### Fishery Specialist.

In his time the Hon. D. Morison has been called upon to play many parts, and has played them to the satisfaction of his friends, otherwise he would not be where he is to-day. But we never expected to be able to chronicle that he would be nominated as expert specialist to examine into the practical effect of fishery regulations.

But the unexpected has happened and Mr. Donald Morison, K.C., Attorney General, has been nominated by the Newfoundland Government as a practical fishery expert.

The announcement was not made here first, but in Canada by the Canadian Press Agency, and the Daily News this morning adds authenticity to the report. We may also say that we have no reason to doubt the authenticity of the News, even though Mr. P. T. McGrath recently over his own signature in the Halifax Chronicle stated that "the British and American Governments (with the concurrence of Canada and Newfoundland) have agreed to postpone for six months the selection of national commissioners."

The award itself called "upon the parties to designate within one month their national commissioners for the expert examination of the questions submitted."

The distinguished jurists of international repute who formed the Tribunal made it clear by expression of opinion and by their appointment the

type of appointee which was contemplated by the submission. Here are their words:

"The Tribunal . . . is of opinion that the decision of the reasonableness of these regulations requires expert information about the fisheries themselves and an examination of the practical effect of a great number of these provisions in relation to the conditions surrounding the exercise of the liberty of fishery enjoyed by the inhabitants of the United States."

"As to the third non-national Commissioner this Tribunal designates Doctor P. P. C. Hoek, scientific adviser for the fisheries of the Netherlands."

If Mr. Alexander is the nominee of the Government of the United States, it shows that the opinion of that Government coincided with the Hague Tribunal as to the type of man required. Mr. Alexander is a leading official of the American Bureau of Fishery. Mr. Morison is not even a member of our Fishery Board.

E. wind raged and off Cape Bonavista her jumbo and foremast was torn into shreds and some gear was swept from her decks. The vessel had to close reef and the crew had a hard time of it before reaching port. She will get her sails attended to here before going home to Fortune.

### In Ship's Gao.

The exclusive reference in Saturday's Telegram to the escape of leading stealer Toms of the Brilliant created quite an sensation when read by citizens, and the young woman who was duped by his perfluous conduct has the sympathy of the whole community as well as her parents and relatives. Toms' shipmates say that he was always a sober, steady and very uncommunicative man, and when his action became known to them they were shocked and could hardly realize it. They assert that he has a wife and two children in England and that one officer on board is well acquainted with his antecedents, and that it was he who drew the attention of those in authority on board to his conduct in going through a marriage ceremony here. The man is confined in the ship's jail on board and the officers of the ship are communicating with those in England who are aware of his having a wife there. The police here have not been acquainted of the man's action and no steps have been taken to hand him over to the authorities.

### Ruining the Lobster Fishery.

Six lobster men were brought before Magistrate McDonald from Bank Head, at St. George's, last week, on a charge of putting up old squid and labelling it as lobsters, an exclusive referred to by the Telegram. Mr. George Barr who bought the alleged lobster and sent it abroad was informed about it by the consignees. The pack was traced to a lobster man holding a license at Bank Head. When the enquiry was set on foot another fraud was revealed, viz. that there were six others packing under his single license. The six were summoned, and as each one denied that he had put the old squid into the cans the magistrate to make sure that the criminal would not go unpunished inflicted a fine of \$10 each on the whole of them.

The local arrived from Carbonara with the express to-day.

### BEGAN YOUNG

Had "Coffee Nerves" from Youth.  
"When very young I began using coffee and continued up to the past six months," writes a Texas girl. "I had been exceedingly nervous, thin, and very fallow. After quitting coffee and drinking Postum about a month my nervousness disappeared and has never returned. This is the more remarkable as I am a primary teacher and have kept right on with my work."  
"My complexion now is clear and rosy, my skin soft and smooth. As a good complexion was something I had greatly desired, I feel amply repaid even though this were the only benefit derived from drinking Postum."  
"Before beginning its use I had suffered greatly from indigestion and headache; these troubles are now unknown."  
"The change from coffee to Postum was made without the slightest inconvenience, did not even have a headache or any other trouble. I am now who were visiting me to use Postum a week without being aware that they were not drinking coffee."  
"I have known several to begin the use of Postum and drop it because they did not boil it properly. After knowing that it should be prepared they have tried it again and pronounced it delicious. The Road to Wellville," in pkgs.
