Wedding Bells

HERON—GREEN.

A pretty wedding was solemnized in St. Andrew's Presbyterian Church, Moose Jaw, Sask., on Wednesday, Sept. 17th, when Ida Pearl Heron, daughter of Mr. and Mrs. W. F. Heron, Stadacona Street, East, was united in the holy bonds of matrimony with Charles Green, youngest son of Mrs. and the late Wm. Green, formerly of this city. The ceremony was performed by the Rev. J. A. MacKeigan. Mr. W. A. Neal played the Wedding March. The bride was given in marriage by her brother-in-law, Mr. James Neal. The bride was attended by her sister, Miss Verna Heron. Mr. Harry Hall, brother-in-law of the groom, acted as best man. The bride wore a becoming gown of grey and coral tulle with hat to correspond and carried Ophelia roses. The bridesmaid was attractive in a dress of peach-colored voile and carried carnations. Following the ceremony the bridal party went to the home of the bride's sister, Mrs. James Neal, 1145 Second Avenue, North East, where a buffet luncheon was served to relatives and immediate friends of the contracting parties. The groom's gift to the bride was a handsome travelling bag, to the bridesmaid, a bracelet, and to the groomsmen, a gold tie pin. The bride was the recipient of many handsome and costly gifts, showing the esteem in which the young couple are held. During the day many congratulatory messages were received by cablegram and wire. The happy couple left on the evening train for Winnipeg and other eastern points for a short holiday. On their return they will reside at 24 Cecelia Court, Moose Jaw.

**Octogenarian
Newfoundlander
Dies in Malden**

In the New England Printer for September, record is made of the death of an old Newfoundlander at his home in Malden, Mass., at the ripe age of 84. Robert Brien was born in Carbonear in Dec. 1842, and was the only surviving son of Henry and Martha Brien, formerly of Poole, England.

Mr. Brien, Sr., brought his family to East Boston in 1858, where he engaged in ship-building. Robert was apprenticed to the book-binding business at the age of 15 and in 1867 established himself in that line, in which he continued until the time of his death.

He was a thirty-second degree Mason, and was for forty-five years a member of the Ancient & Honorable Artillery Company of Boston, and for five years a member of the Boston Light Infantry Veteran Association. At the time of his death he was President of the Bookbinders' Guild of Boston, having held that office for many years.

Mr. Brien leaves a widow (nee Miss Florence E. Witham of Boston) one son, Alfred H., one daughter, Mrs. Alfred C. Smith, and three grandchildren.—Nfld. Weekly.

Pearls Suddenly VanishNecklace Valued at £68,000 Stolen
From American in Paris.

Paris, Sept. 21.—Pearls valued at £68,000 vanished in mysterious fashion from an apartment in a fashionable quarter of Paris while the owner was having a bath a few yards away from the place where they were concealed. The owner is Mrs. Edith Smith, described as beautiful, tall, slight, wealthy, and seven and twenty, who arrived in Paris from New York six weeks ago. Mrs. Smith has a collection of magnificent jewels, including several pearl necklaces. On going out to dine with some American friends, Mrs. Smith wore the pick of her collection. Her necklace was composed of three ropes of handsome pearls. She returned home late in the evening and before going to bed laid the precious necklace under her pillow. Mrs. Smith awoke about 9 o'clock and went to her bathroom, which is situated in the corridor of the flat, some six or seven yards from the door of her bedroom. After taking breakfast and finishing her dressing, she went to her pillow to take the necklace and place it in a box which she keeps in a cupboard. It had vanished. Mrs. Smith called a maid and searched the bed in the hope that the necklace had slipped down, but in vain. It was thought the necklace was stolen between the time Mrs. Smith left her room for the bathroom and the time she returned to it after breakfast. But Mrs. Smith tells the police that the doors of both her bedroom and bathroom were left ajar. She heard no noise, no steps, and she believes that if anyone had entered the corridor between the two doors she could not have failed to notice the fact.

**An Explanation of
What Chiropractic Is**FOR THOSE WHO DO NOT UNDER-
STAND ITS TRUE MEANING.

By WM. H. MacPHERSON.

