This is the answer sent by the Grand Brisben Walker, soliciting an article on any subject Mr. Gladstone might select, the remuneration to be \$1 a word. Those

A statistical person who says he has carefully investigated the subject, says that, with the exception of William Henry Harrison, all President's of the United States have had blue eyes.

movelists' on whom Mr. Watson sets most store. Barrie and Stevenson, he says, have divided Scott's kingdom between them. Of Scott and Thackersy, he reads a good deal every year, and thinks "Esmond" the finest novel in the language. Scott, he believes, will always hold his own, Thackersy perhaps. "These men, you see, are out in the main stream of literature, and you cannot strand them. They know nothing of the little eddies that whirl about under the trees in the sunshine of a sumof the little eddies that whirl about un-der the trees in the sunshine of a sum-mer afternoon. They treat life in a-broad, human fashion, without preju-dice, as you might say. And that is the only way to do it. A novel if it is to live must deal with the few great pas-sions of life. Books written for a pur-pose may be popular for a time, but

"IAN MACLAREN."

hey never get into the center of the they never get into the center of the stream."

"What were my first impressions of Drumtochty? Well, the day I drove up from Perth to be ordained was a bitter winter day. The glen, I remember, was under snow, and made a fine picture in its white dress. I was much struck with the hearty kindness of the people, and their wholesome, vigorous appearance; also their good sound sense, as it came out in the speaking at a little dinner we had in the school after the ordination."

In this pleasant glen among the moors, Mr. Watson remained long

moors, Mr. Watson remained long enough, I need not say, to know the people through and through, but as a matter of actual reckoning the time was matter of actual reckoning the time was less than three years. Two decades almost, have come between him and his life in Drumtochty, and the people he paints so delightfully belong in a generation that has passed or is passing away. They are the people not of today but of yesterday.

I asked to what extent his characters were portaits. The answer was that in

MOST PERFECT BABY.

acknowledge.

Master Fitzsimmons doesn't lay claim to extraordinary beauty of face, athough he has a mother who is more than ordinary beautiful.

But he is the most perfectly shaped small bit of humanity that has been found in many years. He is a tiny Greek god in every line, which is all the more extraordinary because infants of three months are never expected to have what artists and women call 'shape."

Master Fitzsimmons is immensely interesting to doctors and to all who have read Flato's Republic.

Of course, Champion Fitzsimmons, has papa, is admittedly a magnificent specimen of muscle and lightning. Rose Julian, Mrs. Fitzsimmons, was credited with the most beautiful figure of any known American woman.

Muster Fitzsimmon's measuremense prove his claims to distinction.

Besides this, he seems to be nothing but muscle. When he was three days old, it is said, he deliberately sat up, and now he declines to le flat on his back when awake, ris can wen mean. acknowledge.

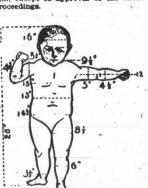

Master Fitzsimmons doesn't lay

out muscle. When he was three days old, it is said, he deliberately sat up, and now he declines to lie fiat on his back when awake. He can rise unusually heavy weights and on increase his chest measurement one such easily. His little back is all muscle instead of fat. Most babbes Haws limbs that are straight junks of fateness.

He is described as a miniature "Champion Fitz"—a reproduction in the chest, shoulders and back of his

I asked to what extent his characters were portraits. The answer was that in no case had an actual person beer lifted in thot he story. What he aimed at was to gives types, not individuals. That of course, was what one would expect; still. I was sorry to be told for certain that the valiant old doctor—or say, a Drumsheough, had never existed in actual flesh and blood.

It was delightful to hear the minister on Scotch dialect as a medium for literary expression. Readers of "Beside the Bonnie Brier Bush" will agree with him that the Drumtochty speech is viscorous, and yet tender and full of local color and suggestifeness.

"There are words in it," he went on "which would need whole English sontenees to express, and even then you mightn't get just the right shade of meaning. Take such words os 'dour' or 'couthie.' How are you to set them down in English? Or such an expression as 'daidlin body,' or 'the grin's never aff yee face.' I can hear a Drumtochty farmer say to a carter who had knocked his wheel, against a gate. 'Whaur are ye driving tae, ye ramstam idlot?' It comes down upon you like a blow, doesn't it? I wonder, by the way, what the glossary makes of 'ram-stam idlot?'."

The minister roared when he found the corresponding expression in English was "thoughtless fallow."

"Just fancy the farmer saying such a thing. The fact is, that on such occasions an Englishman has to swear if he wants to be impressive."

I hinted the view that in "Drumtochty," "Thrums," "Dullarg," and other places of recent discovery in Scotland, the people seemed to some of an ordinary bead is fifteen and one-fourth inches.

He keight a variety of the tright of the provided in the corresponding expression in English was "thoughtless fallow."

I hinted the view that in "Drumtochty," "Thrums," "Dullarg," and other places of recent discovery in Scotland, the people seemed to some of an ordinary bead is fifteen and one-fourth inches.

His height, or perhaps I should say land, the people seemed to some extent unconscious of their own humor.

Mr. Watson would not hear of, it.

"It is true," he said, "that they don't laugh much, and that no doubt is why they are supposed to have no sense of humor. An Englishman when he gets hold of a Joke goes screaming down the street with it. A Scot, on the other hand, turns it about in his inside and enjoys it quietly; he is afraid to 'empt Providence with too much noise."

DAVID PATON,

DAVID PATON,

DAVID FATON,

The list leight, or perhaps I should asy his length for he was measurement. The term "actual measurement." Is used because the child was really measurement to be taken in only one way. That is to place the baby on its back upon a table, on the surface of which two marks are made, indicating the length of the little one. The distance between the marks is then measured. The three months is about twenty-two inches so that young "Bob" is about four inches taller than the usual rum

It is chest also is well developed and in proportion to the rest of his anatomy. It measures fifteen inches against fourteen, which is the general average. The neck, arms and legs are all well and proportionately developed.

The grip of his little hand is like that of a minature view, proving that he has good musoles and that he apparently knows how to use them.
