, lease, or bond mines and mining properties, and generally to deal in and handle mines and minerals of every description within the United States, the Province of British Columbia, or any other foreign country, and to carry on the production or handling of metals and minerals, and to do all things necessary or expedient in connection with the foregoing objects, and to carry on any other kind of business authorized by the act under which the company is organized.

Given under my hand and seal of office at Victoria, Province of British Columbia, this sixth day of March, one thousand eight hundred and ninety-nine.

S. Y. WOOLTON, Registrar of Joint Stock Companies.

NOTICE

The Columbia and Western Railway company will apply to the parliament of Canada at the next session for an act giving to the company authority to issue first mortgage bonds to be a charge on its railway, including its main line and branches, not exceeding thirty-five thousand dollars per mile thereof, and for other purposes. H. C. McNEIL, General Manager, Montreal, March 7th, 1890 3-7-90

Certificate of Improvements.

Black Prince, Queen of the Valley and King of the West mineral claims, situate in the Trail mining division of West Kootenay district, where located—At the confluence of Bear creek with Columbia river. Take notice that I, J. A. Kirk, acting as agent for the Black Prince Gold Mining & Milling Co., Ltd., free miner's certificate No. 12,165A, intend sixty days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 24th day of March, 1890. 37-104 J. A. KIRK, Registrar-General.

Certificate of Improvements.

Ruth Fraction mineral claim, situate in the Trail Creek Mining division of West Kootenay district. Where located: On Sophie mountain, south of Victoria, British Columbia. Take notice that I, Kenneth L. Burnet, (as agent for the Ruth-Ether Gold Mining Company) intend sixty days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this thirtieth day of March, 1890. 37-104 KENNETH L. BURNET.

Certificate of Improvements.

Bean Pot and Forest King mineral claims, situate in the Trail Creek Mining Division of West Kootenay district. Where located: On the west side of O. K. mountain, within 500 feet of Mineral Monument No. 28. Take notice that I, Kenneth L. Burnet (as agent for the Bean Pot Gold Mining Company of Spokane, Wash.), free miner's certificate No. 12,165A, intend sixty days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this sixth day of April, 1890. 4-6-101 KENNETH L. BURNET.

Certificate of Improvements.

Red Fox mineral claims, situate in the Trail Creek Mining Division of West Kootenay district. Where located: About three miles east of Rossland, B. C., on the line of the Columbia and Western Railway. Take notice that I, Wm. E. Devereux, acting as agent for W. D. Townsend, free miner's certificate No. 12,165A, intend sixty days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 13th day of March, 1890. 37-111 WM. E. DEVEREUX, P. L. S.

Certificate of Improvements.

Ruth and Esther mineral claim, situate in the Trail Creek Mining division of West Kootenay district, where located: On Sophie mountain, south of and adjoining the Victory-Triumph mineral claims. Take notice that I, Kenneth L. Burnet, (as agent for the Ruth-Ether Gold Mining Company) of Spokane, Wash., free miner's certificate No. 12,165A, intend sixty days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this thirtieth day of March, 1890. 37-104 KENNETH L. BURNET.

CHANGE IN C. P. R. TIME.

The Train Will Soon Leave in the Morning. It is stated on good authority that a change in the schedule time of the Canadian Pacific railway will be inaugurated very shortly, and this a very important one. The outgoing train from Rossland will leave between 7 and 8 o'clock in the morning and the incoming train will arrive before 8 o'clock in the evening. When this change takes place Rossland will have quicker and better communication with the outside world.
