Since the formation of the Women's Christian Temperance Union in this place, one year has passed swiftly by, and is now beyond recall.

Another year lies before us now, all untold as yet; but we need not falter or turn back because we cannot see the future; God sees, and in wisdom and love He will reveal the path to us, one step at a time.

It is given to every physician, the formula of Scott's Emulsion being no secret; but no successful imitation has ever been offered to the public.

It is desirable to know that for Canadian Union in general feel encouraged by the results of the year's work.

The year 1892 has been a wonderful year of progress for the Canadian W. C. T. U.

The department of Scientific Temperance Instruction in National W. C. T. U. under the able supervision of Mrs Mary H. Hunt, of Massachusetts, is continuing its important work.

After two years of prohibition in Kansas the number of convictions in the State prison has fallen off fifty percent.

The next World's W. C. T. U. Convention will be held in Chicago, immediately following the National W. C. T. U. Convention in October.

A member of the W. C. T. U., Mr Lambert, in moving the address in the British House of Commons, referred to the "startling fact that £140,000,000 was expended annually by the people of this country upon intoxicating liquors."

Whatever momentary advantage politicians may gain by sneering at the temperance reform, the hour is not far distant when any politician leader who does that will sign his own political death warrant.

The temperance workers of England have at last made an impression in the political sphere, as proved by the fact that in the Queen's speech local option is promised!

The Supreme Court of Nebraska has decided that if any person commits a violent death at the hands of a man who is intoxicated, under the civil damage act the dependents of the deceased person can recover damages from those who sold the liquor which intoxicated the one who committed the violence.

A CALGARY MIRACLE.

The Most Wonderful Case Ever Recorded in the Northwest.

Miss Lela Cullen is Rescued from What Her Physicians and Friends Thought to be Her Death Bed.

Winnipeg Tribune. Calgary, N. W. T. Oct. 20, 1892.—For some time past the residents of this town have been deeply interested in the case of Miss Lela Cullen, a young lady, who had so nearly approached the portals of the great unknown, that her friends despaired of her recovery, and who has now fully, indeed almost miraculously, regained her health and strength.

Having read on various occasions in The Tribune the particulars of what appeared to be miraculous cures, your correspondent determined to investigate the case of Miss Cullen, and now sends you the particulars fully believing that you will be justified in giving them the widest publication.

When your correspondent visited the residence of Mrs Cullen, the mother of the young lady, he was courteously received, and in reply to his enquiries as to whether she would be willing to give the facts of her daughter's wonderful recovery, for publication for the benefit of other sufferers, Mrs Cullen readily assented.

"My daughter's first illness," said Mrs Cullen, "was in June 1890, when she was taken with the measles. At that time she was seventeen years of age, tall, fine looking and exceedingly healthy, weighing about 140 pounds. All the family took the measles, and all got over them without trouble, except Lela.

Here comes from the first baffled all the ordinary remedies used for that disease, and as the measles did not come out, a physician was called in. He administered remedies, but with no better results, and her case seemed to baffle the physician's skill. After a few weeks my daughter began to improve somewhat, but did not regain her former strength, and six weeks after she was first taken ill, her face, neck, and limbs broke out in blotches. The doctor was again called in, and said it was the measles getting out of her system, and that she would soon be all right again. The doctor's statement was not verified however, for not only did my daughter not improve, but she gradually grew worse. Soon after she began to swell, first the feet, then the limbs, breast and face became puffed up. Another doctor was called in and he pronounced it dropsy, resulting from the measles. The doctor attended her all winter, and although he seemed to do all in his power for her, she gradually became weaker and weaker, she did not eat, and tones failed to improve her appetite, and as she gradually grew weaker she lost her courage, felt hope of life was fast slipping away. In the spring the doctor's medicine having done her no good was discontinued, and instead he gave her preparations of beef, iron and wine, hypophosphites, sarsaparilla, etc. In fact stimulants of the kind had to be constantly forced upon her to keep her alive and in my mind all hope of her recovery, and in my grief I waited for her death. She was now so weak that she could not walk across the floor, and in order to rest her we would lift her into a chair where she would sit for a short while when we would again place her in bed. She was slowly but surely dying before our eyes, and nothing we could do for her was of avail. This was still puffed up, and nothing the doctor could do would reduce the swelling. Her limbs would no longer support her and she could only sit up a very short time each day. In this condition she lingered on until August, 1891, some fifteen months after she was first taken ill, and while we were sorrowfully awaiting what seemed the inevitable end, a ray of hope came. I read in a newspaper of a remarkable cure from the use of Dr Williams' Pink Pills for Pale People, and while I feared I had heard of it, I nevertheless bought a box, and I hoped almost against hope and sent to the headquarters of the company at Brockville, Ont., for a supply. At this time her hair had become so matted that she was not able to be removed from her bed; her weight was reduced to 90 pounds, and her lips were blue. You will thus see how little hope there appeared for her when she first began to use Dr Williams' Pink Pills. After she had taken the first box, although there was no visible improvement, she thought they were doing her good, and her spirits began to rise. At the end of the second box I could notice the improvement and Lela was very hopeful and felt life was returning to her again. After she had taken Dr Williams' Pink Pills for a month, she was able to get up, and by October she was so well that she could superintend work about the house. She still continued taking the Pills, and rapidly recovered all the ill time health, strength and spirits. I cannot tell you," continued Mrs Cullen, "how deeply grateful I am for the wonderful medicine that saved my daughter's life. You may be sure that both I and mine will always warmly recommend it, as we have every reason to do."

Your correspondent then called upon Mr J. G. Templeton, the well-known druggist on Stephen Avenue. In reply to an enquiry as to what he could tell me about Dr Williams' Pink Pills, Mr Templeton replied: "What can I tell you about Pink Pills? Well I can tell you they are the most wonderful medicine I ever handled, I had experience with them in Ontario before coming out here, and in all my experience as a druggist, I never knew any medicine have

such a wonderful demand, or give such great satisfaction. My experience here has been like my experience in Ontario, all who have used Dr Williams' Pink Pills speak in their praise, and if I were to tell you how many boxes I am selling here daily, you would be readily excused for being somewhat incredulous. If I am asked to recommend a medicine, I unhesitatingly recommend Dr Williams' Pink Pills, and my confidence in them has never been misplaced. I have already said the demand for Pink Pills is astonishing, and they invariably give the best satisfaction. I know this to be so from the statements of customers. I have sold here and in Ontario thousands of boxes, and have no hesitation in recommending them as a perfect blood purifier and nerve restorer, curing such diseases as rheumatism, neuralgia, partial paralysis, locomotor ataxia, St. Vitus' Dance, nervous headache, nervous prostration and the tired feeling therefrom; the after-effects of grippe, diseases depending on humors in the blood, such as scrofula, chronic erysipelas, etc. Pink Pills give a healthy glow to pale and sallow complexions, and are a specific for the troubles peculiar to the female system, and in the case of men they effect a radical cure in all cases arising from mental worry, over-work or excess of any nature.

These Pills are manufactured by the Dr Williams' Medicine Company, Brockville, Ont., and Rochester, N. Y., and are sold only in boxes bearing the firm's trade mark and wrapper, at 50c a box or six boxes for \$2.50. Bear in mind that Dr Williams' Pink Pills are never sold in bulk, or by the dozen or hundred and any dealer who offers substitutes in this form is trying to defraud you and should be avoided. Dr Williams' Pink Pills may be had of all druggists or direct by mail from Dr Williams' Medicine Company from either address. The price at which these pills are sold makes a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.
