OUR ROADS. Ten years since there were many miles of corduroy roads in this county, each parish in some of its out lying sections could only be reached by resorting to this top side down, spilling her machinery, and style of road. Then as truck waggons a quantity of valuable freight, into the to market little fault was found. But all this has changed. At present the roads of York are in a better condition the road machine must have the credit.

LABOR TROUBLES. The strike at the Carnegie works. Homestead, and the accompanying riots appear to be but the precursors of a still more serious state of affairs. The Tennesee miners have gone out on strike and not only have closed down the mines but have effectually for the time prevented the opening of them by non-union men. place. Although these troubles are bad enough yet they sink into insignificance compared with the great strike among the about the 23d. switchmen on all the railroads centering

The Woodstock, so Mr. Phillips will have to railway company took no notice of the be contented with his present route. demand and the men quit work. Beginning at Buffalo, the strike has spread over the state so that to-day freight on all the great trunk lines is at a standstill. mer trainmen have been preparing for a strike, the opening of the world's fair being the stated time for the contest. The switchmen are supported in great measure by the Big Four as it is called, viz.: engineers, firemen, brakesmen and conductors. Should the unions so decide traffic from the Atlantic to the Pacific can be stopped at once, a message over the wires and the deed is done.

In some cases strikes are a benefit, but it will require a close observer to see any particular advantage to be derived from those in Buffalo and vicinity. Several of New York's leading journals say that these labor troubles are the direct outcome of anarchist agitation and that refugees from Europe, like birds of prey, are continually hovering round the great labor centres stirring up strife between employers and employed.

THE Hon. Mr. Gladstone has donned the robes of office and a liberal regime has once more begun in the British empire. Although the great leader is an old man yet he has entered upon one of the most trying periods of a nation's existence. He has taken in hand the solution of a question that has been before the public eye for years, since the people of Ireland had their laws dictated by an lately. Suggestion for a Summer Trip If you wish to take the trip of a lifetime, purchase the low rate excursion tickets sold by all principal lines in the United States and Canada via the Northern Pacific railroad to

Yellowstone National Park, Pacific coast and Alaska.

The trip is made with the highest degree of comfort in the elegant vestibuled trains of the Northern Pacific railroad, which carry dining cars and luxurious Pullman sleeping cars from Chicago, St. Paul and Minneapolis to Yellowstone Park.

The scenery en route is the most magnificent to be found in the seven states through which the road passes. Beautiful mountains, rivers, valleys, lakes and plains follow each other in rapid succession to delight the tourist, who will also find interest in the agricultural, mining, lumbering, industrial and other interests associated with the development of the great Northwest.

The crowning glory of the trip through the Northwest, however, is the visit to Yellowstone Park, the land of hot springs, geysers and gorgeous canons, and to Alaska with its endless ocean channels, snow-capped peaks, Indian villages and glant glaciers.

If you wish to investigate this suggestion, further send to Charles S. Fee, General Passenger Agent, N. P. R. R., St. Paul, Minn., for copies of the handsome illustrated "Wonderland" book, Yellowstone Park, and Alaska folders.