A fall occurs in many ways. The fall is a small thing. It happens to thousands. A tumble down a stairway is a small thing. It happens to thousands. A slip on the icy roadway in winter is a small thing. It happens to thousands. A strain or wrench occurs in various ways. The strain or wrench is a small thing. It happens to thousands.

The fall or tumble, the slip, the strain or wrench produces a sub-luxation. The sub-luxation is a small thing. The sub-luxation produces a pressure on a nerve, the pressure cuts off the flow of mental impulses (life force). That is a small thing. That decreased flow of the life force produces a diseased body and brain. That is a big thing to that man.

WHAT WELL MEN MEAN.

Multiply that sick man by hundreds and you control the physical and mental welfare of a city. Multiply that man by thousands and you shape the physical and mental destiny of a country. Multiply that one vertebral (spinal) column by all of them in the world, and you can see the master key to the sane or insane thoughts and healthy or sick actions of the world.

Every man, woman and child living has a backbone. Every backbone has subluxations. Every subluxation is producing a disease, so the fall or tumble, the slip, the strain or wrench, the subluxation, pressure flow of mental impulses and disease is big enough to control thoughts and actions of a world.

Now comes a man—and any one man is a small thing. This man gives an adjustment, and the adjustment is a small thing. The adjustment replaces the subluxation, and that is a small way. The adjusted subluxation replaces pressure upon nerves, and that is a small thing. The released pressure restores health to a man, and that is a big thing to that man.

Multiply that well man by hundreds and you step up the physical and mental welfare of a city. Multiply that well man by thousands and you increase the efficiency of a country, and you have produced a healthy and better race for posterity. Multiply one Chiropractor by a sufficient number to adjust all the subluxations and you have made sane all the insane; made well all the sick.

CRYING FOR ADJUSTMENTS. Every disease is crying out for an adjustment. Every adjustment demands the Chiropractor. It makes no difference whether that subluxation occurs in, and the adjustment be given to a male or female, young or old, white or black, on the mountain top or in the valley, in the desert or on a ship, at the North Pole or the Equator.

The Chiropractic message is for the body what the God given message is for the soul. A gospel for the multitudes, for all people, for all colors, for all countries, for all conditions. It brings life easier, it makes life easier. It adds years to life and life to years.

Chiropractic needs followers who have the vision to see the rebuilding and reconstruction of the human race, the right of the sick to get well unrestricted and with the exercise of his own rights. The right of Chiropractic to be handed down throughout the generations in its purity for posterity, that the adjustment of a subluxated vertebra, multiplied means a far more efficient race.

A Monster Intestine

In a singular case of congenital malformation revealed in a French hospital by the death of a boy of 15, two loops of the colon, or large intestine, were found to fill the cavity of the abdomen and thorax almost completely. The larger loop was 20 inches long, 10 inches broad and 22 inches in circumference, and contained about 30 pounds of fecal matter.

with much gas. The heart, lungs and liver were compressed into a narrow space of about 2 inches in the upper part of the thorax, only the spleen having a position nearly normal.

TEMPER.

Richest Man in Canada

IS "TIMBER CHIEF" AT 98.

"If there is one outstanding example of the man who has made a conspicuous success of business without paying much heed to changes brought about by the advancement of industry it is John R. Booth owner of the basic principles which John R. has adopted as a result of his independent experience of more than sixty years as a lumberman and pulp and paper manufacturer.

There is no mistaking the domination of Booth in the industries bearing his name. He has not only been the planner but the executor of the Booth policies and he takes pride in the knowledge that the tremendous accomplishments of his mills are the result almost solely of his individual genius for organization and getting things done according to his own particular ideas.

"When I want a thing done, I want it done just as I say it should be done; and if my men can't do it that way there are others who can," said Booth in describing one of the principles on which he has acted for years.

This tendency—to insist on bearing sole responsibility for the company's activity and to refuse to distribute his authority among subordinates—has been regarded by some as a failing. However, it is a pardonable fault, if fault it is. For more than half a century Booth was forced to rely entirely
