PRICELESS GEMS AT CORONATION

The Jewels in the King's Crown Include 2818 Diamonds and 297 Pearls

"The grandeur of the whole thing is unimaginable, reminding one of the stories of one's childhood and the jewels massed in heaps waiting the first-comer on the floor of Aladdin's cave." It is thus that one who has been privileged to make a close inspection of the late King Edward's orown describes that important item in the Crown jewels; and some idea of the magnificence of the crown which will be worn by King George at the forthcoming Coronation may be gathered from the fact that to the 2,818 diamonds, 297 pearls, besides many other jewels, which formed King Edward's crown, will be added two sapphires, fifty-six brilliants, and fifty-two rose diamonds.

King George's Crown.

two sapphires, fifty-six brilliants, and fifty-two rose diamonds.

King George's Crown.

The design of King George's crown will be practically the same as that of King Edward, which in turn was a replica of the crown worn by Queen Victoria at her Coronation in 1838. The Royal crowns, however, are remade for each Coronation. This is necesary, of course, on acount of the difference in the sizes of the heads of the respective monarchs. King Edward's measure from temple to temple was 7½ in., and from the forehead to the back of the head 6½ in., the height being 9¼ in. King George's head is slightly smaller, and in addition he has desired that a place be found for a portion of the great Culinan diamond, called, by commind of His Majesty, "The Star of Africa." The larger portion of the diamond will be added to the sceptre which King George holds during the Coronation ceremony.

George holds during the Coronation ceremony.

Acording to the 'Times,' it is probable that the smaller portion of the Cullinan diamond will take the place of the great Prince Regent sapphire, immediately beneath the Black Prince ruby, the great eggshaped sewel which was worn in his helmet by the Black Prince at many battles, including Crecy and Potiters, the great sapphire being transferred to the back of the crown.

It might be mentioned that when the Cullinan diamond, which, before cutting, was no less than 1½1b. in weight, was cut into two portions, a great number of smaller diamonds were made from its "shavings," which were set in various designs for the use of Queen Alexandra.

Famous Earrings,

The richest tungsten mine in the world is located in Guysboro County, Nova Scotia. It has recently been sold to a syndicate of Canadian capitalists.

Owing to the scarcity of domestic servants in Montreal and other places fifty-eight dusky belles from the island of Guadaloupe lave come to Montreal and forty-eight more will foliow shortly.

When a medicine must be given to young children it should be pleasant to take. Chamberlain's Cough Remedy is made from loaf sugar, and the roots used in its preparation give it a flavor similiar to maple syrup, making it pleasant to take. It has no superior forcolds, croup and whooping cough. For sale by all dealers.

Of Queen Alexandra.

Famious Earrings.

The King's crown is simply one gorgeous mass of jewels, and so close-ly set that it is almost impossible to see anything of the from sampthing to the from sampthing to far for a band-eau of large round pearls and variculored jewels. Above are four great arches, which spring from the pearling damends, which spring from the pearling damends, which give the impression of being thrown on in great heaps. Then comes the orb, which supports the St. Andrew's cross, both being thrown on in great heaps. Then comes the orb, which supports the St. Andrew's cross, both being thrown on in great heaps. Then comes the orb, which supports the St. Andrew's cross, both being composed of immense single-stone filewels in the King's crown are Queen Elizabeth's earrings, two pear-shaped pearls which were brought out from among the disused Crown jewels by special command of King Edward to adorn the crown at his Coronation. Exactly as worn by the Virgin Queen at her own Coronation in 1558, these jewels were, by King Edward's order, left untouched and fastened high on active the orb.

Her Majesty's Crown.

Two million dollars worth of gold was shipped to Ottawa from the receiver general's cffice in Toronto last week. This gold came from the United States about 5 years ago and has been in the vault ever since.

This is the centennial year of Portland cement, so called from its resemblance, when set, to a certain building stone obtained at Portland, England. Though the discovery of the process of making the cement dates from 1811, the first important work to which it was applied was the building of the Thames tunnel, in 1828.

"Oats are the most Nutritious of all Cereals"—Robert Hutchinson, M. D. Author, Food and Dietetics

If you've been eating fad breakfast foods in the belief they were more nutritious than oatmeal, it's time you knew the truth.

In his great book, "Food and Dietetics," Robert Hutchinson, M.D., Edin., M.R.C.P., says "Oats may be regarded as the most nutritious of all cereals. They are rich in nitrogenous matter and mineral substances. Of the total nitro-genous matter 94 per cent. is in the form of proteid, and therefore available for tissue-building."

Now that you know the facts you will take an added enjoyment from your bowl of oatmeal each morning. You will serve it to your children regularly.
